Federal Communications Commission

47 CFR Parts 0, 1 and 76
Leased Commercial Access; Development of Competition and Diversity in Video Programming Distribution and Carriage; Revision of the Commission's Program Carriage Rules; Final Rule and Proposed Rule
SUMMARY: In 1993, the Federal Communications Commission (FCC) adopted rules pertaining to carriage of video programming by multichannel video programming distributors (“MVPDs”), known as the “program carriage rules.” The rules are intended to benefit consumers by promoting competition and diversity in the video programming and video distribution markets. In this document, the FCC amends these rules to improve the procedures for addressing complaints alleging violations of the program carriage rules.

DATES: Effective October 31, 2011, except for §§ 1.221(b), 1.229(b)(3), 1.229(b)(4), 1.248(a), 1.248(b), 76.7(g)(2), 76.1302(c)(1), 76.1302(d), 76.1302(e)(1), and 76.1302(k), which contain information collection requirements that are not effective until approved by the Office of Management and Budget. The FCC will publish a document in the Federal Register announcing the effective date for those sections.

FOR FURTHER INFORMATION CONTACT: For additional information on this proceeding, contact David Konczal, David.Konczal@fcc.gov, of the Media Bureau, Policy Division, (202) 418–2120. For additional information concerning the Paperwork Reduction Act information collection requirements contained in this document, contact Cathy Williams at 202–418–2918, or via the Internet at PRA@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission’s Second Report and Order, FCC 11–119, adopted on July 29, 2011 and released on August 1, 2011. The full text of this document is available for public inspection and copying during regular business hours in the FCC Reference Center, Federal Communications Commission, 445 12th Street, SW., Room CY–B402, Washington, DC 20554. This document will also be available in ASCII, Word 97, and/or Adobe Acrobat. The complete text may be purchased from the Commission’s copy contractor, 445 12th Street, SW., Room CY–B402, Washington, DC 20554. To request this document in accessible formats (computer diskettes, large print, audio recording, and Braille), send an e-mail to fcc504@fcc.gov or call the Commission’s Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

Paperwork Reduction Act of 1995 Analysis

This document adopts new or revised information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13 (44 U.S.C. 3501–3520). The requirements will be submitted to the Office of Management and Budget (OMB) for review under section 3507 of the PRA. The Commission will publish a separate notice in the Federal Register inviting comment on the new or revised information collection requirements adopted in this document. The requirements will not go into effect until OMB has approved it and the Commission has published a notice announcing the effective date of the information collection requirements. In addition, we note that pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), we previously sought specific comment on how the Commission might “further reduce the information collection burden for small business concerns with fewer than 25 employees.” In this present document, we have assessed the potential effects of the proposed policy changes with regard to information collection burdens on small business concerns, and find that these requirements will benefit many companies with fewer than 25 employees by promoting the fair and expeditious resolution of program access complaints. In addition, we have described impacts that might affect small businesses, which includes most businesses with fewer than 25 employees, in the Final Regulatory Flexibility Analysis ("FRFA") below.

Summary of the Second Report and Order

1. In 1993, the Commission adopted rules implementing a provision of the 1992 Cable Act pertaining to carriage of video programming by multichannel video programming distributors (“MVPDs”) intended to benefit consumers by promoting competition and diversity in the video programming and video distribution markets (the "program carriage" rules). As required by Congress, these rules allow for the filing of complaints with the Commission alleging that an MVPD has (i) Required a financial interest in a video programming vendor’s program service as a condition for carriage; (ii) coerced a video programming vendor to provide, or retaliated against a vendor for failing to provide, exclusive rights as a condition of carriage; or (iii) unreasonably restrained the ability of an unaffiliated video programming vendor to compete fairly by discriminating in video programming distribution on the basis of affiliation or nonaffiliation of vendors in the selection, terms, or conditions for carriage. Congress specifically directed the Commission to provide for “expedited review” of these complaints and to provide for appropriate penalties and remedies for any violations. Programming vendors have complained that the Commission’s procedures for addressing program carriage complaints have hindered the filing of legitimate complaints and have failed to provide for the expedited review envisioned by Congress.

2. In this Second Report and Order in MB Docket No. 07–42, we take initial steps to improve our procedures for addressing program carriage complaints by:

   4 The new procedures adopted in the Second Report and Order do not apply to program carriage complaints that are currently pending or to program carriage complaints that are filed before the
Codifying in our rules what a program carriage complainant must demonstrate in its complaint to establish a prima facie case of a program carriage violation;

Providing the defendant with 60 days (rather than the current 30 days) to file an answer to a program carriage complaint;

Establishing deadlines for action by the Media Bureau and Administrative Law Judges ("ALJ") when acting on program carriage complaints; and

Establishing procedures for the Media Bureau's consideration of requests for a temporary standstill of the price, terms, and other conditions of an existing programming contract by a program carriage complainant seeking renewal of such a contract.

3. In the Notice of Proposed Rulemaking in MB Docket No. 11–131, we seek comment on the following proposed revisions to or clarifications of our program carriage rules, which are intended to further improve our procedures and to advance the goals of the program carriage statute:

Modifying the program carriage statute of limitations to provide that a complaint must be filed within one year of the act that allegedly violated the rules;

Revising discovery procedures for program carriage complaint proceedings in which the Media Bureau rules on the merits of the complaint after discovery is conducted, including expanded discovery procedures (also known as party-to-party discovery) and an automatic document production process, to ensure fairness to all parties while also ensuring compliance with the expedited resolution deadlines adopted in the Second Report and Order in MB Docket No. 07–42;

Permitting the award of damages in program carriage cases;

Providing the Media Bureau or ALJ with the discretion to order parties to submit their best "final offer" for the rates, terms, and conditions for the programming at issue in a complaint proceeding to assist in crafting a remedy;

Clarifying the rule that delays the effectiveness of a mandatory carriage remedy until it is upheld by the Commission on review, including codifying a requirement that the defendant MVPD must make an evidentiary showing to the Media Bureau or an ALJ as to whether a mandatory carriage remedy would result in deletion of other programming;

Codifying in our rules that retaliation by an MVPD against a programming vendor for filing a program carriage complaint is actionable as a potential form of discrimination on the basis of affiliation and adopting other measures to address retaliation;

Adopting a rule that requires a vertically integrated MVPD to negotiate in good faith with an unaffiliated programming vendor with respect to video programming that is similarly situated to video programming affiliated with the MVPD;

Clarifying that the discrimination provision precludes a vertically integrated MVPD from discriminating on the basis of a programming vendor's lack of affiliation with another MVPD; and

Codifying in our rules which party bears the burden of proof in program carriage discrimination cases.

We also invite commenters to suggest any other changes to our program carriage rules that would improve our procedures and promote the goals of the program carriage statute.

II. Background

4. In the 1992 Cable Act, Congress sought to promote competition and diversity in the video distribution market as well as in the market for video programming carried by cable operators and other MVPDs. Congress expressed concern that the market power held by cable operators would adversely impact programming vendors, noting that "programmers are sometimes required to give cable operators an exclusive right to carry the programming, a financial interest, or some other added consideration as a condition of carriage on the cable system." Congress also explained that increased vertical integration in the cable industry could harm programming vendors because it gives cable operators "the incentive and ability to favor their affiliated programmers." Congress concluded that this harm to programming vendors could adversely affect both competition and diversity in the video programming market, as well as hinder competition in the video distribution market.

5. To address these concerns, Congress passed section 616 of the Communications Act of 1993, as amended (the "Act"), which directs the Commission to establish regulations governing program carriage agreements and related practices between cable operators and MVPDs in order to promote competition and diversity in the video programming market.

6. In the 1992 Cable Act, Congress intended to promote competition in the video distribution market by ensuring that MVPDs have the incentive and ability to favor affiliated programming services over unaffiliated programming services with regard to price, channel positioning, and promotion.

7. See S. Rep. No. 102–92 (1991), at 25, reprinted in 1992 U.S.C.C.A.N. 1133, 1158 ("vertical integration gives cable operators the incentive and ability to favor their affiliated programming services"); see id. ("For example, the cable operator might give its affiliated programmer a more desirable channel position than another programmer, or even refuse to carry other programmers."); H.R. Rep. No. 102–628 (1992), at 41 ("Submissions to the Committee indicate that some cable operators favor programming services in which they have an interest, denying system access to programmers affiliated with rival MSOs and discriminating against rival programming services with regard to price, channel positioning, and promotion.").

8. See H.R. Rep. No. 102–92 (1991), at 25–26, reprinted in 1992 U.S.C.C.A.N. 1133, 1158–59 ("Because of the trend toward vertical integration, cable operators now have a clear vested interest in the competitive success of some of the programming services seeking access through their conduit."); H.R. Rep. No. 102–628 (1992), at 41 ("The Committee received testimony that vertically integrated operators have impeded the creation of new programming services by refusing or threatening to refuse to carry such services that would compete with their existing programming services."); see also 47 U.S.C. 536(a)(3) (requiring the Commission to adopt regulations prohibiting discrimination on the basis of affiliation that has "the effect of * * * unreasonably restraining the ability of an unaffiliated video programming vendor to compete fairly"); 1993 Program Carriage Order, 9 FCC Rcd at 2643, para. 2 ("Congress concluded that vertically integrated cable operators have the incentive and ability to favor affiliated programmers over unaffiliated programmers with respect to granting carriage on their systems, and nonaffiliated cable operators or programmers that compete with the vertically integrated entities may suffer harm to the extent that they do not receive such favorable terms.").

9. See H.R. Rep. No. 102–628 (1992), at 41 ("The Committee received testimony that vertically integrated companies reduce diversity in programming by threatening the viability of rival cable programming services.").

In addition to promoting competition and diversity in the video programming market, the Commission has explained that the program carriage provision of the 1992 Cable Act is also intended to promote competition in the video distribution market by ensuring that MVPDs have access to programming. See 1994 Program Carriage Order, 9 FCC Rcd at 4419, para. 28 ("In passing section 616, Congress was concerned with the effect a cable operator's market power would have both on programmers and on competing MVPDs").
operators or other MVPDs and video programming vendors. 10 Congress mandated that these regulations shall include provisions prohibiting a cable operator or other MVPD from engaging in three types of conduct: (i) "Requiring a financial interest in a program service as a condition for carriage on one or more of such operator's systems" (the "financial interest" provision); (ii) "coercing a video programming vendor to provide, and from retaliating against such a vendor for failing to provide, exclusive rights against other MVPDs as a condition of carriage on a system" (the "exclusivity" provision); and (iii) "engaging in conduct the effect of which is to unreasonably restrain the ability of an unaffiliated video programming vendor to compete fairly by discriminating in video programming distribution on the basis of affiliation or nonaffiliation of vendors in the selection, terms, or conditions for carriage of video programming provided by such vendors" (the "discrimination" provision). Section 616 also directs the Commission to (i) "Provide for expedited review of any complaints made by a video programming vendor pursuant to" section 616; (ii) "provide for appropriate penalties and remedies for violations of [section 616], including carriage"; and (iii) "provide penalties to be assessed against any person filing a frivolous complaint pursuant to" section 616.

6. In the 1993 Program Carriage Order, the Commission implemented section 616 by adopting procedures for the review of program carriage complaints as well as penalties and remedies. In doing so, the Commission explained that its rules were intended to prohibit the activities specified by Congress mandatorily interjecting with legitimate negotiating practices between MVPDs and programming vendors. The Commission's procedures generally provide for resolution of a program carriage complaint in one of four ways: (i) If the Media Bureau determines that the complainant has not made a prima facie showing but the record is not sufficient to resolve the complaint, the Media Bureau will outline procedures for discovery before proceeding to rule on the merits of the complaint; and (iv) if the Media Bureau determines that the complainant has made a prima facie showing but the disposition of the complaint or discrete issues raised in the complaint will require resolution of factual disputes in an adjudicatory hearing or extensive discovery, the Media Bureau will refer the proceeding or discrete issues proceeding in the proceeding for an adjudicatory hearing before an ALJ. The Commission decided that appropriate relief for violations of the program carriage rules would be determined on a case-by-case basis, and could include forfeitures, mandatory carriage, or carriage terms revised or specified by the Commission.11

7. In June 2007, the Commission released the Program Carriage NPRM seeking comment on revisions to the Commission's program carriage rules and complaint procedures. The Commission sought comment on whether and how the processes for resolving program carriage complaints should be modified; whether the elements of a prima facie case should be clarified; whether the deadline for resolving the program carriage complaint at issue in the MASN I HDO or a similar deadline should apply to all program carriage complaints; and whether additional rules are necessary to protect programming vendors from potential retaliation for filing a program carriage complaint.

III. Second Report and Order in MB Docket No. 07–42

8. As discussed below, the record reflects that our current program carriage procedures are ineffective and in need of reform.12 Among other concerns, programming vendors and other commenters cite uncertainty concerning the evidence a complainant must provide to establish a prima facie case, unpredictable delays in the

---

10 47 U.S.C. 536. A "video programming vendor" is defined as "a person engaged in the production, creation, or wholesale distribution of video programming for sale." 47 U.S.C. 536(b).

