**SUPPLEMENTARY INFORMATION:** The FERC-519, "Application under Federal Power Act section 203," OMB Control No. 1902-0082, is necessary to enable the Commission to carry out its responsibilities in implementing the statutory provisions of section 203 of the Federal Power Act (FPA), 16 U.S.C. 824b. Section 203 authorizes the Commission to grant approval of transactions in which a public utility disposes of jurisdictional facilities, merges such facilities with the facilities owned by another person or acquires the securities of another public utility. Under this statute, the Commission must find that the proposed transaction will be consistent with the public interest.

Under section 203 of the FPA, FERC must review proposed mergers, acquisitions and dispositions of jurisdictional facilities by public utilities, if the value of the facilities exceeds \$10 million, and must approve these transactions if they are consistent with the public interest. One of FERC's overarching goals is to promote competition in wholesale power markets, having determined that

effective competition, as opposed to traditional forms of price regulation, can best protect the interests of ratepayers. Market power, however, can be exercised to the detriment of effective competition and customers, making it necessary for FERC to review and approve or disapprove all jurisdictional mergers, dispositions and acquisitions. The Commission implements these filing requirements in the Code of

Federal Regulations (CFR) under 18 CFR part 33.

*Action:* The Commission is requesting a three-year extension of the current expiration date with no changes to the current reporting requirements.

*Burden Statement:* Public reporting burden for this collection is estimated as:

Number of responses annually	Number of responses per respondent	Average burden hours per response	Total annual burden hours
(1)	(2)	(3)	(1)×(2)×(3)
112	1	395	44,240

The estimated total cost to respondents is \$3,028,143 [44,240 hours/2080 hours<sup>1</sup> per year, times \$142,372<sup>2</sup> equals \$3,028,143]. The cost per respondent annually is \$27,037. This is a decrease from 134 to currently an average of 112 filings annually. The Commission considers this a normal fluctuation due to market activities and filing times chosen. Utilities file periodically; therefore the number of filings is expected to continue to fluctuate from year-to-year.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, using technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable filing instructions and requirements; (4) training personnel to respond to this collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The cost estimate for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

*Comments are invited on:* (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology e.g. permitting electronic submission of responses.

Dated: August 29, 2011.

Secretary.
