

Fukushima Daiichi accident. The USEPA commented that continued operation and licensing activities for SQN Units 1 and 2 should not pose an imminent risk to public health and safety. The USEPA also concurred with the NRC's conclusion that improving the NRC's regulatory framework is an appropriate, realistic, and achievable goal. TVA agrees that these comments are consistent with conclusions of the NRC 90-day report and TVA's examination of SQN current operations and proposed operation under renewed licenses. The USEPA also noted that, should the NRC decide to recommend moving spent fuel from pool to dry cask storage sooner, TVA may need to expand the SQN ISFSI sooner than described in the FSEIS. TVA is examining the benefits and feasibility of more rapid transfer of spent fuel to dry cask storage. If expansion of the existing SQN ISFSI is needed sooner, the environmental impacts would not differ from those described in the FSEIS. Finally, USEPA recommended that TVA consider applying proposals of the NRC 90-day report to SQN Units 1 and 2. TVA will consider applying proposals of the NRC 90-day report to SQN Units 1 and 2. TVA will continue to evaluate future NRC recommendations and to meet all applicable regulatory requirements that result from response to the Fukushima events.

Decision

On August 18, 2011, the TVA Board decided to proceed with an application to extend the operating licenses for Sequoyah Units 1 and 2 for an additional 20 years and other such actions as necessary to accomplish NRC approval of the license renewal application. Continuing to operate SQN would provide the Tennessee Valley with an additional 20 years of safe, reliable, base load power while promoting TVA's efforts to reduce carbon emissions, make beneficial use of an existing asset, and deliver power at the lowest feasible cost.

Environmentally Preferred Alternative

The environmentally preferred alternative is Alternative 1—SQN Units 1 and 2 License Renewal—Action Alternative. The environmental impacts of continued operation are minor. As an existing plant, continued operation of SQN would not result in additional environmental impacts while contributing to meeting the future demands on the TVA system to supply reliable energy with low carbon emissions.

Dated: August 31, 2011.

Preston D. Swafford,

Chief Nuclear Officer and Executive Vice President, Nuclear Generation.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[Docket No. FHWA-2011-0099]

Agency Information Collection Activities: Request for Comments for a New Information Collection

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: 30-Day notice of submission of information collection approval from the Office of Management and Budget and request for comments.

SUMMARY: As part of a Federal Government-wide effort to streamline the process to seek feedback from the public on service delivery, FHWA has submitted a Generic Information Collection Request (Generic ICR): "Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery" to OMB for approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*).

DATES: Please submit comments by October 11, 2011.

ADDRESSES: You may send comments within 30 days to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street, NW., Washington, DC 20503, Attention DOT Desk Officer. You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burden; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. All comments should include the Docket number FHWA-2011-0099.

FOR FURTHER INFORMATION CONTACT:

Michael Howell, 202-366-5707, Office of Information and Management Service, Federal Highway Administration, Department of Transportation, 1200 New Jersey Avenue, SE., Washington, DC 20590, Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

Background: The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

The FHWA received no comments in response to the 60-day notice published in the **Federal Register** of December 22, 2010 (75 FR 80542) [Page 17183].

Below we provide FHWA's projected average estimates for the next three years:

Respondents: State and local governments, highway industry organizations, and the general public.

Estimated Average Annual Burden: The burden hours per response will vary with each survey; however, we estimate an average burden of 15 minutes for each survey.

Estimated Total Annual Burden Hours: We estimate that FHWA will survey approximately 21,000 respondents annually during the next 3 years. Therefore, the estimated total annual burden is 5,200 hours.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Issued on: September 2, 2011.

Michael Howell,

Acting Chief, Management Programs and Analysis Division.

BILLING CODE 4910-22-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. FRA 2011-001-N-12]

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Federal Railroad Administration.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 and its implementing regulations, the Federal Railroad Administration (FRA) hereby announces that it is seeking renewal of the following currently approved information collection activities. Before submitting these information collection requirements for clearance by the Office of Management and Budget (OMB), FRA is soliciting public comment on specific aspects of the activities identified below.