11 See 1993 Program Carriage Order, 9 FCC Rcd at 2853, para. 28. Eleven program carriage complaints have been filed in the approximately two decades since Congress passed section 616 in the 1992 Cable Act, two of which are currently pending before an ALJ or the Media Bureau. See The Tennis Channel Inc. v. Comcast Cable Communications, LLC, Hearing Designation Order and Notice of Opportunity for Forfeiture, 25 FCC Rcd 14149 (MB 2010) ("Tennis Channel HDO"); Bloomberg, L.P. v. Comcast Cable Communications, LLC, MB Docket No. 11–104 (filed June 13, 2011). In addition, the Commission has resolved on the merits a program carriage claim arising through the program carriage arbitration condition applicable to Regional Sports Networks ("RSNs") by adopting a "adjudica Order. See TCR Sports Broadcasting Holding, L.L.P., d/b/a Mid-Atlantic Sports Network v. Time Warner Cable Inc., Order on Review, 23 FCC Rcd 15783 (MB 2008), Order on Review, 25 FCC Rcd 18099 (MB 2010) ("MASN v. Time Warner Cable").

12 See Ex Parte Reply Comments of HDNet [June 2, 2010] at 6 ("A right without an effective remedy is like having no right at all.") MVPDs or independent programmers have reason to think that a possible statutory violation will be redressed by the FCC in a timely and effective manner.

Dortch, Secretary, FCC, MB Docket No. 07–42 (July 22, 2008) "HDNet July 22, 2008 Ex Parte Letter") (attaching Letter from U.S. Sen. Herb Kohl to Kevin J. Martin, Chairman, FCC (June 23, 2008) at 2 (urging the Commission "to strengthen the program carriage rules and to simplify and make more efficient the process by which program carriage complaints are adjudicated"); id. (attaching Letter from U.S. Reps. Gene Green, Mike Doyle, and Darby, American Consumer Institute, to Marlene H. Dortch, Secretary, FCC, MB Docket No. 07–42 (June 30, 2008) at 1–2 ("The current complaint process is not as efficient as it could be * * *"). [We urge you to provide a more efficient and streamlined complaint process * * *").]
Commission’s resolution of complaints, and fear of retaliation as impeding the filing of legitimate program carriage complaints. While MVPDs contend that the limited number of program carriage complaints filed to date demonstrates that the current procedures are working and that rule changes are not necessary, programming vendors contend that the lack of complaints is a direct result of our inadequate procedures, not a lack of program carriage claims. As discussed below, we take initial steps to improve these procedures by: (i) Codifying in our rules what a program carriage claimant must demonstrate in its complaint to establish a prima facie case of a program carriage violation; (ii) providing the defendant with 60 days (rather than the current 30 days) to file an answer to a program carriage complaint; (iii) establishing deadlines for action by the Media Bureau and an ALJ when acting on program carriage complaints; and (iv) establishing procedures for the Commission’s consideration of requests for a temporary standstill of the price, terms, and other conditions of an existing programming contract by a program carriage claimant seeking renewal of such a contract.

A. Prima Facie Case

9. In the 1993 Program Carriage Order, the Commission described the evidence a program carriage claimant must provide in its complaint to establish a prima facie case. Among other things, the Commission stated that the “complaint must be supported by documentary evidence of the alleged violation, or by an affidavit (signed by an authorized representative or agent of the complaining programming vendor) setting forth the basis for the complainant’s allegations.” The Commission also emphasized that the complaint “may not merely reflect conjecture or allegations based only on information and belief.” The record reflects that programming vendors are unclear as to what evidence must be provided in a complaint to meet the prima facie requirement. The National Association of Independent Networks (“NAIN”), for example, notes that our rules do not contain a definition of what constitutes a prima facie case and that this lack of clarity impedes programming vendors from asserting their program carriage rights through the complaints process.

10. While one commenter notes that the prima facie step is not required by the statute and urges the Commission to eliminate this step entirely, we believe that retaining this requirement is important to dispose promptly of frivolous complaints and to ensure that only legitimate complaints proceed to further evidentiary proceedings. We agree, however, that clarifying what is required to establish a prima facie case and codifying these requirements in our rules will help to reduce uncertainty regarding the prima facie requirement. In the following paragraphs, we clarify the requirements for establishing a prima facie case.

11. As an initial matter, all complaints alleging a violation of any of the program carriage rules (i.e., the financial interest, exclusivity, or discrimination provisions) must contain evidence that (i) the complainant is a video programming vendor as defined in § 76.1300(e) of the Commission’s rules or an MVPD as defined in section 612(b) of the Act and § 76.1300(d) of the Commission’s rules; and (ii) the defendant is an MVPD as defined in section 612(3) of the Act and § 76.1300(d) of the Commission’s rules. We note that, as originally adopted in the 1993 Program Carriage Order, the Commission’s rules provided that a complaint must contain the “address and telephone number of the

---

14 See Letter from Jonathan D. Blake, Counsel for the National Football League, to Marlene H. Dortch, Secretary, FCC, MB Docket No. 07–42 (May 2, 2008) at 1 (“NAMAC May 2, 2008 Ex Parte Letter.”).
15 See Letter from Stephen A. Weisswasser, Counsel for the Hallmark Channel, to Marlene H. Dortch, Secretary, FCC, MB Docket No. 07–42 (Nov. 6, 2007) at 1–2 (“The absence of complaints under the existing program carriage regime is not evidence of lack of discrimination, but, to the contrary, a reflection of the difficulties presented to independents by the high burdens of going forward under the existing rules and the prospects for retaliation by MVPDs.”) (“Hallmark Channel Nov. 6, 2007 Ex Parte Letter”); see also BTNC Comments at 4 (citing fear of retaliation, unpredictable cost and delay, and uncertainty regarding evidence required and adequacy of relief as reasons for why few program carriage complaints have been filed to date); Hallmark Channel Reply at 11 (“It simply is not the case that independent programmers have experienced discrimination during the time the rules have been in effect. The reality is that programmers do not bring complaints under the existing regime because of their high burden of proof with respect to predatory practices, the difficulty of fashioning meaningful resolutions, and the fear of retribution, not because discrimination does not, in fact, occur.”).
complainant, the type of multichannel video programming distributor that describes the defendant, and the address and telephone number of the defendant.” In 1999, the Commission reorganized the part 76 pleading and complaint process rules and, in the course of doing so, amended this rule to require the complaint to contain the “type of multichannel video programming distributor that describes complainant, the address and telephone number of the complainant, and the address and telephone number of each defendant.” We find this revised language confusing because it fails to reflect that a program carriage complainant can be either an MVPD or a video programming vendor. We amend this rule to clarify that the complaint must specify “whether the complainant is a multichannel video programming distributor or video programming vendor, and, in the case of a multichannel video programming distributor, identify the type of multichannel video programming distributor, the address and telephone number of the complainant, what type of multichannel video programming distributor the defendant is, and the address and telephone number of each defendant.”

12. Evidence supporting a program carriage claim may be based on an explicit or implicit threat. In complaints alleging a violation of the exclusivity or financial interest provisions, the complaint must contain direct evidence (either documentary or testimonial) supporting the facts underlying the claim. For example, a complainant alleging that an MVPD has coerced a programming vendor to grant exclusivity negotiations detailing the facts supporting a claim that a representative of the defendant MVPD informed the vendor that the MVPD took an adverse carriage action because the vendor is not affiliated with the MVPD will generally be sufficient to establish this element of a prima facie case. Again, however, we recognize that such direct evidence of affiliation-based discrimination will seldom be available to complainants and is not required to establish this element of a prima facie case. 14. Because it is unlikely that direct evidence of a discriminatory motive will be available to potential complainants, we clarify that a complainant can establish this element of a prima facie case of a violation of the program carriage discrimination provision by providing the following circumstantial evidence of discrimination “on the basis of affiliation or non-affiliation.” First, the complaining programming vendor must prove evidence that it provides video programming that is similarly situated to video programming provided by a programming vendor affiliated with the defendant MVPD, based on a combination of factors, such as genre, ratings, license fee, target audience, target advertisers, target programming, and other factors. We emphasize that a finding at the prima facie stage that affiliated and unaffiliated video programming is similarly situated should be based on examination of a combination of factors put forth by the complainant. Although no single factor is necessarily dispositive, the more factors that are found to be similar, the more likely the programming in question will be considered similarly situated to the affiliated programming. On the other hand, it is unlikely that programming would be considered “similarly situated” if only one of these factors is found to be similar. For example, a complainant is unlikely to establish a prima facie case of

22 See 1993 Program Carriage Order, 9 FCC Rcd at 2650, paras. 18 (“We reject TCI’s suggestion that we should reject the concept of explicit threats, because we believe that actual threats may not always comprise a necessary condition for a finding of coercion. Requiring such evidence would establish an unreasonable high burden of proof that could undermine the intent of section 616 by allowing multichannel distributors to engage in bad faith negotiations that apparently would not violate the statute and our regulations simply because explicit threats were not made during such negotiations. In contrast, we believe that section 616(a)(2) was intended to prohibit implicit as well as explicit behavior that amounts to ‘coercion.’”).

23 In the 1993 Program Carriage Order, the Commission interpreted the exclusivity and financial interest provisions in section 616(a)(3) to require a complainant alleging discrimination that favors an “affiliated” programming vendor to provide evidence that the defendant MVPD has an attributable interest in the allegedly favored “affiliated” programming vendor. See 1993 Program Carriage Order, 9 FCC Rcd at 2654, para. 29 (“For complaints alleging discrimination that favors ‘affiliated’ programming vendors, the complainant must provide evidence that the defendant has an attributable interest in the allegedly favored programming vendor, as set forth in § 76.1300(a).”); see also 47 CFR 76.1300(a) (“For purposes of this subpart, entities are affiliated if either entity has an attributable interest in the other or if a third party has an attributable interest in both entities.”); Review of the Commission’s Cable Attribution Rules, Report and Order, 14 FCC Rcd 19014, 19063, paras. 132 n.225, 134 n.247 (1999) (amending definition of “affiliated” in the program carriage rules to be consistent with definition of this term in other cable rules); but see Memorandum Opinion and Order, 18 FCC Rcd No. 11–131, paras. 72–77 (seeking comment on whether to interpret the discrimination provision in section 616(a)(3) more broadly to preclude a vertically integrated MVPD from discriminating on the basis of a programming vendor’s lack of affiliation with another MVPD).

24 By “target programming,” we refer to programming rights that a video programming vendor seeks to acquire to display on its network.

discrimination on the basis of affiliation by demonstrating that the defendant MVPD carries an affiliated music channel targeted to younger viewers but has declined to carry an unaffiliated music channel targeted to older viewers with lower ratings and a higher license fee. Second, the complaint must contain evidence that the defendant MVPD has treated the video programming provided by the complainant programming vendor differently than the similarly situated video programming provided by the programming vendor affiliated with the defendant MVPD with respect to the selection, terms, or conditions for carriage. In the absence of direct evidence supporting the claim that the defendant MVPD discriminated “on the basis of affiliation or non-affiliation,” the circumstantial evidence discussed here will establish this element of a prima facie case of a violation of the program carriage discrimination provision.

15. In addition, we note that the program carriage discrimination provision only conducts that has “the effect of * * * unreasonably restraining[ing] the ability of an unaffiliated video programming vendor to compete fairly.” Thus, regardless of whether the complainant relies on direct or circumstantial evidence of discrimination “on the basis of affiliation or non-affiliation,” the complaint must also contain evidence that the defendant MVPD’s conduct has the effect of unreasonably restraining the ability of the complainant programming vendor to compete fairly.24

16. We emphasize that a Media Bureau finding that a complainant has established a prima facie case does not mean that the complainant has proven its case or any elements of its case on the merits. Rather, a prima facie finding means that the complainant has provided sufficient evidence in its complaint, without the Media Bureau having considered any evidence to the contrary, to proceed. If the complainant establishes a prima facie case but the record is not sufficient to resolve the complaint, the adjudicator (i.e., either the Media Bureau or an ALJ) will allow the parties to engage in discovery30 and will then conduct a de novo examination of all relevant evidence on each factual and legal issue. For example, although the Media Bureau may find that a complaint contains sufficient evidence to establish a prima facie case that a defendant MVPD’s conduct has the effect of unreasonably restraining the ability of the complainant programming vendor to compete fairly, thus allowing the case to proceed, the adjudicator when ruling on the merits may reach an opposite conclusion after conducting further proceedings and developing a more complete evidentiary record.31

17. We also clarify that the Media Bureau’s determination of whether a complainant has established a prima facie case is based on a review of the complaint (including any attachments) only. If the Media Bureau determines that the complainant has established a prima facie case, the Media Bureau will then review the answer (including any attachments) and reply to determine whether there are procedural defenses that might warrant dismissal of the case (e.g., arguments pertaining to the statute of limitations); whether there are any issues that the defendant MVPD concedes; whether there are substantial and material questions of fact as to whether the defendant MVPD has engaged in conduct that violates the program carriage rules; whether the case can be addressed by the Media Bureau on the merits based on the pleadings or whether further evidentiary proceedings are necessary; and whether the proceeding should be referred to an ALJ in light of the nature of the factual disputes. For example, if the Media Bureau determines that the complainant has established a prima facie case but the defendant MVPD provides legitimate and non-discriminatory business reasons in its answer for its adverse carriage decision, the Media Bureau might conclude that there are substantial and material questions of fact that warrant allowing the parties to engage in discovery or referring the matter to an ALJ for an adjudicatory hearing, or it might conclude that the complaint can be resolved on the merits based on the pleadings.

