Resources Fisheries Division, Athens, GA 30602, requests a five year permit to determine population dynamics and seasonal habitat use of Atlantic sturgeon in Georgia. Gill nets and trammel nets would be used to capture adult and juvenile Atlantic sturgeon, which would be measured, weighed, photographed, PIT and Floy tagged, tissue sampled; a sub-set would also be anesthetized, laproscoped, fin ray clipped, and implanted with an internal satellite tag. Egg mats and D-frame nets would be used to collect larval fish.

Kenneth Sulak, Ph.D., [File No. 16508] of the U.S. Geological Survey, Florida Integrated Science Center, 7920 NW., 71st Street, Gainesville, FL 32653, requests a five year permit to identify and track Atlantic sturgeon in Florida and Georgia rivers. Adult and juvenile Atlantic sturgeon would be captured using a combination of side-scan sonar and gill nets. Captured individuals would be measured, weighed, photographed, PIT and Floy tagged, tissue sampled, and have an external satellite tag attached.

Information on shortnose sturgeon life history in the Gulf of Maine, including movement, natal river origin, and other vital population parameters. The applicant proposes to collect information on shortnose sturgeon life history in the Gulf of Maine, including movement, natal river origin, and other vital population parameters. The proposed research would take place in the waters of the Gulf of Maine, the Penobscoit, Kennebec, and Saco Rivers in Maine, the Merrimack River in Massachusetts, and other small coastal rivers of Maine and New Hampshire. Adult and juvenile shortnose sturgeon would be collected using gill nets, trammel nets, beach seine and trams. Shortnose sturgeon eggs would be lethally collected using egg mats or D-frame nets. All adult and juvenile shortnose sturgeon would be measured, weighed, passive integrated transponder (PIT) tagged, Floy/T-bar tagged, tissue sampled, borosкопed, photographed, and released. Depending on the research objective to be met, several subsets of captured shortnose sturgeon would be assigned different take activities. One subset of the sturgeon from each river would additionally be fitted with either an internal or external satellite tag; another subset would have an apical spine or scute removed; a third subset would be blood sampled; a fourth subset would undergo gastric lavage; a fifth subset would have a fin ray section removed; and a final subset of ten adult/juvenile fish would be fitted with an internal/external acoustic tag with trailing antennae. As required for the specific procedure, fish would be anesthetized using tricaine methanesulfonate (MS-222) or electronarcosis. The proposed research would provide managers with a more comprehensive understanding of the population dynamics of shortnose sturgeon in the Gulf of Maine and aid in the management of this protected species. The permit would be valid for five years from the date of issuance.

Dated: September 15, 2011.

P. Michael Payne,
Chief, Permits and Conservation Division,
Office of Protected Resources, National Marine Fisheries Service.

RIN 0648–XA712
Endangered Species; File No. 16306

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that Gail Wippelhauser, Maine Department of Marine Resources, 21 State House Station, Augusta, ME 04333, has applied in due form for a permit to take shortnose sturgeon for purposes of scientific research.

DATES: Written, telefaxed, or e-mail comments must be received on or before October 21, 2011.

ADDRESSES: The application and related documents are available for review by
selecting “Records Open for Public Comment” from the Features box on the Applications and Permits for Protected Species (APPS) home page, https://apps.nmfs.noaa.gov, and then selecting File No. 15634 from the list of available applications.

These documents are also available upon written request or by appointment in the following offices:

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427–8401; fax (301) 713–0376; Northwest Region, NMFS, 7600 Sand Point Way NE, Bldg. 1, Seattle, WA 98115–0700; phone (206) 526–6150; fax (206) 526–6426; and Southwest Region, NMFS, 501 West Ocean Blvd., Suite 4200, Long Beach, CA 90802–4213; phone (562) 980–4001; fax (562) 980–4018.

Written comments on this application should be submitted to the Chief, Permits, Conservation and Education Division

- By e-mail to NMFS.PruComments@noaa.gov (include the File No. in the subject line of the e-mail)
- By facsimile to (301)713–0376, or
- At the address listed above.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits, Conservation and Education Division at the address listed above. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Amy Hapeman or Colette Cairns, (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 et seq.) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222–226).

The SWFSC proposes to conduct research on leatherback sea turtles to continue long-term monitoring of their status off the coasts of California, Oregon, and Washington. This purpose of the work is to identify critical forage habitats, genetic stock structure, migratory corridors, and potential fishery impacts for leatherbacks. Up to 55 sea turtles would be located annually through aerial surveys and subsequently approached from a research vessel for remote tissue sampling and attachment of a suction-cup transmitter. After tag attachment a subset of the animals would be captured by breakaway hoopnet for additional research procedures before release: measure; weigh; flipper and passive integrated transponder tag; ultrasound; tissue, blood, cloacal swab and fat sample; opportunistically sample feces and stomach contents; photograph/video; insertion of a stomach pill; transmitter attachment via suction-cup and drilling through the medial ridge; and/or oxytetracycline injection. The permit would be valid for 5 years from the date of issuance.

Dated: September 16, 2011.

P. Michael Payne,
Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.

Marine Mammals; File No. 16510

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of permit.

SUMMARY: Notice is hereby given that Blank Park Zoo [Kevin V. Drees, Responsible Party], 7401 SW Ninth, Des Moines, IA 50315 has been issued a permit to import up to five non-releasable California sea lions (Zalophus californianus) and harbor seals (Phoca vitulina) for public display.

ADDRESSES: The permit and related documents are available for review upon written request or by appointment in the following offices:

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427–8401; fax (301) 713–0376; and Southeast Region, NMFS, 263 13th Avenue South, Saint Petersburg, Florida 33701; phone (727) 824–5312; fax (727) 824–5309.

FOR FURTHER INFORMATION CONTACT: Laura Morse or Jennifer Skidmore, (301) 427–8401.

SUPPLEMENTARY INFORMATION: On June 24, 2011, notice was published in the Federal Register (76 FR 37063) that a request for a public display permit, had been submitted by the above-named organization to import up to five non-releasable marine mammals over the next five year period including two harbor seals in the fall of 2011 from the Marine Mammal Rescue Division of the Vancouver Aquarium, Vancouver, Canada for purposes of public display. The requested permit has been granted under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 et seq.) and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), a final determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Dated: September 16, 2011.

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting of the North Pacific Fishery Management Council’s (Council) Pacific Northwest Crab Industry Advisory Committee.

SUMMARY: The Pacific Northwest Crab Industry Advisory Committee will meet October 13, 2011 at the Leif Erickson Hall in Ballard, WA. In Alaska, listening sites for the meeting will be located at the Unalaska City Hall and in Kodiak listening site to be announced.

DATES: The meeting will be held on October 13, 2011.

ADDRESSES: The meeting will be held at the Leif Erickson Hall, 2245 NW 57th Street, Seattle, WA 98107 (in Ballard).

FOR FURTHER INFORMATION CONTACT: Diana Stram, Council staff; telephone: (907) 271–2809.

SUPPLEMENTARY INFORMATION: Agenda—Alaska Department of Fish & Game/ NMFS scientists from Alaska will be presenting the information on these
