SUPPLEMENTARY INFORMATION: Foreign policy-based controls in the Export Administration Regulations (EAR) are implemented pursuant to section 6 of the Export Administration Act of 1979, as amended, (50 U.S.C. app. sections 2401-2420 (2000)) (EAA). The current foreign policy-based export controls maintained by the Bureau of Industry and Security (BIS) are set forth in the EAR (15 CFR parts 730-774), including in parts 742 (CCL Based Controls), 744 (End-User and End-Use Based Controls) and 746 (Embargoes and Other Special Controls). These controls apply to a range of countries, items, activities and persons, including:

- Entities acting contrary to the national security or foreign policy interests of the United States (§ 744.11);
- Certain general purpose microprocessors for "military end-uses" and "military end-users" (§ 744.17);
- Significant items (SI);
- Hot section technology for the development, production, or overhaul of commercial aircraft engines, components, and systems (§ 742.14);
- Encryption items (§ 742.15);
- Crime control and detection items (§ 742.7);
- Specially designed implements of torture (§ 742.11);
- Certain firearms and related items based on the Organization of American States Model Regulations for the Control of the International Movement of Firearms, their Parts and Components and Munitions included within the Inter-American Convention Against the Illicit Manufacturing of and Trafficking in Firearms, Ammunition, Explosives, and Other Related Materials (§ 742.17);
- Regional stability items (§ 742.6);
- Equipment and related technical data used in the design, development, production, or use of certain rocket systems and unmanned air vehicles (§§ 742.5 and 744.3);
- Chemical precursors and biological agents, associated equipment, technical data, and software related to the production of chemical and biological agents (§§ 742.2 and 744.4) and various chemicals included on the list of those chemicals controlled pursuant to the Chemical Weapons Convention (§ 742.18);
- Nuclear propulsion (§ 744.5);
- Aircraft and vessels (§ 744.7);
- Restrictions on exports and reexports to certain persons designated as proliferators of weapons of mass destruction (§ 744.8);
- Communication intercepting devices, software and technology (§ 742.13);
- Embargoed countries (part 746);
- Countries designated as supporters of acts of international terrorism (§§ 742.8, 742.9, 742.10, 742.19, 746.2, 746.4, 746.7, and 746.9);
- Certain entities in Russia (§ 744.10);
- Individual terrorists and terrorist organizations (§§ 744.12, 744.13 and 744.14);
- Certain persons designated by Executive Order 13315 ("Blocking Property of the Former Iraqi Regime, Its Senior Officials and Their Family Members") (§ 744.18);
- Certain sanctioned entities (§ 744.20); and
- Certain cameras to be used by military end-users or incorporated into a military commodity (§ 744.9).

In addition, the EAR impose foreign policy controls on nuclear-related commodities, technology, end-uses and end-users (§§ 742.3 and 744.2), which are, in part, implemented under section 309(c) of the Nuclear Non Proliferation Act (42 U.S.C. 2139a).

Under the provisions of Section 6 of the EAA, export controls maintained for foreign policy purposes require annual extension. Section 6 of the EAA requires a report to Congress when foreign policy-based export controls are extended. The EAA expired on August 20, 2001. Executive Order 13222 of August 17, 2001 (3 CFR, 2001 Comp., p. 783 (2002)), which has been extended by successive Presidential Notices, the most recent being that of Notice of August 12, 2011, 76 FR 50661 (August 16, 2011), continues the EAR and, to the extent permitted by law, the provisions of the EAA, in effect under the International Emergency Economic Powers Act (50 U.S.C. 1701-1706 (2000)). The Department of Commerce, as appropriate, continues to comply with the provisions of section 6 of the EAA by reviewing its foreign policy-based export controls, requesting public comments on such controls, and preparing a report to be submitted to Congress. In January 2011, the Secretary of Commerce, on the recommendation of the Secretary of State, extended for one year all foreign policy-based export controls then in effect. BIS now solicits public comment on the effects of extending the existing foreign policy-based export controls for another year. Among the criteria considered in determining whether to extend U.S. foreign policy based export controls are the following:

1. The likelihood that such controls will achieve their intended foreign policy purposes, in light of other factors, including the availability from other countries of the goods, software or technology proposed for such controls;
2. Whether the foreign policy objective of such controls can be achieved through negotiations or other alternative means;
3. The compatibility of the controls with the foreign policy objectives of the United States and with overall U.S. policy toward the country subject to the controls;
4. Whether the reaction of other countries to the extension of such controls is not likely to render the controls ineffective in achieving the intended foreign policy objective or be counterproductive to U.S. foreign policy interests;
5. The comparative benefits to U.S. foreign policy objectives versus the effect of the controls on the export

performance of the United States, the competitive position of the United States in the international economy, the international reputation of the United States as a supplier of goods and technology; and

6. The ability of the United States to effectively enforce the controls.

BIS is particularly interested in receiving comments on the economic impact of proliferation controls. BIS is also interested in information relating to the following:

1. Information on the effect of foreign policy-based export controls on sales of U.S. products to third countries (*i.e.*, those countries not targeted by sanctions), including the views of foreign purchasers or prospective customers regarding U.S. foreign policy based export controls.

2. Information on controls maintained by U.S. trade partners. For example, to what extent do U.S. trade partners have similar controls on goods and technology on a worldwide basis or to specific destinations?

3. Information on licensing policies or practices by our foreign trade partners that are similar to U.S. foreign policy based export controls, including license review criteria, use of conditions, and requirements for pre- and post-shipment verifications (preferably supported by examples of approvals, denials and foreign regulations).

4. Suggestions for bringing foreign policy-based export controls more into line with multilateral practice.

5. Comments or suggestions to make multilateral controls more effective.

6. Information that illustrates the effect of foreign policy-based export controls on trade or acquisitions by intended targets of the controls.

7. Data or other information on the effect of foreign policy-based export controls on overall trade at the level of individual industrial sectors.

8. Suggestions for measuring the effect of foreign policy-based export controls on trade.

9. Information on the use of foreign policy-based export controls on targeted countries, entities, or individuals. BIS is also interested in comments relating generally to the extension or revision of existing foreign policy-based export controls.

Parties submitting comments are asked to be as specific as possible. All comments received before the close of the comment period will be considered by BIS in reviewing the controls and in developing the report to Congress. All comments received in response to this notice will be displayed on BIS's Freedom of Information Act (FOIA) Web site at <http://www.bis.doc.gov/foia>. All

comments will be included in a report to Congress to comply with the requirement of Section 6 of the EAA, which directs that BIS report to Congress the results of its consultations with industry on the effects of foreign policy controls.

Dated: August 2, 2011.

Kevin J. Wolf,

Assistant Secretary for Export Administration.