B. Deadline for Defendant’s Answer to a Program Carriage Complaint

18. Our current rule provides that an MVPD served with a program carriage complaint shall answer the complaint within 30 days of service. We amend this rule to provide an MVPD with 60 days to answer a program carriage complaint.32 Having established specific evidentiary requirements for what the complainant must provide in its case based on the pleadings and refrain from referring those specific issues for further evidentiary proceedings. For example, to the extent that the parties concede that the complainant is a video programming vendor and the defendant is an MVPD, further evidentiary proceedings on these issues are unnecessary.

30 See Letter from Ryan G. Wallach, Counsel for Comcast, to Marlene H. Dortch, Secretary, FCC, MB Docket No. 07–42 (Dec. 10, 2008), Attachment at 2 (urging the Commission to allow defendants 60 days to file an answer); Letter from Arthur H. Harding, Counsel for Time Warner Cable, to Marlene H. Dortch, Secretary, FCC, MB Docket No. 07–42 (June 1, 2011), at 2 (stating that a program carriage defendant needs a full and fair opportunity to respond to a complaint) (“Time Warner Cable June 1, 2011 Ex Parte Letter”).
complaint to establish a **prima facie** case of a program carriage violation, we believe it is appropriate to provide the defendant with additional time to answer the complaint in order to develop a full, case-specific response, with supporting evidence, to the evidence put forth by the complainant. As discussed in the next section, Congress directed the Commission to “provide for expedited review” of program carriage complaints, and we adopt deadlines herein for the Media Bureau and ALJs when acting on program carriage complaints to satisfy this requirement. Providing additional time for a defendant to file an Answer to a complaint does not conflict with this requirement. By requiring a complainant to provide specific evidence in its complaint and providing a defendant with additional time to respond to this evidence and provide specific evidence supporting its response, the rules we adopt today will allow for the development of a more robust factual record earlier in the complaint process than under our current rules. We believe that this will better enable the Media Bureau to either resolve cases on the merits based on the pleadings without referring the matter to an ALJ or refer factual issues in dispute that warrant discovery or referral to an ALJ. As a result, this will lead to the more expeditious resolution of disputes than under other current program carriage complaint procedures.

G. Deadlines for Media Bureau and ALJ Decisions

19. The record reflects that the unpredictable and sometimes lengthy time frames for Commission action on program carriage complaints have discouraged programming vendors from filing complaints. Both programming vendors and MVPDs support expedient action on program carriage complaints. We believe that establishing deadlines for the Media Bureau and ALJs when acting on program carriage complaints will help to resolve disputes quickly and efficiently and thus fulfill our statutory mandate to “provide for expedited review” of program carriage complaints. While the Commission in the 1993 Program Carriage Order directed both the Media Bureau and ALJs to resolve cases “expeditiously,” we now conclude that a specific deadline codified in our rules is needed to ensure that this goal is achieved.

20. Action on program carriage complaints entails a two-step process: The initial **prima facie** determination by the Media Bureau, followed (if necessary) by a decision on the merits by an adjudicator (i.e., either the Media Bureau or an ALJ). We adopt deadlines herein for both of these steps. For the first step, we direct the Media Bureau to release a decision determining whether the complainant has established a **prima facie** case within 60 calendar days after the complainant’s reply to the defendant’s answer (the date on which the reply would be due if none is filed).

Based on our past experience in addressing program carriage complaints, we believe that 60 calendar days after the complainant files its reply provides sufficient time for the Media Bureau to make a **prima facie** determination while providing for the “expedited review” required by Congress. In light of this expedited timeframe for the Media Bureau’s **prima facie** determination, we again emphasize that complainants should not raise new matters in a reply and that additional pleadings outside of the pleading cycle will not be accepted.

21. For the second step, we impose different deadlines for a ruling on the merits of the complaint depending upon whether the adjudicator is the Media Bureau or an ALJ. After the Media Bureau concludes that the complaint contains sufficient evidence to establish a **prima facie** case, the Media Bureau has three options for addressing the merits of the complaint: (i) The Media Bureau can rule on the merits of the complaint based on the pleadings without discovery; (ii) if the Media Bureau determines that the record is not sufficient to resolve the complaint, the Media Bureau may outline procedures for discovery before proceeding to rule on the merits of the complaint; or (iii) if the Media Bureau determines that disposition of the complaint or discrete issues raised in the complaint requires resolution of factual disputes or other extensive discovery in an adjudicatory proceeding, the Media Bureau will refer the proceeding or discrete issues arising in the proceeding for an adjudicatory to a complaint and a 20-calendar-day period for filing a reply to the answer. See 47 CFR 76.1302(e)(1), (ii). See 47 CFR 76.1302(e) (stating that a reply “shall be responsive to matters contained in the answer and shall not contain new matters”).

22. See 1993 Program Carriage Order, 9 FCC Rcd at 2652, para. 24 (“Given the statute’s explicit direction to the Commission to handle program carriage complaints expeditiously, additional pleadings will not be accepted or entertained unless specifically requested by the reviewing staff.”); see id. at 2654–55, para. 30 n.51 (“Unless specifically requested by the Commission or its staff, additional pleadings such as motions to dismiss or motions for summary judgment will not be considered. We intend to keep pleadings to a minimum to comply with the statutory directive for an expedited adjudicatory process.”) (emphasis in original).

23. See id. at 2652, para. 23 (“We hereby adopt a system that promotes resolution of as many cases as possible on the basis of a complaint, answer and reply.”); but see id. at 2652, para. 24 (“As a practical matter, however, given that alleged violations of section 616, especially those involving potentially ‘coercive’ practices, will require an evaluation of contested facts and behavior related to program carriage negotiations, we believe that the staff will be unable to resolve most program carriage complaints on the sole basis of a written record as described above. Rather, we anticipate that resolution of most program carriage complaints will require an administrative action on review of contested facts related to the parties’ specific negotiations.”).

24. Comments at 18; ION Dec. 11 2008 Ex Parte Letter, Attachment at 1; NAIN June 5 2008 Ex Parte Letter, Attachment at 1; HDNet July 22 2008 Ex Parte Letter (attaching Letter from U.S. Sen. Herb Kohl to Kevin J. Martin, Chairman, FCC (June 23, 2008) at 2 (“I urge that the FCC set a deadline by which program carriage complaints (by programmers) be decided in prompt and reasonable time * * * ‘’)); id. (attaching Letter from U.S. Sen. Byron L. Dorgan to Kevin J. Martin, Chairman, FCC (June 13, 2008) at 1 (“I urge that the FCC set a deadline by which program carriage complaints be decided on a ‘shot clock’ for consideration of forbearance petitions, in a separate area of programmatic discrimination, the Commission lacks any type of timeline.”)); id. (attaching Letter from U.S. Reps. Gene Green, Mike Doyle, and Charles Gonzalez to Kevin J. Martin, Chairman, FCC (June 30, 2008) at 2 (urging the Commission to adopt a ‘‘shot clock’’)).
hearing before an ALJ. We establish the following deadlines for the adjudicator’s decision on the merits. For complaints that the Media Bureau decides on the merits based on the pleadings without discovery, the Media Bureau must release a decision within 60 calendar days after its prima facie determination. We believe this timeframe is sufficient to allow the Media Bureau to review the record and draft and release a decision on the merits. For complaints that the Media Bureau decides on the merits after discovery is conducted, the Media Bureau must release a decision within 150 calendar days after its prima facie determination. We believe this timeframe is sufficient to allow for the entry of a protective order, discovery, and the submission of supplemental briefs and other information required by the Media Bureau, as well as for the Media Bureau to review the record and draft and release a decision on the merits. For complaints referred to an ALJ for a decision on the merits, we believe that a longer timeframe is warranted to allow for, among other things, the preparation for and conduct of a fair hearing, the submission of proposed findings of fact and conclusions of law, and the ALJ’s preparation of an initial decision and, if necessary, formulation of a remedy. Accordingly, we direct the ALJ to release an initial decision within 240 calendar days after one of the parties informs the Chief ALJ that it elects not to pursue ADR or, if the parties have mutually elected to pursue ADR, within 240 calendar days after the parties inform the Chief ALJ that they have failed to resolve their dispute through ADR. To the extent that the Media Bureau refers only discrete issues raised in the proceeding to the ALJ rather than the entire proceeding, we expect that the ALJ will be able to act in less than 240 calendar days. We note that the Commission has previously stated that “[t]ime limits on the ALJs are permissible so long as they do not unduly interfere with a judge’s independence to control the course of the proceeding * * * or subject the judge to performance appraisals.” We do not believe that the 240-calendar-day deadline adopted herein will unduly interfere with the ALJ’s independence, and this deadline will not be used for performance appraisals.

22. We amend certain procedural deadlines applicable to adjudicatory hearings to reflect that an adjudicatory hearing involving a program carriage complaint does not commence until a party elects not to pursue ADR pursuant to §76.7(g)(2) or, if the parties have mutually elected to pursue ADR, the parties fail to resolve their dispute through ADR. We also adopt expedited deadlines to account for the 240-calendar-day deadline for the ALJ’s initial decision. First, we revise the deadline for filing a written appearance in a program carriage matter referred to an ALJ. Section 1.221(c) of the Commission’s rules provides that a written appearance must be filed within 20 days of the mailing of the HDO. We amend this rule to provide that, in a program carriage complaint proceeding that the Media Bureau refers to an ALJ, a party must file a written appearance within five calendar days after the party informs the Chief ALJ that it elects not to pursue ADR or, if the parties have mutually elected to pursue ADR, within five calendar days after the parties inform the Chief ALJ that they have failed to resolve their dispute through ADR. Because the parties would have already been involved in a complaint proceeding before the Media Bureau resulting in the prima facie determination and will have had the opportunity to retain counsel for litigating the complaint before the Media Bureau, we believe that reducing the time for filing a written appearance in a program carriage matter referred to an ALJ from 20 to five days is reasonable. We also amend our rules to specify the consequences of failing to timely file a written appearance in a program carriage matter referred to an ALJ. If the complainant fails to file a written appearance by this deadline, or fails to file prior to the deadline either a petition to dismiss the proceeding without prejudice or a petition to accept, for good cause shown, a written appearance beyond such deadline, the Chief ALJ shall dismiss the complaint with prejudice for failure to prosecute. If the defendant fails to file a written appearance by this deadline, or fails to file prior to this deadline a petition to accept, for good cause shown, a written appearance beyond such deadline, its opportunity to present evidence at hearing will be deemed to have been waived. If the hearing is so waived, the Chief ALJ will terminate the proceeding and certify to the Commission the complaint for resolution based on the existing record. Second, we revise the deadline for filing a motion to enlarge, change, or delete issues. Section 1.229(a) provides that a motion to enlarge, change, or delete issues shall be filed within 15 days after the HDO is published in the Federal Register. We amend this rule to provide that, in a program carriage complaint proceeding that the Media Bureau refers to an ALJ, a motion to enlarge, change, or delete issues shall be filed within 15 calendar days after the deadline for filing a written notice of appearance. Third, we revise the deadline for holding an initial prehearing conference. Section 1.248 of the Commission’s rules provides that, to the extent an initial prehearing conference is scheduled, it shall be scheduled 30 days after the effective date of the HDO, unless good cause is shown for scheduling the conference at a later date. We amend this rule to provide that, to the extent the ALJ in a program carriage complaint proceeding conducts an initial prehearing conference, the conference shall be held no later than ten calendar days after the deadline for filing a written notice of appearance, or within such shorter or

43 See 1993 Program Carriage Order, 9 FCC Rcd at 2652, para. 24 and 2656, para. 34; see also 47 CFR 76.7(g)(1). In cases referred to an ALJ, the parties have ten days after the Media Bureau’s prima facie determination to elect whether to attempt to resolve their dispute through ADR. See 47 CFR 76.7(g)(2); see also 1993 Program Carriage Order, 9 FCC Rcd at 2652, para. 24 and 2656, para. 34.

