

FOR FURTHER INFORMATION CONTACT:

Ignacio Peralta, RAC Coordinator,
Carson National Forest, 575-758-6344,
iperalta@fs.fed.us.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday. Requests for reasonable accommodation for access to the facility or proceedings may be made by contacting the person listed for further information.

SUPPLEMENTARY INFORMATION: The following business will be conducted: review status of Title II and funds to be allocated, discuss letter from Cibola and McKinley counties, monitoring report, review of administrative costs, provide opportunity for proponents to present proposals (5 minutes each), provide NNM RAC members opportunity to ask questions about proposals (3 minutes each), review proposal recommendation process, review and rank project proposal by Category Groups, provide recommendations for funding to Designated Federal Official and provide for public comment. Anyone who would like to bring related matters to the attention of the committee may file written statements with the committee staff before or after the meeting. The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should request in writing by September 14, 2011 to be scheduled on the agenda. Written comments and requests for time for oral comments must be sent to 208 Cruz Alta Road, Taos, New Mexico 87571, or by e-mail to iperalta@fs.fed.us, or via facsimile to 575-758-6213.

Dated: August 31, 2011.

John Miera,

Acting Forest Supervisor, Carson National Forest.

[FR Doc. 2011-22796 Filed 9-6-11; 8:45 am]

BILLING CODE 3410-11-P

DEPARTMENT OF COMMERCE**Submission for OMB Review;
Comment Request**

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: Annual Survey of Manufactures.

OMB Control Number: 0607-0449.
Form Number(s): MA-10000(L), MA-10000(S), NC-99530.

Type of Request: Extension of a currently approved collection.

Burden Hours: 181,120.

Number of Respondents: 51,000.

Average Hours Per Response: 2 hours and 40 minutes.

Needs and Uses: The Census Bureau is requesting an extension of the currently approved collection for the ASM. The Census Bureau has conducted the ASM since 1949 to provide key measures of manufacturing activity during intercensal periods. In census years ending in "2" and "7," we mail and collect the ASM as part of the Economic Census Covering the Manufacturing Sector. The ASM will be included in the collection of the 2012 Economic Census and therefore all collection activities for 2012 will be on hiatus. In 2013, collection activities will resume for this clearance.

The ASM statistics are based on a survey that includes both mail and nonmail components. The mail portion of the survey is comprised of a probability sample of approximately 51,000 manufacturing establishments from a frame of approximately 117,000 establishments. These 117,000 establishments are primarily comprised of manufacturing establishments of multiunit companies (companies with operations at more than one location) and large single-location manufacturing companies. The nonmail component is comprised of the remaining small and medium-sized single-location companies, approximately 211,000. No data are collected from companies in the nonmail component. Data are directly obtained from the administrative records of the Internal Revenue Service (IRS), the Social Security Administration (SSA), and the Bureau of Labor Statistics. The nonmail companies account for 63 percent of the population and for less than 7 percent of the manufacturing output.

This survey is an integral part of the Government's statistical program. Its results provide a factual background for decision making by the executive and legislative branches of the Federal Government. Federal agencies use the annual survey's input and output data as benchmarks for their statistical programs, including the Federal Reserve Board's Index of Industrial Production and the Bureau of Economic Analysis' estimates of the gross domestic product. The data also provide the Department of Energy with primary information on the use of energy by the manufacturing sector to produce manufactured products. These data also are used as

benchmark data for the Manufacturing Energy Consumption Survey, which is conducted for the Department of Energy by the Census Bureau. The Department of Commerce uses the exports of manufactured products data to measure the importance of exports to the manufacturing economy of each state. Within the Census Bureau, the ASM data are used to benchmark and reconcile monthly and quarterly data on manufacturing production and inventories.

The ASM is the only source of complete establishment statistics for the programs mentioned above.

The ASM furnishes up-to-date estimates of employment and payrolls, hours and wages of production workers, value added by manufacture, cost of materials, value of shipments by class of product, inventories, cost of employer's fringe benefits, operating expenses, and expenditures for new and used plant and equipment. The survey provides data for most of these items for all 5-digit and selected 6-digit industries as defined in the North American Industry Classification System (NAICS). We also provide geographic data by state at a more aggregated industry level.

The survey also provides valuable information to private companies, research organizations, and trade associations. Industry makes extensive use of the annual figures on product class shipments at the U.S. level in its market analysis, product planning, and investment planning. State development/planning agencies rely on the survey as a major source of comprehensive economic data for policymaking, planning, and administration.

The Ownership or Control forms will be used to update the Business Register, the basic sampling frame for many of our current surveys. This enables us to update establishments in the Census Bureau's Business Register that are incorrectly identified as being single-establishment firms.

Affected Public: Business or other for-profit.

Frequency: Annually.

Respondent's Obligation: Mandatory.

Legal Authority: Title 13, United States Code, Sections 182, 224, 225.

OMB Desk Officer: Brian Harris-Kojetin, (202) 395-7314.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482-0266, Department of Commerce, Room 6616, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at dhynek@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Brian Harris-Kojetin,

OMB Desk Officer either by fax (202-395-7245) or e-mail (bharrisk@omb.eop.gov).

