

approach to the prior supporting statement will be applied to summarize any provided information for the purpose of updating the estimate of burden for the next three years.

Are there changes in the estimates from the last approval?

At this time we are obtaining updated data from which to re-calculate burden estimates for the ICR renewal. The preliminary data is sufficiently incomplete to preclude the EPA from projecting the change in burden. There is an indication of an increase of activity for the Atlantic region and the coast of Alaska.

What is the next step in the process for this ICR?

The EPA will consider the comments received and amend the ICR as appropriate. Additionally, the EPA is consulting with the Department of Interior's Bureau of Ocean Energy Management, Regulation and Enforcement to obtain detailed estimates of offshore activity that would fall under air regulations and incur burden. The incoming information will be incorporated into an updated supporting statement for inclusion in an OMB ICR package. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, the EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