44 § 76.7(g)(2) of the Commission’s rules currently states that a party must submit in writing to the Commission its election as to whether to proceed to ADR. See 47 CFR 76.7(g)(2). We amend this rule to further specify that this election must also be submitted with the Chief ALJ.
longer period as the ALJ may allow consistent with the public interest.\textsuperscript{46} 23. We believe that the deadlines established herein for a decision by the Media Bureau or an ALJ on a program carriage complaint provide sufficient time for the adjudicator to reach a decision on the merits while also providing for the “expedited review" required by Congress and ensuring fairness to all parties.\textsuperscript{47} We will allow the adjudicator to toll these deadlines only under certain circumstances. First, the adjudicator can toll a deadline if the parties jointly request tolling in order to pursue settlement discussions or ADR or for any other reason that the parties mutually agree justifies tolling.\textsuperscript{48} Second, the adjudicator may toll a deadline if complying with the deadline would violate the due process rights of a party or would be inconsistent with fundamental fairness. Finally, in extraordinary situations, tolling a deadline may be necessary in light of the adjudicatory resources available at the time in the Office of Administrative Law.\textsuperscript{49} The Commission has a number of alternatives under such circumstances to ensure expedited review, but a brief tolling of deadlines may be required in pending hearing cases. To the extent an ALJ decides to toll the deadline, we emphasize that this interlocutory decision will not be appealable to the Commission as a matter of right. Rather, pursuant to § 1.301(b) of the Commission’s rules, an appeal to the Commission of an ALJ’s decision to toll the deadline shall be filed only if allowed by the ALJ. To the extent the ALJ does not allow an appeal, or if no permission to file an appeal is requested, an objection to the ALJ’s decision to toll the deadline may be raised on review of the ALJ’s initial decision.

24. Taken together, the 80-calendar-day initial pleading cycle, the 60-calendar-day deadline for a prima facie determination, the 10-calendar-day ADR election period in cases referred to an ALJ, and the 150-calendar-day (in cases decided by the Media Bureau, depending on whether discovery is conducted) or 240-calendar-day (in cases decided by an ALJ) deadline for a ruling on the merits mean that program carriage complaints will be resolved within approximately seven or ten months (in cases decided by the Media Bureau, depending on whether discovery is conducted) or thirteen months (in cases decided by an ALJ) after a complaint is filed, assuming that the parties have not sought to toll the deadlines. While these timeframes are longer than our aspirational goals for resolving program access complaints,\textsuperscript{50} we believe these time frames are necessary given the often fact-intensive nature of program carriage claims, which will often focus on the details of the negotiation process and similarities and differences in programming.\textsuperscript{51}

D. Temporary Standstill of Existing Contract Pending Resolution of a Program Carriage Complaint

25. We establish specific procedures for the Media Bureau’s consideration of requests for a temporary standstill of the price, terms, and other conditions of an existing program carriage contract by a program carriage complainant seeking renewal of such a contract. The procedures we adopt herein mirror the procedures adopted previously for temporary standstills involving program access complaints.\textsuperscript{52} The record reflects that, absent a standstill, an MVPD will have the ability to retaliate against a programming vendor that files a legitimate complaint by ceasing carriage of the programming vendor’s video programming, thereby harming the programming vendor as well as viewers who have come to expect to be able to view that video programming.\textsuperscript{53} Moreover, absent a standstill, programming vendors may feel compelled to agree to the carriage demands of MVPDs, even if these demands violate the program carriage rules, in order to maintain carriage of video programming in which they have made substantial investments. While some MVPDs may offer month-to-month extensions after expiration of a carriage contract, programming vendors explain that such extensions may lead to uncertainty for viewers and programming vendors and impede the ability of programming vendors to attract financing.

26. The Supreme Court has affirmed the Commission’s authority to impose interim injunctive relief, in the form of a standstill order, pursuant to section 264 of the Communications Act.\textsuperscript{54} We note that the parties may commence discovery before the prehearing conference is held. See 47 CFR 1.311(c)(2).

\textsuperscript{46} We note that the parties may commence discovery before the prehearing conference is held. See 47 CFR 1.311(c)(2).

\textsuperscript{47} We note that the Commission in the 1993 Program Carriage Order rejected a 90-day deadline for resolution of program carriage complaints. See 1993 Program Carriage Order, 9 FCC Rcd at 2655, para. 32 n.52. We continue to believe that a 90-day deadline is impractical, but the longer deadlines established herein are realistic given our experience with program carriage cases since 1993. We also note that the Commission previously declined to adopt revised deadlines for resolving program access complaints, stating that “overly accelerated pleading and discovery time periods can lead to increased litigation costs if the parties are required to hire additional staff and counsel in attempting to meet unrealistic deadlines.” See Review of the Commission’s Program Access Rules and Examination of Programming Tying Arrangements, MB Docket No. 05–198, Report and Order, 22 FCC Rcd 17791, 17857, para. 108 (2007) (“2007 Program Access Order”). We find these concerns are not presented here because the deadlines we adopt for resolving program carriage complaints are not “overly accelerated” or unrealistic.

\textsuperscript{48} For example, if the parties jointly request to toll the Media Bureau’s 60-calendar-day deadline for reaching a prima facie determination to pursue settlement discussions or ADR, the Media Bureau will toll the deadline until the parties jointly inform the Media Bureau that efforts to resolve the dispute were unsuccessful. Similarly, if the parties jointly request to toll the deadline for reaching a decision on the merits, the adjudicator will toll the deadline until the parties jointly inform the adjudicator that efforts to resolve the dispute were unsuccessful.

\textsuperscript{49} See 2007 Program Access Order, 22 FCC Rcd at 17857, para. 108 (retaining goal of resolving program access complaints within five months from the submission of a complaint for denial of programming cases, and nine months for all other program access complaints, such as price discrimination cases).

\textsuperscript{50} See Comcast Comments at 31–33 (arguing that program carriage cases are more complex than program access cases).

\textsuperscript{51} See 47 CFR 76.1003(l); Review of the Commission’s Program Access Rules and Examination of Programming Tying Arrangements, First Report and Order, 25 FCC Rcd 746, 794–797, paras. 71–75 (2010) (“2010 Program Access Order”), vac’d in part, Cablevision Sys. Corp. v. FCC, 141 WL 2277217 (D.C. Cir. June 10, 2011). Comcast contends that the Commission “should be wary” of importing a standstill adopted for program access complaints into the program carriage context because, unlike the program access context where a network is under an obligation not to withhold the network from an MVPD, there is no duty to carry a network in the program carriage context. See Letter from David P. Murray, Counsel for Comcast, to Marlene H. Dortch, Secretary, FCC, MB Docket No. 07–42 (July 25, 2011), at 3 n.9 ("Comcast July 25 2011 Ex Parte Letter"). In fact, the Commission adopted a program access standstill requirement for both satellite-delivered and terrestrially delivered networks, despite the fact that a terrestrially delivered network is under no obligation to refrain from withholding the network from an MVPD in the absence of a Commission order. See 2010 Program Access Order, 25 FCC Rcd 794, para. 71. We also note that there are important parallels between the program access and program carriage regimes, inasmuch as both are based on concerns with the impact of vertical integration on competition in the video distribution and video programming markets. Moreover, Comcast ignores the fact that the program carriage regime may also impose a duty on an MVPD to carry a programming vendor if the MVPD otherwise refuses to do so on the basis of affiliation or non-affiliation.

\textsuperscript{52} See WealTV Aug. 4 2008 Ex Parte Letter (attaching Letter from U.S. Sen. Amy Klobuchar to Kevin J. Martin, Chairman, FCC (July 24, 2008) at 1 (“Independent programming providers continue to express concern that continued uncertainties and delays create a chilling effect on their willingness to bring discrimination complaints, because of their fear of potential retaliation by MVPDs which in turn may result in a programming provider being forced to Marlene H. Dortch, Secretary, FCC, MB Docket No. 07–42 (June 4, 2008) at 2.

\textsuperscript{53} See 2007 Program Access Order, 22 FCC Rcd at 17857, paras. 31–32 (establishing 60- or 150-calendar-day (in program carriage cases decided by the Media Bureau, depending on whether discovery is conducted) or thirteen months (in cases decided by an ALJ) deadline for a ruling on the merits mean that program carriage complaints will be resolved within approximately seven or ten months (in cases decided by the Media Bureau, depending on whether discovery is conducted) or thirteen months (in cases decided by an ALJ) after a complaint is filed, assuming that the parties have not sought to toll the deadlines. While these timeframes are longer than our aspirational goals for resolving program access complaints, we believe these time frames are necessary given the often fact-intensive nature of program carriage claims, which will often focus on the details of the negotiation process and similarities and differences in programming.

\textsuperscript{54} See 2007 Program Access Order, 22 FCC Rcd at 17857, para. 108 (retaining goal of resolving program access complaints within five months from the submission of a complaint for denial of programming cases, and nine months for all other program access complaints, such as price discrimination cases).

\textsuperscript{55} See Comcast Comments at 31–33 (arguing that program carriage cases are more complex than program access cases).

27. Pursuant to the rules we adopt herein, a program carriage complainant seeking renewal of an existing programming contract, under which programming is then being provided, may submit along with its complaint a petition for a temporary standstill of its programming contract pending resolution of the complaint. We encourage complainants to file the petition and complaint sufficiently in advance of the expiration of the existing contract, and in no case later than 30 days prior to such expiration, to provide the Media Bureau with sufficient time to act prior to expiration. In its petition, the complainant must demonstrate how grant of the standstill will meet the following four criteria: (i) The complainant is likely to prevail on the merits of its complaint; (ii) the complainant will suffer irreparable harm absent a stay; (iii) grant of a stay will not substantially harm other interested parties; and (iv) the public interest favors grant of a stay. As part of a showing of irreparable harm, a complainant may discuss, among other things, the impact on subscribers and the extent to which the programming vendor’s advertising and license fee revenues and its ability to compete for advertisers and programming will be adversely affected absent a standstill.

55 NCTA has suggested that section 624(f)(1) of the Communications Act is directed at the “provision or content of cable services” and thus by its terms does not apply to other types of MVPD services, such as direct broadcast satellite service. 47 U.S.C. § 544(f)(1). We need not, and do not, decide whether section 624(f)(1) would bar granting temporary injunctive relief in the program carriage context in all circumstances. Instead, we ask for comment on that issue in the accompanying NPRM in MB Docket No. 11-131.

We also reject Comcast’s claim that the Commission’s authority on section 4(i) is necessarily limited to authorizing granting a standstill because section 616(a)(5) of the Act and 76.1302(g)(1) of the Commission’s rules prevent the Commission from imposing conditions or penalties on the provision of service described in section 616 of the Act. We note that section 624(f)(1) is directed at the “provision or content of cable services” and thus by its terms does not apply to other types of MVPD services, such as direct broadcast satellite service. 47 U.S.C. § 544(f)(1). We need not, and do not, decide whether section 624(f)(1) would bar granting temporary injunctive relief in the program carriage context in all circumstances. Instead, we ask for comment on that issue in the accompanying NPRM in MB Docket No. 11-131.

We also reject Comcast’s claim that its program carriage complaint involves violations of section 616(a)(5) of the Communications Act. Comcast’s complaint alleged that the Copyright Act was violated when Comcast failed to pay royalties on a copyrighted work. Comcast July 25, 2011 Ex Parte Letter at 1–2. See 17 U.S.C. § 512(a)(2). This alleged violation is not a violation of section 616(a)(5) of the Act. See 47 U.S.C. § 544(f)(1). A complainant seeking renewal of an existing programming contract, under which programming is then being provided, may submit along with its complaint a petition for a temporary standstill of its programming contract pending resolution of the complaint.
In order to ensure an expedited decision, the defendant will have ten calendar days after service to file an answer to the petition for a standstill order. In acting on the petition, the Media Bureau may limit the length of the standstill to a defined period or may specify that the standstill will continue until the adjudicator resolves the underlying program carriage complaint. The adjudicator may lift the temporary standstill to the extent that it finds that the stay is having a negative effect on settlement negotiations or is otherwise no longer in the public interest.

28. If the Media Bureau grants the temporary standstill, the adjudicator ruling on the merits of the complaint (i.e., either the Media Bureau or an ALJ) will apply the terms of the new agreement between the parties, if any, as of the expiration date of the previous agreement. For example, if carriage of the video programming has continued uninterrupted during resolution of the complaint, and if the decision on the merits requires the defendant MVPD to pay a higher amount to the programming vendor than was required under the terms of the expired contract, the defendant MVPD will make an additional payment to the programming vendor in an amount representing the difference between the amount that is required to be paid pursuant to the decision and the amount the defendant MVPD paid under the terms of the expired contract pending resolution of the complaint. Conversely, if carriage of the video programming has continued uninterrupted during resolution of the complaint, and if the decision on the merits requires the defendant MVPD to pay a lesser amount to the programming vendor than was required under the terms of the expired contract, the programming vendor will credit the defendant MVPD with an amount representing the difference between the amount actually paid under the terms of the expired contract during resolution of the complaint and the amount that is required to be paid pursuant to the decision.

