Abstract: The High School Longitudinal Study of 2009 (HSL:09) is a nationally representative, longitudinal study of more than 20,000 9th graders in 944 schools who will be followed through their secondary and postsecondary years. The main study students will be re-surveyed in 2012 when most are high school 11th graders. The study focuses on understanding students' trajectories from the beginning of high school into university or the workforce and beyond. What students decide to pursue when, why, and how are crucial questions for HSL:09, especially, but not solely, in regards to science, technology, engineering, and math courses, majors, and careers. This study includes a new student assessment in algebraic skills, reasoning, and problem solving and, like past studies, will survey students, their parents, school administrators, and school counselors. Students will be administered a questionnaire and an assessment instrument. This submission asks for a full-scale collection clearance for the first follow-up of HSL:2009/12.
