DEPARTMENT OF LABOR**Bureau of Labor Statistics****Proposed Collection, Comment Request**

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the

Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c) (2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed extension of the "Local Area Unemployment Statistics (LAUS) Program." A copy of the proposed information collection request (ICR) can be obtained by contacting the individual listed below in the **ADDRESSES** section of this notice.

DATES: Written comments must be submitted to the office listed in the **ADDRESSES** section of this notice on or before November 28, 2011.

ADDRESSES: Send comments to Carol Rowan, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 4080, 2 Massachusetts Avenue, NE., Washington, DC 20212. Written comments also may be transmitted by fax to 202-691-5111 (this is not a toll free number).

FOR FURTHER INFORMATION CONTACT: Carol Rowan, BLS Clearance Officer, at 202-691-7628 (this is not a toll free number). (See **ADDRESSES** section.)

SUPPLEMENTARY INFORMATION:**I. Background**

The BLS has been charged by Congress (29 U.S.C. Sections 1 and 2) with the responsibility of collecting and publishing monthly information on employment, the average wage received, and the hours worked by area and industry. The process for developing residency-based employment and unemployment estimates is a cooperative Federal-State program which uses employment and unemployment inputs available in State Workforce Agencies.

The labor force estimates developed and issued in this program are used for economic analysis and as a tool in the implementation of Federal economic policy in such areas as employment and economic development under the Workforce Investment Act and the Public Works and Economic Development Act, among others.

The estimates also are used in economic analysis by public agencies and private industry, and for State and area funding allocations and eligibility determinations according to legal and administrative requirements. Implementation of current policy and legislative authorities could not be

accomplished without collection of the data.

The reports and manual covered by this request are integral parts of the LAUS program insofar as they insure and measure the timeliness, quality, consistency, and adherence to program directions of the LAUS estimates and related research.

II. Current Action

Office of Management and Budget clearance is being sought for an extension of the information collection request that makes up the LAUS program. All aspects of the information collection are conducted electronically. All data are entered directly into BLS-provided systems.

The BLS, as part of its responsibility to develop concepts and methods by which States prepare estimates under the LAUS program, developed a manual for use by the States. The manual explains the conceptual framework for

the State and area estimates of employment and unemployment, specifies the procedures to be used, provides input information, and discusses the theoretical and empirical basis for each procedure. This manual is updated on a regular schedule. The LAUS program implemented a major program redesign in January 2005. The Redesign was announced in the **Federal Register** on November 8, 2004.

III. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used.

- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Type of Review: Extension without change of a currently approved collection.