29. We note that program carriage complaints do not entail solely price disputes. Rather, complaints may entail the issue of whether the MVPD should be required to carry a programming vendor’s video programming at all or whether the MVPD should carry the video programming on a specific tier. In these cases, it may be difficult to apply the new terms to the standstill period, especially in cases where the adjudicator does not ultimately order carriage. Despite these complications, we believe that the adjudicator can address these issues on a case-by-case basis. To facilitate expeditious resolution of these issues, we propose in the NPRM in 11–131 specific procedures to assist an adjudicator to reach a fair and just result.

30. As explained in the 2010 Program Access Order, we expect parties to deal and negotiate with one another in good faith to come to settlement while the program carriage complaint is pending at the Commission. We also note that the standstill requirement imposed in connection with previous merger conditions is automatic upon notice of the MVPD’s intent to arbitrate, whereas the process we adopt here requires a complainant to seek Commission approval based on the four-criteria test described above. Thus, the Commission will be able to take into account all relevant facts in each case. Moreover, because the new carriage terms will be applied as of the expiration date of the previous contract, we believe that complainants will not have an incentive to seek a temporary standstill solely to benefit from the status quo or to gain leverage.59

E. Constitutional Issues

31. Our efforts in this Second Report and Order to create an improved program carriage complaint regime are consistent with constitutional requirements. TWC argues that the constitutionality of the program carriage rules has never been tested under the First and Fifth Amendments. TWC argues that, to the extent the goal of the program carriage rules is to promote diversity of speech, the rules are content-based and thus subject to strict scrutiny, which requires a “compelling” government interest and “narrow tailoring.” Diversity, however, is not the sole or even primary goal of the program carriage provision. Rather, through the program carriage provision, Congress also specifically intended to promote competition in both the video programming market and the video distribution market. Indeed, the program carriage discrimination provision specifically requires the Commission to assess on a case-by-case basis whether conduct amounting to discrimination on the basis of affiliation has the effect of “unreasonably restrain[ing] the ability of an unaffiliated video programming vendor to compete fairly.” By favoring its affiliated programming vendor on the basis of affiliation, an MVPD can hinder the ability of an unaffiliated programming vendor to compete in the video programming market, thereby allowing the affiliated programming vendor to charge higher license fees and reducing competition in the markets for the acquisition of advertising and programming rights.

32. The D.C. Circuit has already decided that the leased access provision of the 1992 Cable Act is not content-based. The court held that the leased access provision does not favor or disfavor speech on the basis of the ideas in question.

In making these claims, Comcast ignores the fact that a complainant could request, and the Commission or Media Bureau could issue, a standstill order in a program carriage complaint proceeding today under the same procedures and rules adopted herein. Thus, all of the alleged practical and policy problems raised by Comcast exist today and are not created by the new procedural rules. Moreover, the procedures we adopt herein will help to mitigate these alleged practical and policy problems. By setting forth the standard that will be applied to a program carriage standstill request and establishing specific deadlines for submitting and responding to such a request, we provide certainty to both complainants and MVPDs and respect for the standstill process. While Comcast claims that requiring a complainant to file a standstill request no later than 30 days prior to the expiration of a contract will chill business negotiations by placing parties in litigation before a contract ends (see id. at 6), the fact is that, without the procedures we adopt herein, a program carriage standstill request could be filed at any time, thereby creating greater uncertainty for MVPDs.
contained therein: rather, it regulates speech based on affiliation with a cable operator. The same conclusion applies to the program carriage provision of the 1992 Cable Act, which prevents MVPDs from demanding exclusivity or financial interests from, or discriminating on the basis of affiliation with respect to, unaffiliated programming vendors and, accordingly, regulates speech based on affiliation with an MVPD, not based on its content. The court held in Time Warner that the provisions of the 1992 Cable Act that regulate speech based on affiliation are subject to intermediate scrutiny and are constitutional if the government’s interest is important or substantial and the means chosen to promote that interest do not burden substantially more speech than necessary to achieve the aim. The Time Warner court found that there are substantial government interests in promoting diversity and competition in the video programming market.61 The program carriage rules, like the leased access requirements, promote diversity in video programming by promoting fair treatment of unaffiliated programming vendors and providing these vendors with an avenue to seek redress of anticompetitive carriage practices of MVPDs. Moreover, because MVPDs have an incentive to shield their affiliated programming vendors from competition with unaffiliated programming vendors for viewers, advertisers, and programming rights, the program carriage rules promote competition in the video programming market by promoting fair treatment of unaffiliated programming vendors. Thus, like the leased access rules, the program carriage rules would be subject to, and would withstand, intermediate scrutiny.

33. TWC argues that whatever justification existed for the program carriage provisions at the time they were adopted no longer exists today. Despite TWC’s claim to the contrary, we find that the substantial government interests in promoting diversity and competition remain. TWC notes that the number of all national programming networks has grown since 1992;62 the percentage of these networks affiliated with cable operators has decreased;63 channel capacity has increased, thereby providing more room for unaffiliated programming vendors, and cable operators face more competition in the distribution market today than in 1992.64 In the program carriage discrimination provision, however, Congress directed the Commission to assess on a case-by-case basis the impact of anticompetitive conduct on an unaffiliated programming vendor’s ability to compete. These nationwide figures do not undermine Congress’s finding that cable operators and other MVPDs have the incentive and ability to favor their affiliated programming vendors in individual cases, with the potential to unreasonably restrain the ability of an unaffiliated programming vendor to compete fairly. While the D.C. Circuit in vacating the Commission’s horizontal overreach cap stated that “[c]able operators * * * no longer have the bottleneck power over programming that concerned the Congress in 1992,” the court in that case was reviewing a broad prophylactic rule that would limit individual cable operators to a maximum percentage of subscribers nationwide. Unlike the rule at issue in that case, the program carriage statute requires an assessment of the facts of each case and the impact on the ability of an unaffiliated programming vendor to compete fairly. In addition, we note that the number of cable-affiliated networks recently increased significantly after the merger of Comcast and NBC Universal, thereby highlighting the continued need for an effective program carriage complaint regime. The Commission noted that that transaction would “result in an entity with increased ability and incentive to harm competition in video programming by engaging in foreclosure strategies or other discriminatory actions against unaffiliated video programming networks.”65 The Commission specifically relied upon the program carriage complaint process to address these concerns.

34. Moreover, the program carriage rules are no broader than necessary because the Commission will find a violation of the rules only after conducting a proceeding in which the complaining unaffiliated programming vendor or MVPD proves that an MVPD has demanded exclusivity from a programming vendor, has discriminated against the programming vendor on the basis of affiliation and that such discrimination has unreasonably restrained the programming vendor’s ability to compete fairly. Thus, the program carriage rules burden no more speech than necessary to vindicate the government’s goal of protecting competition and diversity.

35. We also reject TWC’s claim that the program carriage rules infringe cable operators’ rights under the Takings Clause of the Fifth Amendment. Quoting Dolan v. City of Tigard, 512 U.S. 374, 386 (1994), TWC argues, “[g]iven the existence of a fiercely competitive landscape fostering the development of diverse programming sources, there is no ‘essential nexus’ or ‘rough proportionality’ that would justify the taking that occurs under the * * * program carriage rules.” TWC’s reliance on Dolan is misplaced, as the “essential nexus” test concerns land use regulations that allegedly impose unconstitutional conditions, and is inapplicable here.66 None of the factors that the Supreme Court has identified as particularly significant in evaluating regulatory takings claims supports TWC’s claim.67 First, the program

63 See id. (stating that after Turner, “promoting the widespread dissemination of information from a multiplicity of sources” and “promoting fair competition in the market for television programming” must be treated as important governmental objectives unrelated to the suppression of speech (quoting Turner Broad. Sys., Inc. v. FCC, 512 U.S. 622 (1994))).

64 See TWC Comments at 8; Comcast Reply at 5; compare H.R. Rep. No. 102–628, at 41 (1992) (stating that 57 percent of nationally delivered cable networks are affiliated with cable operators) with 13th Annual Report, 24 FCC Rcd at 550–51, para. 24 (on data from 2006, finding that 14.9 percent of nationally delivered cable networks are affiliated with cable operators).

65 See id. at ii and 9–10 (stating that competition in the distribution market requires a cable operator to make programming decisions “based on business and editorial judgments as to whether particular channels meet the needs and interests of the operator’s subscribers and to attempt to maximize consumer value by making the best deal possible in arm’s length negotiations”); see also Comcast Reply at 5, 28 n.100, 30.

66 See id. at 4284–85, para. 116; see also id. at 4282, para. 110 (“We agree that the vertical integration of Comcast’s distribution network with NBCU’s programming assets will increase the ability and incentive for Comcast to discriminate against or foreclose unaffiliated programming.”).

67 See Connolly v. Pension Ben. Guaranty Corp., 475 U.S. 211, 224–25 (1986) (“In all of these cases, we have eschewed development of any set formula for identifying a ‘taking’ forbidden by the Fifth Amendment, and have relied instead on ad hoc, factual inquiries into the circumstances of each particular case. To aid in that determination, however, we have identified three factors which have particular significance: (1) The economic impact of the regulation on the claimant; (2) the extent to which the regulation is supported by distinct investment-backed expectations; and (3) the character of the governmental action.”) (citations and internal quotes omitted), quoted in Exclusive
IV. Procedural Matters

G. Congressional Review Act
37. The Commission will send a copy of this Second Report and Order in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, see 5 U.S.C. 801(a)(1)(A).

H. Final Regulatory Flexibility Analysis
Final Regulatory Flexibility Act Analysis
1. As required by the Regulatory Flexibility Act of 1980, as amended ("RFA"), an Initial Regulatory Flexibility Analysis ("IRFA") was incorporated in the Notice of Proposed Rulemaking in MB Docket No. 07–42 (hereinafter referred to as the "Program Carriage NPRM"). The Commission sought written public comment on the proposals in the Program Carriage NPRM, including comment on the IRFA. This present Final Regulatory Flexibility Analysis ("FRFA") conforms to the RFA.

2. In 1993, the Commission adopted rules implementing a provision of the 1992 Cable Act pertaining to carriage of video programming vendors by multichannel video programming distributors ("MVPDs") intended to benefit consumers by promoting competition and diversity in the video programming and video distribution markets (the "program carriage" rules). As required by Congress, these

agency procedure for which no notice is required under the APA and, in any event, are a logical outgrowth of the request for comment on rules to protect programmers from retaliation. See Comcast July 25 2011 Ex Parte Letter at 7 (citing Retransmission Consent NPRM, 26 FCC Rcd at 2727–29, paras. 18–19 and Review of the Commission’s Program Access Rules and Examination of Programming Tying Arrangements, Notice of Proposed Rulemaking, 22 FCC Rcd 17791, 17868–70, paras. 136–138 (2007)).

72 See 5 U.S.C. 504.

74 See Implementation of Sections 12 and 19 of the Cable Television Consumer Protection and Competition Act of 1992, Development of Competition and Diversity in Video Programming Distribution and carriage, MM Docket No. 92–265,
rules allow for the filing of complaints with the Commission alleging that an MVPD has (i) Required a financial interest in a video programming vendor’s program service as a condition for carriage (the “financial interest” provision); (ii) coerced a video programming vendor to provide, or retaliated against a vendor for failing to provide, exclusive rights as a condition of carriage (the “exclusivity” provision); or (iii) unreasonably restrained the ability of an unaffiliated video programming vendor to compete fairly by discriminating against video programming distribution on the basis of affiliation or non-affiliation of vendors in the selection, terms, or conditions for carriage (the “discrimination” provision). Congress specifically directed the Commission to provide for “expedited review” of these complaints and to provide for appropriate penalties and remedies for any violations. Programming vendors have complained that the Commission’s procedures for addressing program carriage complaints have hindered the filing of legitimate complaints and have failed to provide for the expedited review envisioned by Congress. In the Second Report and Order in MB Docket No. 07–42, the Commission takes the following initial steps to improve its procedures for addressing program carriage complaints. 3. First, in response to concerns that programming vendors are uncertain as to what evidence must be provided in a complaint to establish a prima facie case of a program carriage violation, the Commission codifies in its rules the evidence required to establish a prima facie case. A prima facie finding means that the complainant has provided sufficient evidence in its complaint, without the Media Bureau having considered any evidence to the contrary, to proceed to a ruling on the merits. The Second Report and Order in MB Docket No. 07–42 explains that, in complaints alleging a violation of the exclusivity or financial interest provisions, the complaint must contain direct evidence (either documentary or testimonial) supporting the facts underlying the claim. For complaints alleging a violation of the discrimination provision, however, direct evidence supporting a claim that the defendant MVPD discriminated “on the basis of affiliation or non-affiliation” is sufficient to establish this element of a prima facie case but is not required. Because it is unlikely that direct evidence of a discriminatory motive will be available to potential complainants, the Second Report and Order in MB Docket No. 07–42 clarifies that a complainant can establish this element of a prima facie case of a violation of the program carriage discrimination provision by providing the following circumstantial evidence of discrimination “on the basis of affiliation or non-affiliation”: (i) The complainant programming vendor must provide evidence that it provides video programming that is similarly situated to video programming provided by a programming vendor affiliated with the defendant MVPD, based on a combination of factors, such as genre, ratings, license fee, target audience, target advertisers, target programming, and other factors; and (ii) the complaint must contain evidence that the defendant MVPD has treated the video programming provided by the complainant programming vendor differently than the similarly situated video programming provided by the programming vendor affiliated with the defendant MVPD with respect to the selection, terms, or conditions for carriage. In addition, regardless of whether the complainant relies on direct or circumstantial evidence of discrimination “on the basis of affiliation or non-affiliation,” the complaint must also contain evidence that the defendant MVPD’s conduct has the effect of unreasonably restraining the ability of the complainant programming vendor to compete fairly.

