Abstract: The Migratory Bird Treaty Act (MBTA) (16 U.S.C. 703 *et seq.*) prohibits the unauthorized take of migratory birds and authorizes the Secretary of the Interior to regulate take of migratory birds in the United States. Under this authority, we control the hunting of migratory game birds through regulations in 50 CFR part 20. On January 1, 1991, we banned lead shot for hunting waterfowl and coots in the United States. Wildlife managers and policymakers at all levels are becoming increasingly concerned about the exposure of mourning doves to spent lead shot.

The mourning dove is the most hunted migratory game bird species. We are asking OMB for approval to sponsor a National Mourning Dove Hunter Attitude Survey on Nontoxic Shot. The Association of Fish and Wildlife Agencies and all four Flyway Councils are collaborating on this survey. Information from this survey will help us make nontoxic shot policy decisions and develop appropriate informational and educational programs if new regulations are necessary.

Under the Migratory Bird Harvest Information Program (50 CFR 20.20), each State annually provides a list of all migratory bird hunters licensed by the State (OMB Control Number 1018-0023). We will use these lists to randomly select mourning dove hunters to participate in the proposed survey. We plan to collect:

- Demographic information (e.g., age, gender, income, education, and occupation).

- Information on hunting experiences (e.g. hunter type, distance traveled to hunt, type of ammunition, frequency of hunting, and positive and negative aspects).

- Perceived problems with nontoxic shot.

- Indirect influences with nontoxic shot.

Comments: On August 18, 2009, we published in the **Federal Register** (74 FR 41739) a notice soliciting public comment on this information collection for 60 days. The comment period ended on October 19, 2009. We received the following comments:

One comment protested the entire migratory bird hunting regulations process, surveys and monitoring programs, and the killing of all migratory birds. *Response:* Our long-term objectives continue to include providing opportunities to harvest portions of certain migratory game bird populations and limit harvest to levels compatible with each population's ability to maintain healthy, viable numbers. Our surveys are integral parts of the Service's monitoring programs that provide the information we need to ensure harvest levels are commensurate with current status of migratory game bird populations and long-term population goals.

Five comments stated that there was no biological basis or scientific evidence to warrant any type of nontoxic shot regulations on mourning doves.

Response: This proposed information collection request does not presume anything one way or another about the quality or quantity of the scientific evidence for or against the use of lead shot for dove hunting. We simply express concern about the issue and recognize hunters are an important constituency. The whole purpose of this information collection is to better understand the hunting constituency.

One comment requested that we be objective in any future decision regarding the implementation of any nontoxic shot regulations. *Response:* We have a long history of making informed decisions based on the best available science to ensure protection of migratory birds for future generations. If any future decisions regarding the implementation of nontoxic shot regulations for migratory birds are deemed necessary, they will be objective, based on the best available science, and follow all guidelines under the National Environmental Protection Act.

Two comments requested that we consider banning the use of lead shot for mourning doves and other wildlife species. *Response:* Again, we do not presume anything one way or another about the quality or quantity of the scientific evidence for or against the use of lead shot for dove hunting. Furthermore, we are not assuming that future nontoxic regulations will be necessary or inevitable.

We again invite comments concerning this information collection on:

- Whether or not the collection of information is necessary, including whether or not the information will have practical utility;

- The accuracy of our estimate of the burden for this collection of information;

- Ways to enhance the quality, utility, and clarity of the information to be collected; and

- Ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask OMB in your comment to withhold your personal identifying information from public review, we cannot guarantee that it will be done.

Dated: September 21, 2011.

SUPPLEMENTARY INFORMATION:

I. *Abstract.* We collect information on FWS Form 3-2349 (Alaska Guide Service Evaluation) to help us evaluate commercial guide services on our national wildlife refuges in the State of Alaska (State). The National Wildlife Refuge Administration Act of 1966, as amended (16 U.S.C. 668dd-ee), authorizes us to permit uses, including commercial visitor services, on national wildlife refuges when we find the activity to be compatible with the purposes for which the refuge was established. With the objective of making available a variety of quality visitor services for wildlife-dependent recreation on National Wildlife Refuge System lands, we issue permits for commercial guide services, including big game hunting, sport fishing, wildlife viewing, river trips, and other guided activities. We use FWS Form 3-2349 as a method to:

(1) Monitor the quality of services provided by commercial guides.

(2) Gauge client satisfaction with the services.

(3) Assess the impacts of the activity on refuge resources.

The client is the best source of information on the quality of commercial guiding services. We collect:

(1) Client name.

(2) Guide name(s).

(3) Type of guided activity.

(4) Dates and location of guided activity.

(5) Information on the services received such as the client's expectations, safety, environmental
