

benefit Pea Patch Island colonial-breeding wading birds, as well as secretive marshbirds, migratory waterfowl, shorebirds, and other birds of conservation concern. A secondary consideration would be to manage a diversity of other refuge wetland and upland habitats to benefit breeding and migrating songbirds, waterfowl, and raptors, as well as amphibians, reptiles, and mammals of conservation concern. Our Visitor Services program would be enhanced to provide more opportunities for wildlife observation, photography, hunting, fishing, environmental education, and interpretation.

Alternative C, "Cease Management and Close Refuge to Public Uses," would close Supawna Meadows NWR to all public uses and cease all habitat management activities. There would be no funding allocated for any projects at the refuge. This alternative would only partially achieve the refuge purposes, vision, and goals, and respond to public issues. Cape May NWR staff would conduct semiannual site inspections requiring about 40 staff hours per year. We would continue to meet our trust obligations under the Federal Endangered Species Act, which requires us to take measures to benefit the recovery of any federally listed species that might be found on the refuge in the future. We would also continue to comply with the National Historic Preservation Act by maintaining Finns Point Rear Range Light.

Comments

We solicited comments on the draft CCP and the EA for Supawna Meadows NWR from September 27 to October 27, 2010 (75 FR 59287). We evaluated all substantive comments received during the public comment period, and included a summary of comments and our responses as appendix H of the final CCP.

Selected Alternative

We have selected alternative B for implementation, with the following modifications:

- We clarified the rationale for adopting the State's deer hunting safety zones.
- We added a paragraph stating we may evaluate black bear hunting on the refuge if the State opens the area to hunting and if there is enough interest.
- We inserted a paragraph stating that although we are not proposing to open the refuge to turkey hunting at this time, we are willing to discuss opening the refuge to a spring turkey season with assistance from the State.
- We added a Finding of Appropriateness for the release of the

Rhinoncomimus latipes weevil by the New Jersey Department of Agriculture for the biological control of mile-a-minute weed (*Polygonum perfoliatum*).

- We updated the White-tailed Deer Hunt Compatibility Determination to include the State's deer hunting safety zones.

In summary, we believe modified alternative B combines the actions that would most effectively achieve refuge purposes, vision, and goals, and respond to public issues. The basis of our decision is detailed in Appendix I of the final CCP.