4. Second, having established specific evidentiary requirements for what the complainant must provide in its complaint to establish a prima facie case of a program carriage violation, the Second Report and Order provides the defendant with additional time to answer the complaint in order to develop a full, case-specific response, with supporting evidence, to the evidence put forth by the complainant. Specifically, while the Commission’s current rule provides that an MVPD served with a program carriage complaint shall answer the complaint within 30 days of service, the Second Report and Order amends this rule to provide an MVPD with 60 days to answer the complaint.

5. Third, in response to concerns that the unpredictable and sometimes lengthy time frames for Commission action on program carriage complaints have discouraged programming vendors from filing legitimate complaints, the Commission establishes deadlines for action by the Media Bureau and Administrative Law Judges (“ALJ”) when acting on program carriage complaints. Action on program carriage complaints entails a two-step process: the initial prima facie determination by the Media Bureau, followed (if necessary) by a decision on the merits by an adjudicator (i.e., either the Media Bureau or an ALJ). For the first step, the Commission in the Second Report and Order in MB Docket No. 07–42 directs the Media Bureau to release a decision determining whether the complainant has established a prima facie case within 60 calendar days after the complainant’s reply to the defendant’s answer is filed (or the date on which the reply would be due if none is filed). For the second step, the Commission imposes different deadlines for a ruling on the merits of the complaint depending upon whether the adjudicator is the Media Bureau or the ALJ. After the Media Bureau concludes that the complaint contains sufficient evidence to establish a prima facie case, the Media Bureau has three options for addressing the merits of the complaint: (i) The Media Bureau can rule on the merits of the complaint based on the pleadings without discovery; (ii) if the Media Bureau determines that the record is not sufficient to resolve the complaint, the Media Bureau may outline procedures for discovery before proceeding to rule on the merits of the complaint; or (iii) if the Media Bureau determines that disposition of the complaint or discrete issues raised in the complaint requires resolution of factual disputes or other extensive discovery in an adjudicatory proceeding, the Media Bureau will refer the proceeding or discrete issues arising in the proceeding for an adjudicatory hearing before an ALJ. The Commission in the Second Report and Order in MB Docket No. 07–42 establishes the following deadlines for the adjudicator’s decision on the merits. For complaints that the Media Bureau decides on the merits based on the pleadings without discovery, the Media Bureau must release a decision within 60 calendar days after its prima facie determination. For complaints that the Media Bureau decides on the merits after discovery, the Media Bureau must release a decision within 150 calendar days after its prima facie determination. For complaints referred to an ALJ for a decision on the merits, the ALJ must release an initial decision within 240
will not substantially harm other interested parties; and (iv) the public interest favors grant of a stay. The defendant will have ten calendar days after service to file an answer to the petition for a standstill order. If the Media Bureau grants the temporary standstill, the adjudicator ruling on the merits of the complaint (i.e., either the Media Bureau or an ALJ) will apply the terms of the new agreement between the parties, if any, as of the expiration date of the previous agreement.

B. Summary of Significant Issues Raised by Public Comments in Response to the IRFA

7. There were no comments filed specifically in response to the IRFA.

C. Description and Estimate of the Number of Small Entities to Which the Proposed Rules Will Apply

8. The RFA directs agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the proposed rules, if adopted.76 The RFA generally defines the term ‘‘small entity’’ as having the same meaning as the terms ‘‘small business,’’ ‘‘small organization,’’ and ‘‘small governmental jurisdiction.’’77 In addition, the term ‘‘small business’’ has the same meaning as the term ‘‘small business concern’’ under the Small Business Act.78 A small business concern is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.79 Below, we provide a description of such small entities, as well as an estimate of the number of such small entities, where feasible.

9. Wired Telecommunications Carriers. The 2007 North American Industry Classification System (‘‘NAICS’’) defines ‘‘Wired Telecommunications Carriers’’ as follows: ‘‘This industry comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or a combination of technologies. Establishments in this industry use the wired telecommunications network facilities that they operate to provide a variety of services, such as wired telephony services, including VoIP services; wired (cable) audio and video programming distribution; and wired broadband Internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry.’’80 The SBA has developed a small business size standard for wireline firms within the broad economic census category, ‘‘Wired Telecommunications Carriers.’’81 Under this category, the SBA deems a wireline business to be small if it has 1,500 or fewer employees.82 Census Bureau data for 2007, which now supersede data from the 2002 Census, show that there were 3,188 firms in this category that operated for the entire year. Of this total, 3,144 had employment of 999 or fewer, and 44 firms had employment of 1,000 employees or more. Thus under this category and the associated small business size standard, the majority of these firms can be considered small.83

10. Cable Television Distribution Services. Since 2007, these services have been defined within the broad economic census category of Wired Telecommunications Carriers; that category is defined above. The SBA has developed a small business size standard for this category, which is: All such firms having 1,500 or fewer employees.84 Census Bureau data for 2007, which now supersede data from the 2002 Census, show that there were 3,188 firms in this category that operated for the entire year. Of this total, 3,144 had employment of 999 or fewer, and 44 firms had employment of 1,000 employees or more. Thus under this category and the associated small business size standard,
the majority of these firms can be considered small.85

11. Cable Companies and Systems. The Commission has also developed its own small business size standards, for the purpose of cable rate regulation. Under the Commission’s rules, a “small cable company” is one serving 400,000 or fewer subscribers nationwide. Industry data indicate that all but ten cable operators nationwide are small under this size standard.91 In addition, under the Commission’s rules, a “small system” is a cable system serving 15,000 or fewer subscribers. Industry data indicate that, of 6,101 systems nationwide, 4,410 systems have under 10,000 subscribers, and an additional 258 systems have 10,000–19,999 subscribers.89 Thus, under this standard, most cable systems are small.

12. Cable System Operators. The Communications Act of 1934, as amended, also contains a size standard for small cable system operators, which is “a cable operator that, directly or through any affiliate, serves in the aggregate fewer than one percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues exceed $250,000,000.”90 The Commission has determined that an operator serving fewer than 677,000 subscribers shall be deemed a small operator if its annual revenues, when combined with the total annual revenues of all its affiliates, do not exceed $250 million in the aggregate. Industry data indicate that all but nine cable operators nationwide are small under this subscriber size standard.92 We note that the Commission neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed $250 million,93 and therefore we are unable to estimate more accurately the number of cable system operators that would qualify as small under this size standard.

13. Direct Broadcast Satellite (“DBS”) Service. DBS service is a nationally distributed subscription service that delivers video and audio programming via satellite to a small parabolic “dish” antenna at the subscriber’s location. DBS, by exception, is now included in the SBA’s broad economic census category, “Wired Telecommunications Carriers.”94 Which was developed for small wireline firms. Under this category, the SBA deems a wireline business to be small if it has 1,500 or fewer employees.95 Census Bureau data for 2007, which now superseded data from the 2002 Census, show that there were 3,188 firms in this category that operated for the entire year. Of this total, 3,144 had employment of 999 or fewer, and 44 firms had had employment of 1,000 employees or more. Thus under this category and the associated small business size standard, the majority of these firms can be considered small.96 Currently, only two entities provide DBS service, which requires a great investment of capital for operation: DIRECTV and EchoStar Communications Corporation (“EchoStar”)98 which was developed for small wireline firms. Under this category, the SBA deems a wireline business to be small if it has 1,500 or fewer employees.99 Census Bureau data for 2007, which now superseded data from the 2002 Census, show that there were 3,188 firms in this category that operated for the entire year. Of this total, 3,144 had employment of 999 or fewer, and 44 firms had had employment of 1,000 employees or more. Thus, under this category and the associated small business size standard, the majority of these firms can be considered small.100

14. Satellite Master Antenna Television (SMATV) Systems, also known as Private Cable Operators (PCOs). SMATV systems or PCOs are video distribution facilities that use closed transmission paths without using any public right-of-way. They acquire video programming and distribute it via terrestrial wiring in urban and suburban multiple dwelling units such as apartments and condominiums, and commercial multiple tenant units such as hotels and office buildings. SMATV systems or PCOs are now included in the SBA’s broad economic census category, “Wired Telecommunications Carriers,”101 which was developed for small wireline firms. Under this category, the SBA deems a wireline business to be small if it has 1,500 or fewer employees.102 Census Bureau data for 2007, which now superseded data from the 2002 Census, show that there were 3,188 firms in this category that operated for the entire year. Of this total, 3,144 had employment of 999 or fewer, and 44 firms had had employment of 1,000 employees or more. Thus, under this category and the associated small business size standard, the majority of these firms can be considered small.103

15. Home Satellite Dish (“HSD”) Service. HSD or the large dish segment of the satellite industry is the original satellite-to-home service offered to consumers, and involves the home reception of signals transmitted by satellites operating generally in the C-band frequency. Unlike DBS, which uses small dishes, HSD antennas are between four and eight feet in diameter and can receive a wide range of unscrambled (free) programming and scrambled programming purchased from program packages that are licensed to facilitate subscribers’ receipt of video programming. Because HSD provides subscription services, HSD falls within the SBA-recognized definition of Wired Telecommunications Carriers. The SBA has developed a small business size standard for this category, which is: all such firms having 1,500 or fewer employees.104 Census Bureau data for

2007, which now supersedes data from the 2002 Census, show that there were 3,188 firms in this category that operated for the entire year. Of this total, 3,144 had employment of 999 or fewer, and 44 firms had had employment of 1,000 employees or more. Thus, under this category and the associated small business size standard, the majority of these firms can be considered small.105

16. Broadband Radio Service and Educational Broadband Service. Broadband Radio Service systems, previously referred to as Multiservice Distribution Service (MDS) and Multichannel Multiservice Distribution Service (MMDS) systems, and “wireless cable,” transmit video programming to subscribers and provide two-way high speed data communications operating using the microwave frequencies of the Broadband Radio Service (BRS) and Educational Broadband Service (EBS) (previously referred to as the Instructional Television Fixed Service (ITFS)).106 In connection with the 1996 BRS auction, the Commission established a small business size standard as an entity that had annual average gross revenues of no more than $40 million in the previous three calendar years.107 The BRS auctions resulted in 67 successful bidders obtaining licensing opportunities for 493 Basic Trading Areas (BTAs). Of the 67 auction winners, 61 met the definition of a small business. BRS also includes licensees of stations authorized prior to the auction. At this time, we estimate that of the 61 small business BRS auction winners, 46 remain small business licensees. In addition to the 48 small business licensees that held BTA authorizations, there are approximately 392 incumbent BRS licensees that are considered small entities.108 After adding the number of small business auction licensees to the number of incumbent licensees not already counted, we find that there are currently approximately 440 BRS licensees that are defined as small businesses under either the SBA or the Commission’s rules. In 2009, the Commission conducted Auction 86, the sale of 78 licenses in the BRS areas.109 The Commission offered three levels of bidding credits: (i) A bidder with attributed average annual gross revenues that exceed $15 million and do not exceed $40 million for the preceding three years (small business) received a 15 percent discount on its winning bid; (ii) a bidder with attributed average annual gross revenues that exceed $3 million and do not exceed $15 million for the preceding three years (very small business) received a 25 percent discount on its winning bid; and (iii) a bidder with attributed average annual gross revenues that do not exceed $3 million for the preceding three years (entrepreneur) received a 35 percent discount on its winning bid.110 Auction 86 concluded in 2009 with the sale of 61 licenses.111 Of the ten winning bidders, two bidders that claimed small business status won 4 licenses; one bidder that claimed very small business status won three licenses; and two bidders that claimed entrepreneur status won six licenses.