Dated: September 1, 2011.

Glenna Mickelson,

Management Analyst, Office of the Chief Information Officer.

DEPARTMENT OF COMMERCE

International Trade Administration

Aerospace Executive Service Trade Mission at Singapore Air Show

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice.

Mission Description

The United States Department of Commerce, International Trade Administration, U.S. and Foreign Commercial Service is organizing an Aerospace Executive Service Trade Mission (AESTM) to Singapore in conjunction with the Singapore Airshow 2012 (<http://www.singaporeairshow.com.sg>).

The AESTM is designed to include participants from a variety of U.S. aerospace-industry manufacturers and service providers. The mission participants will be introduced to international agents, distributors and end-users whose capabilities are targeted to each U.S. participant's needs. Mission participants will also be briefed by key local industry leaders who can advise on local market conditions and opportunities.

In addition to the above-mentioned services, the Commercial Service will again bring its AsiaNow Showtime program to the Singapore Air Show, through which mission participants can meet one-on-one with Commercial Service aerospace and defense industry specialists from country markets throughout Asia. The industry specialists will be on hand to discuss market trends and opportunities in their respective markets.

Commercial Setting

The Singapore Air Show (SAS) is Asia's largest aerospace and defense event and one of the top three air shows in the world, serving as an international marketplace and networking platform

for the global aerospace community. Encompassing all civil and military sectors of the international aerospace industry, the SAS is the foremost platform for companies to showcase their products and services in the Asia-Pacific region. The 2010 SAS featured over 43,000 trade attendees from 133 countries, participation from 897 companies from 36 countries and closed with deals and announcements worth US \$10 billion.

Asia Pacific is widely considered the most promising market for the aerospace industry worldwide. As a leading global aviation hub in Asia Pacific, Singapore (the U.S.' 10th largest export market in 2010) is well positioned to take advantage of growth opportunities stemming from the region's brisk international trade, tourism and investments. U.S. aerospace firms looking to establish or expand business in Singapore and other markets in this dynamic region stand to benefit from participation in the AESTM in the context of the Singapore Air Show, which is the region's largest air show.

Singapore is the 8th largest market for U.S. aerospace exports. In 2010, U.S. aerospace exports were \$3.5 billion, a 37% increase from 2009 (\$2.7 billion). Singapore is the regional leader in aerospace maintenance, repair and overhaul (MRO), manufacturing, and research and development. Since 1992, Singapore's aerospace industry production has grown at an average rate of 13.3%, to become the most comprehensive MRO hub in Asia.

Aerospace is one of the fastest-growing industries in Singapore, and the long-term outlook remains positive. According to Frost and Sullivan, the business research and consulting firm, the Asia Pacific aviation industry is experiencing a faster recovery than anticipated. In fact, Frost and Sullivan states that the core of aerospace MRO activity is shifting towards Asia. This has created a market climate where Asian economies are leading the pace of aviation recovery. Asia Pacific is expected to dominate about 40% (U.S. \$270 billion) of the global airline revenue by 2020. The cargo business has also shown equally buoyant growth, with Asia being one of the major hubs of the air freight business. Also, the rising GDP rates across Asia and the increasing disposable income of the population will lead to higher demand from commercial passengers. Singapore is particularly well-equipped to capture the demand from aviation-related services from this market given its MRO hub status, which will translate into greater opportunities for American

suppliers to sell to this lucrative market and beyond.

Mission Goals

The goal of the Aerospace Executive Service at the 2012 Singapore Air Show is to promote U.S. exports. To this end, the AESTM will facilitate an effective presence for small- and medium-sized U.S. companies by combining aspects of a trade mission, trade show presence and networking activities in one package.

The AESTM Program enables U.S. aerospace companies to familiarize themselves with this important trade fair, to conduct market research and to explore export opportunities through pre-arranged meetings with potential partners. The Aerospace Executive Service also allows U.S. companies to have a presence at the show in the form of kiosk space, providing them an enhanced image and an extended level of engagement at the show site. AESTM participants will be supported by knowledgeable Commercial Service specialists familiar with the firms' objectives and with the Asian aerospace market.

Mission Scenario

Within the U.S. Pavilion at the 2012 Singapore Air Show, the Commercial Service will maintain a 64-square-meter booth that will include 36 square meters of kiosk space for the mission participants, where they can display company literature and conduct meetings with visitors to the air show, including buyer delegations recruited by Commercial Service staff in other Pacific Rim countries under the AsiaNow program. The Commercial Service booth will also house an area for meetings with Commercial Service staff and a Business Information Office (BIO) reception area (28 square meters). Commercial Service staff and the AES coordinator will be available to provide information and assistance throughout the duration of the AESTM at the Singapore Air Show. They will also promote and refer interested parties to AESTM participants.

In summary, participation in the AESTM Program includes:

- Pre-show breakfast briefing on February 13 (U.S. Ambassador to Singapore will be invited to be the lead presenter along with industry representatives);
- Daily transportation to and from AESTM hotel and Singapore Air Show;
- Pre-scheduled meetings with potential partners, distributors, and end users recruited by the Commercial Service;
