The Proposal

This action proposes to amend Title 14 Code of Federal Regulations (14 CFR) part 71 by revising Class E5 airspace at the Galbraith Lake Airport in Galbraith Lake, AK, to accommodate the creation of two special instrument approach procedures at the Galbraith Lake Airport. These special instrument approach procedures were created in 2009, and the need for Class E transition area airspace upward from 1200 feet above the surface was only recently identified. This amended Class E airspace would provide adequate controlled airspace upward from the 700 feet and 1,200 feet above the surface, for the safety and management of IFR operations at the Galbraith Lake Airport.

Class E5 airspace areas designated as 700 and 1200 foot transition areas are published in paragraph 6005 in FAA Order 7400.9U, Airspace Designations and Reporting Points, signed August 18, 2010, and effective September 15, 2010, which is incorporated by reference in 14 CFR 71.1. The airspaces listed in this document would be subsequently published in that Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Because this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority.

This rulemaking is promulgated under the authority described in subtitle VII, part A, subpart 1, Section 40103, Sovereignty and use of airspace. Under that section, the FAA is charged with prescribing regulations to ensure the safe and efficient use of the navigable airspace. This regulation is within the scope of that authority because it proposes to revise Class E airspace at the Galbraith Lake Airport, Galbraith Lake, AK, and represents the FAA’s continuing effort to safely and efficiently use the navigable airspace.