17. In addition, the SBA’s Cable Television Distribution Services small business size standard is applicable to EBS. There are presently 2,032 EBS licensees. All but 100 of these licenses are held by educational institutions. Educational institutions are included in this analysis as small entities.112 Thus, we estimate that at least 1,932 licensees are small businesses. Since 2007, Cable Television Distribution Services have been defined within the broad economic census category of Wired Telecommunications Carriers; that category is defined as follows: “This industry comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks. Transmission facilities may be based on a single technology or a combination of telecommunications.”113 The SBA has developed a small business size standard for this category, which is: all such firms having 1,500 or fewer employees.114 Census Bureau data for 2007, which now supersedes data from the 2002 Census, show that there were 3,188 firms in this category that operated for the entire year. Of this total, 3,144 had employment of 999 or fewer employees and 44 firms had employment of 1,000 employees or more. Thus, under this category and the associated small business size standard, the majority of these firms can be considered small.115

18. Fixed Microwave Services. Microwave services include common carrier,116 private-operational fixed,117 and broadcast auxiliary radio services.118 They also include the Local Multipoint Distribution Service (LMDS),119 the Digital Electronic Message Service (DEMS),120 and the 24 GHz Service.121 Licensees can choose between common carrier and non-common carrier status.122 At present, there are approximately 31,428 common carrier fixed licensees and 79,732 private operational-fixed licensees and broadcast auxiliary radio licensees in the microwave services. There are approximately 120 LMDS licensees, three DEMS licensees, and three 24 GHz licensees. The Commission has not yet defined a small business with respect to microwave usage. For purposes of the IRA, we will use the SBA’s definition applicable to Wireless Telecommunications Carriers (except satellite)—i.e., an entity with no more than 1,500 persons.123

106 Amendment of Parts 21 and 74 of the Commission’s Rules with Regard to Filing Procedures in the Multiservice Distribution Service and in the Instructional Television Fixed Service (ITFS).
107 In connection with the 1996 BRS auction, the Commission established a small business size standard as an entity that had annual average gross revenues of no more than $40 million in the previous three calendar years. The BRS auctions resulted in 67 successful bidders obtaining licensing opportunities for 493 Basic Trading Areas (BTAs). Of the 67 auction winners, 61 met the definition of a small business. BRS also includes licensees of stations authorized prior to the auction. At this time, we estimate that of the 61 small business BRS auction winners, 46 remain small business licensees. In addition to the 48 small business licensees that held BTA authorizations, there are approximately 392 incumbent BRS licensees that are considered small entities. After adding the number of small business auction licensees to the number of incumbent licensees not already counted, we find that there are currently approximately 440 BRS licensees that are defined as small businesses under either the SBA or the Commission’s rules. In 2009, the Commission conducted Auction 86, the sale of 78 licenses in the BRS areas. The Commission offered three levels of bidding credits: (i) A bidder with attributed average annual gross revenues that exceed $15 million and do not exceed $40 million for the preceding three years (small business) received a 15 percent discount on its winning bid; (ii) a bidder with attributed average annual gross revenues that exceed $3 million and do not exceed $15 million for the preceding three years (very small business) received a 25 percent discount on its winning bid; and (iii) a bidder with attributed average annual gross revenues that do not exceed $3 million for the preceding three years (entrepreneur) received a 35 percent discount on its winning bid. Auction 86 concluded in 2009 with the sale of 61 licenses. Of the ten winning bidders, two bidders that claimed small business status won 4 licenses; one bidder that claimed very small business status won three licenses; and two bidders that claimed entrepreneur status won six licenses.
108 In connection with the 1996 BRS auction, the Commission established a small business size standard as an entity that had annual average gross revenues of no more than $40 million in the previous three calendar years. The BRS auctions resulted in 67 successful bidders obtaining licensing opportunities for 493 Basic Trading Areas (BTAs). Of the 67 auction winners, 61 met the definition of a small business. BRS also includes licensees of stations authorized prior to the auction. At this time, we estimate that of the 61 small business BRS auction winners, 46 remain small business licensees. In addition to the 48 small business licensees that held BTA authorizations, there are approximately 392 incumbent BRS licensees that are considered small entities. After adding the number of small business auction licensees to the number of incumbent licensees not already counted, we find that there are currently approximately 440 BRS licensees that are defined as small businesses under either the SBA or the Commission’s rules. In 2009, the Commission conducted Auction 86, the sale of 78 licenses in the BRS areas. The Commission offered three levels of bidding credits: (i) A bidder with attributed average annual gross revenues that exceed $15 million and do not exceed $40 million for the preceding three years (small business) received a 15 percent discount on its winning bid; (ii) a bidder with attributed average annual gross revenues that exceed $3 million and do not exceed $15 million for the preceding three years (very small business) received a 25 percent discount on its winning bid; and (iii) a bidder with attributed average annual gross revenues that do not exceed $3 million for the preceding three years (entrepreneur) received a 35 percent discount on its winning bid. Auction 86 concluded in 2009 with the sale of 61 licenses. Of the ten winning bidders, two bidders that claimed small business status won 4 licenses; one bidder that claimed very small business status won three licenses; and two bidders that claimed entrepreneur status won six licenses.

117 See 47 CFR part 101, Subparts C and H.
118 Auxiliary Microwave Service is governed by part 74 of Title 47 of the Commission’s rules. See 47 CFR part 74. Available to licensees of broadcast stations and to broadcast and cable network entities, broadcast auxiliary microwave stations are used for relaying broadcast television signals from the studio to the transmitter, or between two points such as a main studio and an auxiliary studio. The service also includes mobile TV pickups, which relay signals from a remote location back to the studio.
119 See 47 CFR part 101, subpart L.
120 See 47 CFR part 101, subpart G.
121 See id.
123 13 CFR 121.201, 2007 NAICS code 517210.
Under the present and prior categories, the SBA has deemed a wireless business to be small if it has 1,500 or fewer employees.\textsuperscript{124} For the category of Wireless Telecommunications Carriers (except Satellite), Census data for 2007, which superseded data contained in the 2002 Census, show that there were 1,383 firms that operated that year.\textsuperscript{125} Of those 1,383, 1,368 had fewer than 100 employees, and 15 firms had more than 100 employees. Thus under this category and the associated small business size standard, the majority of firms can be considered small. We note that the number of firms does not necessarily track the number of licenses. We estimate that virtually all of the Fixed Microwave licensees (excluding broadcast auxiliary licensees) would qualify as small entities under the SBA definition.

19. **Open Video Systems.** The open video system ("OVS") framework was established in 1996, and is one of four statutorily recognized options for the provision of video programming services by local exchange carriers.\textsuperscript{126} The OVS framework provides opportunities for the distribution of video programming other than through cable systems. Because OVS operators provide subscription services,\textsuperscript{127} OVS falls within the SBA small business size standard covering cable services, which is "Wired Telecommunications Carriers."\textsuperscript{128} The SBA has developed a small business size standard for this category, which is: all such firms having 1,500 or fewer employees.\textsuperscript{129} Census Bureau data for 2007, which now superseded data from the 2002 Census, show that there were 3,188 firms in this category that operated for the entire year. Of this total, 3,144 had employment of 999 or fewer, and 44 firms had employment of 1,000 employees or more. Thus, under this category and the associated small business size standard, the majority of these firms can be considered small.\textsuperscript{130} In addition, we note that the Commission has certified some OVS operators, with some now providing service.\textsuperscript{131} Broadband service providers ("BSPs") are currently the only significant holders of OVS certifications or local OVS franchises.\textsuperscript{132} The Commission does not have financial or employment information regarding the entities authorized to provide OVS, some of which may not yet be operational. Thus, at least some of the OVS operators may qualify as small entities.

20. **Cable and Other Subscription Programming.** The Census Bureau defines this category as follows: "This industry comprises establishments primarily engaged in operating studios and facilities for the broadcasting of programs on a subscription or fee basis * * *. These establishments produce programming in their own facilities or acquire programming from external sources. The programming material is usually delivered to a third party, such as cable systems or direct-to-home satellite systems, for transmission to viewers."\textsuperscript{133} The SBA has developed a small business size standard for this category, which is: all such firms having $15 million dollars or less in annual revenues.\textsuperscript{134} To gauge small business prevalence in the Cable and Other Subscription Programming industries, the Commission relies on data currently available from the U.S. Census for the year 2007. Census Bureau data for 2007, which now superseded data from the 2002 Census, show that there were 396 firms in this category that operated for the entire year.\textsuperscript{135} Of that number, 325 operated with annual revenues of $9,999,999 or less.\textsuperscript{136} Seventy-one (71) operated with annual revenues of between $10 million and $100 million or more.\textsuperscript{137} Thus, under this category and associated small business size standard, the majority of firms can be considered small.

21. **Small Incumbent Local Exchange Carriers.** We have included small incumbent local exchange carriers in this present RFA analysis. A "small business" under the RFA is one that, \textit{inter alia}, meets the pertinent small business size standard (e.g., a telephone communications business having 1,500 or fewer employees), and "is not dominant in its field of operation."\textsuperscript{138} The SBA’s Office of Advocacy contends that, for RFA purposes, small incumbent local exchange carriers are not dominant in their field of operation because any such dominance is not "national" in scope.\textsuperscript{139} We have therefore included small incumbent local exchange carriers in this RFA analysis, although we emphasize that this RFA action has no effect on Commission analyses and determinations in other, non-RFA contexts.

22. **Incumbent Local Exchange Carriers ("LECs").** Neither the Commission nor the SBA has developed a small business size standard specifically for incumbent local exchange services. The appropriate size standard under SBA rules is for the category Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or fewer employees.\textsuperscript{140} Census Bureau data for 2007, which now superseded data from the 2002 Census, show that there were 3,188 firms in this category that operated for the entire year. Of this total, 3,144 had employment of 999 or fewer, and 44 firms had employment of 1,000 employees or more. Thus, under this category and the associated small business size standard, the majority of these firms can be considered small.\textsuperscript{141}

23. **Competitive Local Exchange Carriers, Competitive Access Providers (CAPS), "Shared-Transport Service Providers," and "Other Local Service Providers."** Neither the Commission nor the SBA has developed a small business size standard specifically for these service providers. The appropriate size standard under SBA rules is for the category Wired Telecommunications Carriers. Under that size standard, such a business is small if it has 1,500 or

\textsuperscript{124}See id. The now-superseded, pre-2007 CFR citations were 13 CFR 121.201, NAICS codes 517212 and 517212 (referring to the 2002 NAICS).

\textsuperscript{127}Id.
\textsuperscript{128}See 13 th Annual Report, 24 F C C Rcd at 606–67, para. 135. 137 Id.
fewer employees. In Census Bureau data for 2007, which now supersede data from the 2002 Census, show that there were 3,188 firms in this category that operated for the entire year. Of this total, 3,144 had employment of 999 or fewer, and 44 firms had had employment of 1,000 employees or more. Thus, under this category and the associated small business size standard, the majority of these firms can be considered small. Consequently, the Commission estimates that most providers of competitive local exchange service, competitive access providers, “Shared-Tenant Service Providers,” and “Other Local Service Providers” are small entities.

24. **Television Broadcasting.** The SBA defines a television broadcasting station as a small business if such station has no more than $14.0 million in annual receipts. Business concerns included as a small business if such station has no more than $14.0 million in annual receipts. Business concerns included as a small business if such station has no more than $14.0 million in annual receipts.

25. In addition, an element of the definition of “small business” is that the entity not be dominant in its field of operation. We are unable at this time to define or quantify the criteria that would establish whether a specific television station is dominant in its field of operation. Accordingly, the estimate of small businesses to which rules may apply do not exclude any television station from the definition of a small business on this basis and are therefore over-inclusive to that extent. Also, as noted, an additional element of the definition of “small business” is that the entity must be independently owned and operated. We note that it is difficult at times to assess these criteria in the context of media entities and our estimates of small businesses to which they apply may be over-inclusive to this extent.

26. **Motion Picture and Video Production.** The Census Bureau defines this category as follows: “This industry comprises establishments primarily engaged in producing, or producing and distributing motion pictures, videos, television programs, or television commercials.” We note that firms in this category may be engaged in various industries, including cable programming. Specific figures are not available regarding how many of these firms produce and/or distribute programming for cable television. The SBA has developed a small business size standard for this category, which is: all such firms having $29.5 million dollars or less in annual revenues. To gauge small business prevalence in the Motion Picture and Video Distribution industries, the Commission relies on data currently available from the U.S. Census for the year 2007. Census Bureau data for 2007, which now supersede data from the 2002 Census, show that there were 450 firms in this category that operated for the entire year. Of these, 434 had annual receipts of $24,999,999 or less, and 16 had annual receipts ranging from not less that $25,000,000 to $100,000,000 or more. Thus, under this category and associated small business size standard, the majority of firms can be considered small.
D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

28. The rules adopted in the Second Report and Order in MB Docket No. 07–42 will impose additional reporting, recordkeeping, and compliance requirements on video programming vendors and MVPDs. First, the Second Report and Order in MB Docket No. 07–42 clarifies what evidence a complainant must provide in its program carriage complaint in order to establish a prima facie case of a program carriage violation. 158 Second, to enable the defendant to develop a full, case-specific response to the evidence put forth by the complainant, with supporting evidence, the Second Report and Order in MB Docket No. 07–42 provides the defendant with 60 days (rather than the current 30 days) to answer the complaint. 159 Third, in adopting a deadline for an ALJ to issue a decision on the merits of a program carriage complaint referred by Media Bureau, the Second Report and Order in MB Docket No. 07–42 adopts revised procedural deadlines applicable to adjudicatory hearings involving program carriage complaints. 160 Fourth, the Second Report and Order in MB Docket No. 07–42 establishes procedures for the Commission’s consideration of requests for a temporary standstill of the price, terms, and other conditions of an existing programming contract by a program carriage complainant seeking renewal of such a contract. 161

E. Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

29. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities. 162 The Program Carriage NPRM invited comment on issues that had the potential to have significant economic impact on some small entities. 163

30. As discussed in section A, the Second Report and Order in MB Docket No. 07–42 is intended to improve the Commission’s procedures for addressing program carriage complaints. By clarifying the evidence a complainant must provide in its complaint to establish a prima facie case of a program carriage violation, providing defendants with additional time to answer a complaint, establishing deadlines for action on program carriage complaints, and establishing procedures for requesting a standstill of an existing programming contract, the decision confers benefits upon both video programming vendors and MVPDs, including those that are smaller entities, as well as MVPD subscribers. Thus, the decision benefits smaller entities as well as larger entities. For this reason, an analysis of alternatives to the proposed rules is unnecessary.