DATES: Comments must be received no later than November 7, 2011.

ADDRESSES: Submit written comments on any or all of the following proposed activities by mail to either: Mr. Robert Brogan, Office of Safety, Planning and Evaluation Division, RRS-21, Federal Railroad Administration, 1200 New Jersey Ave., SE., Mail Stop 25,

Washington, DC 20590, or Ms. Kimberly Toone, Office of Information Technology, RAD-20, Federal Railroad Administration, 1200 New Jersey Ave., SE., Mail Stop 35, Washington, DC 20590. Commenters requesting FRA to acknowledge receipt of their respective comments must include a self-addressed stamped postcard stating, "Comments on OMB control number 2130-0571." Alternatively, comments may be transmitted via facsimile to (202) 493-6216 or (202) 493-6497, or via e-mail to Mr. Brogan at *Robert.Brogan@dot.gov*, or to Ms. Toone at *Kimberly.Toone@dot.gov*. Please refer to the assigned OMB control number in any correspondence submitted. FRA will summarize comments received in response to this notice in a subsequent notice and include them in its information collection submission to OMB for approval.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Brogan, Office of Planning and Evaluation Division, RRS-21, Federal Railroad Administration, 1200 New Jersey Ave., SE., Mail Stop 25, Washington, DC 20590 (*telephone*: (202) 493-6292) or Ms. Kimberly Toone, Office of Information Technology, RAD-20, Federal Railroad Administration, 1200 New Jersey Ave., SE., Mail Stop 35, Washington, DC 20590 (*telephone*: (202) 493-6132). (These telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1995 (PRA), Public Law 104-13, § 2, 109 Stat. 163 (1995) (codified as revised at 44 U.S.C. 3501-3520), and its implementing regulations, 5 CFR Part 1320, require Federal agencies to provide 60-days notice to the public for comment on information collection activities before seeking approval for reinstatement or renewal by OMB. 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1), 1320.10(e)(1), 1320.12(a). Specifically, FRA invites interested respondents to comment on the following summary of proposed information collection activities regarding (i) whether the information collection activities are necessary for FRA to properly execute its functions, including whether the activities will have practical utility; (ii)

the accuracy of FRA's estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to determine the estimates; (iii) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (iv) ways for FRA to minimize the burden of information collection activities on the public by automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (e.g., permitting electronic submission of responses). See 44 U.S.C. 3506(c)(2)(A)(i)-(iv); 5 CFR 1320.8(d)(1)(i)-(iv). FRA believes that soliciting public comment will promote its efforts to reduce the administrative and paperwork burdens associated with the collection of information mandated by Federal regulations. In summary, FRA reasons that comments received will advance three objectives: (i) Reduce reporting burdens; (ii) ensure that it organizes information collection requirements in a "user friendly" format to improve the use of such information; and (iii) accurately assess the resources expended to retrieve and produce information requested. See 44 U.S.C. 3501.

Below is a brief summary of currently approved information collection activities that FRA will submit for clearance by OMB as required under the PRA:

Title: Occupational Noise Exposure for Railroad Operating Employees.

OMB Control Number: 2130-0571.

Abstract: The collection of information is used by FRA to ensure that railroads covered by this rule establish and implement—by specified dates—noise monitoring, hearing conservation, and audiometric testing programs, as well as hearing conservation training programs, to protect their employees against the damaging and potentially dangerous effects of excessive noise in the everyday rail environment.

Affected Public: Businesses.

Respondent Universe: 460 railroads.

Frequency of Submission: On occasion.

Reporting Burden:

CFR Section	Respondent universe	Total annual responses	Average time per response	Total annual burden hours
227.9—Waivers	460 Railroads	5 petitions	60 minutes	5 hours.
227.103—Noise Monitoring Program. —Notification of Employee of Monitoring.	460 Railroads	460 programs	2 hours/8 hours 600 hours. 30 minutes	5,165 hours. 453 hours.
