

likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated this proposed rule as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

L. Technical Standards

The National Technology Transfer and Advancement Act (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This proposed rule does not use technical standards. Therefore, the Coast Guard did not consider the use of voluntary consensus standards.

M. Environment

The Coast Guard has analyzed this proposed rule under Department of Homeland Security Management Directive 023-01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4370f), and has made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. A preliminary environmental analysis checklist supporting this determination is available in the docket where indicated under the "Public Participation and Request for Comments" section of this preamble. This proposed rule involves the delegation of authority, the inspection and documentation of vessels, and congressionally-mandated regulations designed to improve or protect the environment. This action falls under section 2.B.2, figure 2-1, paragraphs (34)(b) and (d), of the Instruction, and under section 6(b) of the "Appendix to National Environmental Policy Act: Coast Guard Procedures for Categorical Exclusions, Notice of Final Agency Policy" (67 FR 48243, July 23, 2002). The Coast Guard seeks any comments or information that may lead to the discovery of a

significant environmental impact from this proposed rule.

Endangered and Threatened Wildlife and Plants; 90-Day Finding on a Petition To List All Chimpanzees (*Pan troglodytes*) as Endangered

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of petition finding and initiation of status review.

SUMMARY: We, the U.S. Fish and Wildlife Service, announce a 90-day finding on a petition to list all chimpanzees (*Pan troglodytes*) as endangered under the Endangered Species Act of 1973, as amended (Act). Based on our review, we find that the petition presents substantial scientific or commercial information indicating that listing all chimpanzees as endangered may be warranted. Therefore, with the publication of this notice, we are initiating a review of the status of the species to determine if listing the entire species as endangered is warranted. To ensure that this status review is comprehensive, we are requesting scientific and commercial data and other information regarding this species. Based on the status review, we will issue a 12-month finding on the petition, which will address whether the petitioned action is warranted, as provided in section 4(b)(3)(B) of the Act.

DATES: To allow us adequate time to conduct this review, we request that we receive information on or before October 31, 2011.

ADDRESSES: You may submit information by one of the following methods:

SUPPLEMENTARY INFORMATION:

Information Solicited

Under the Act, when we make a finding that a petition presents substantial information indicating that listing a species may be warranted, we are required to promptly review the status of the species. To ensure that our status review of the chimpanzee is complete and based on the best available scientific and commercial information, we need certain information. We request scientific and commercial information from the public, concerned governmental agencies, the scientific community, industry, or any other interested parties on the status of the chimpanzee throughout its range, including but not limited to:

(1) Information on taxonomy, distribution, habitat selection, diet, and population abundance and trends of this species.

(2) Information on the effects of habitat loss and changing land uses on the distribution and abundance of this species and its principal food sources over the short and long term.

(3) Information on whether changing climatic conditions are affecting the species, its habitat, or its prey base.

(4) Information on the effects of other potential threat factors, including live capture and collection, domestic and international trade, predation by other animals, and diseases of this species.

(5) Information on management programs for chimpanzee conservation, including mitigation measures related to conservation programs, and any other private or governmental conservation programs that benefit this species.

(6) Information relevant to whether any populations of this species may qualify as distinct population segments.

(7) Information on captive breeding and domestic trade of this species in the United States.

(8) Genetics and taxonomy.

(9) The factors that are the basis for making a listing determination for a species under section 4(a) of the Endangered Species Act of 1973, as amended (Act) (16 U.S.C. 1531 *et seq.*), which are:

(a) The present or threatened destruction, modification, or curtailment of its habitat or range;