F. Report to Congress

31. The Commission will send a copy of the Second Report and Order in MB Docket No. 07–42, including this FRFA, in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act. 164 In addition, the Commission will send a copy of the Second Report and Order in MB Docket No. 07–42, including this FRFA, to the Chief Counsel for Advocacy of the SBA. A copy of the Second Report and Order in MB Docket No. 07–42 and FRFA (or summaries thereof) will also be published in the Federal Register. 165

V. Ordering Clauses

32. It is ordered, pursuant to the authority found in sections 4(j), 4(j), 303(r), and 616 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 303(r), and 536, the Second Report and Order in MB Docket No. 07–42 Is Adopted.

33. It is further ordered that, pursuant to the authority found in sections 4(i), 4(j), 303(r), and 616 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 303(r), and 536, the Commission’s rules Are Hereby Amended as set forth in the Rules Changes below.

34. It is further ordered that the rules adopted herein are effective October 31, 2011, except for § 1.221(b), 1.229(b)(3), 1.229(b)(4), 1.248(a), 1.248(b), 76.7(q)(2), 76.1302(c)(1), 76.1302(d), 76.1302 (e)(1), and 76.1302(k) which contain new or modified information collection requirements that require approval by the Office of Management and Budget (“OMB”) under the Paperwork Reduction Act (PRA) and will become effective after the Commission publishes a notice in the Federal Register announcing such approval and the relevant effective date.

35. It is further ordered that the Commission’s Consumer and Governmental Affairs Bureau, Reference Information Center, Shall Send a copy of this Second Report and Order in MB Docket No. 07–42, including the Final Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

36. It is further ordered that the Commission Shall Send a copy of this Second Report and Order in MB Docket No. 07–42 in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, see 5 U.S.C. 801(a)(1)(A).

Final Rules

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR Parts 0, 1, and 76 as follows:

PART 0—COMMISSION ORGANIZATION

1. The authority citation for Part 0 continues to read as follows:

Authority: Sec. 5, 48 Stat. 1068, as amended; 47 U.S.C. 155, 225, unless otherwise noted.

2. Section 0.341 is amended by adding paragraph (f) to read as follows:
§ 0.341 Authority of administrative law judge.

(f)(1) For program carriage complaints filed pursuant to §76.1302 of this chapter that the Chief, Media Bureau refers to an administrative law judge for an initial decision, the presiding administrative law judge shall release an initial decision in compliance with one of the following deadlines:

(i) 240 calendar days after a party informs the Chief Administrative Law Judge that it elects not to pursue alternative dispute resolution as set forth in §76.7(g)(2) of this chapter; or

(ii) If the parties have mutually elected to pursue alternative dispute resolution pursuant to §76.7(g)(2) of this chapter, within 240 calendar days after the parties inform the Chief Administrative Law Judge that they have failed to resolve their dispute through alternative dispute resolution.

(2) The presiding administrative law judge may toll these deadlines under the following circumstances:

(i) If the complainant and defendant jointly request that the presiding administrative law judge toll these deadlines in order to pursue settlement discussions or alternative dispute resolution or for any other reason that the complainant and defendant mutually agree justifies tolling; or

(ii) If complying with the deadline would violate the due process rights of a party or would be inconsistent with fundamental fairness; or

(iii) In extraordinary situations, due to a lack of adjudicatory resources available at the time in the Office of Administrative Law Judges.

PART 1—PRACTICE AND PROCEDURE

3. The authority citation for Part 1 continues to read as follows:

Authority: 15 U.S.C. 79 et seq.; 47 U.S.C. 151, 154(i), 154(j), 155, 157, 225, 227, 303(r), and 309.

4. Section 1.221 is amended by adding paragraph (h) to read as follows:

§ 1.221 Notice of hearing; appearances.

(h)(1) For program carriage complaints filed pursuant to §76.1302 of this chapter that the Chief, Media Bureau refers to an administrative law judge for an initial decision, each party, in person or by attorney, shall file a written appearance within five calendar days after the parties inform the Chief Administrative Law Judge that it elects not to pursue alternative dispute resolution pursuant to §76.7(g)(2) of this chapter or, if the parties have mutually elected to pursue alternative dispute resolution pursuant to §76.7(g)(2) of this chapter, within five calendar days after the parties inform the Chief Administrative Law Judge that they have failed to resolve their dispute through alternative dispute resolution. The written appearance shall state that the party will appear on the date fixed for hearing and present evidence on the issues specified in the hearing designation order.

(2) If the complainant fails to file a written appearance by this deadline, or fails to file prior to the deadline either a petition to dismiss the proceeding without prejudice or a petition to accept, for good cause shown, a written appearance beyond such deadline, the Chief Administrative Law Judge shall dismiss the complaint with prejudice for failure to prosecute.

(3) If the defendant fails to file a written appearance by this deadline, or fails to file prior to this deadline a petition to accept, for good cause shown, a written appearance beyond such deadline, its opportunity to present evidence at hearing will be deemed to have been waived. If the hearing is so waived, the Chief Administrative Law Judge shall expeditiously terminate the proceeding and certify to the Commission the complaint for resolution based on the existing record.

5. Section 1.229 is amended by redesignating paragraph (b)(3) as (b)(4), revising newly redesignated paragraph (b)(4), and adding new paragraph (b)(3), to read as follows:

§ 1.229 Motions to enlarge, change, or delete issues.

(b) * * *

(3) For program carriage complaints filed pursuant to §76.1302 of this chapter that the Chief, Media Bureau refers to an administrative law judge for an initial decision, such motions shall be filed within 15 calendar days after the deadline for submitting written appearances pursuant to §1.221(h), except that persons not named as parties to the proceeding in the designation order may file such motions with their petitions to intervene up to 30 days after publication of the full text or a summary of the designation order in the Federal Register. (See §1.223).

(4) Any person desiring to file a motion to modify the issues after the expiration of periods specified in paragraphs (a), (b)(1), (b)(2), and (b)(3) of this section shall set forth the reason why it was not possible to file the motion within the prescribed period. Except as provided in paragraph (c) of this section, the motion will be granted only if good cause is shown for the delay in filing. Motions for modifications of issues which are based on new facts or newly discovered facts shall be filed within 15 days after such facts are discovered by the moving party.
PART 76—MULTICHANNEL VIDEO AND CABLE TELEVISION SERVICE

7. The authority citation for Part 76 continues to read as follows:

8. Section 76.7 is amended by revising paragraph (g)(2) to read as follows:

§ 76.7 General special relief, waiver, enforcement, complaint, show cause, forfeiture, and declaratory ruling procedures.

(g) * * *

(2) Before designation for hearing, the staff shall notify, either orally or in writing, the parties to the proceeding of its intent to so designate, and the parties shall be given a period of ten (10) days to elect to resolve the dispute through alternative dispute resolution procedures, or to proceed with an adjudicatory hearing. Such election shall be submitted in writing to the Commission and the Chief Administrative Law Judge.

9. Section 76.1302 is amended by revising paragraphs (c) through (g) and adding paragraphs (h) through (k) to read as follows:

§ 76.1302 Carriage agreement proceedings.

(c) Contents of complaint. In addition to the requirements of § 76.7, a carriage agreement complaint shall contain:

(1) Whether the complainant is a multichannel video programming distributor or video programming vendor, and, in the case of a multichannel video programming distributor, identify the type of multichannel video programming distributor, the address and telephone number of the complainant, what type of multichannel video programming distributor the defendant is, and the address and telephone number of each defendant;

(2) Evidence that supports complainant’s belief that the defendant, where necessary, meets the attribution standards for application of the carriage agreement regulations;

(3) The complaint must be accompanied by appropriate evidence demonstrating that the required notification pursuant to paragraph (b) of this section has been made.

(d) Prima facie case. In order to establish a prima facie case of a violation of § 76.1301, the complaint must contain evidence of the following:

(1) The complainant is a video programming vendor as defined in section 616(b) of the Communications Act of 1934, as amended, and § 76.1300(e) or a multichannel video programming distributor as defined in section 602(13) of the Communications Act of 1934, as amended, and § 76.1300(d);

(2) The defendant is a multichannel video programming distributor as defined in section 602(13) of the Communications Act of 1934, as amended, and § 76.1300(d);

(3) Evidence that supports

(i) The complainant has established a prima facie case of a violation of § 76.1301.

(ii) Evidence that the defendant multichannel video programming distributor has treated the video programming provided by the complainant differently than the similarly situated, affiliated video programming described in paragraph (d)(3)(iii)(B)(2)(i) of this section with respect to the selection, terms, or conditions for carriage.

(e) Answer. (1) Any multichannel video programming distributor upon which a carriage agreement complaint is served under this section shall answer within sixty (60) days of service of the complaint, unless otherwise directed by the Commission.

(2) The answer shall address the relief requested in the complaint, including legal and documentary support, for such relief, and may include an alternative relief proposal without any prejudice to any denials or defenses raised.

(f) Reply. Within twenty (20) days after service of an answer, unless otherwise directed by the Commission, the complainant may file and serve a reply which shall be responsive to the answer.

(g) Prima facie determination. (1) Within sixty (60) calendar days after the complainant’s reply to the defendant’s answer is filed (or the date on which the reply would be due if none is filed), the Chief, Media Bureau shall release a decision determining whether the complainant has established a prima facie case of a violation of § 76.1301.

(2) The Chief, Media Bureau may toll the sixty (60)-calendar-day deadline under the following circumstances:

(i) If the complainant and defendant jointly request that the Chief, Media Bureau toll these deadlines in order to pursue settlement discussions or alternative dispute resolution or for any other reason that the complainant and defendant mutually agree justifies tolling; or

(ii) If complying with the deadline would violate the due process rights of a party or would be inconsistent with fundamental fairness.

(3) A finding that the complainant has established a prima facie case of a violation of § 76.1301 means that the complainant has provided sufficient evidence in its complaint to allow the case to proceed to a ruling on the merits.

(4) If the Chief, Media Bureau finds that the complainant has not established a prima facie case of a violation of
§ 76.1301, the Chief, Media Bureau will dismiss the complaint.

(b) Time limit on filing of complaints. Any complaint filed pursuant to this subsection must be filed within one year of the date on which one of the following events occurs:

(1) The multichannel video programming distributor enters into a contract with a video programming distributor that a party alleges to violate one or more of the rules contained in this section; or

(2) The multichannel video programming distributor offers to carry the video programming vendor’s programming pursuant to terms that a party alleges to violate one or more of the rules contained in this section, and such offer to carry programming is unrelated to any existing contract between the complainant and the multichannel video programming distributor; or

(3) A party has notified a multichannel video programming distributor that it intends to file a complaint with the Commission based on violations of one or more of the rules contained in this section.

(i) Deadline for decision on the merits.

(a) For program carriage complaints that the Chief, Media Bureau decides on the merits based on the complaint, answer, and reply without discovery, the Chief, Media Bureau shall release a decision on the merits within sixty (60) calendar days after the Chief, Media Bureau’s prima facie determination.

(ii) For program carriage complaints that the Chief, Media Bureau decides on the merits after discovery, the Chief, Media Bureau shall release a decision on the merits within 150 calendar days after the Chief, Media Bureau’s prima facie determination.

(iii) The Chief, Media Bureau may toll these deadlines under the following circumstances:

(A) If the complainant and defendant jointly request that the Chief, Media Bureau toll these deadlines in order to pursue settlement discussions or alternative dispute resolution or for any other reason that the complainant and defendant mutually agree justifies tolling; or

(B) If complying with the deadline would violate the due process rights of a party or would be inconsistent with fundamental fairness.

(2) For program carriage complaints that the Chief, Media Bureau refers to an administrative law judge for an initial decision, the deadlines set forth in § 0.341(f) of this chapter apply.

(i) Remedies for violations— Remedies authorized. Upon completion of such adjudicatory proceeding, the Commission shall order appropriate remedies, including, if necessary, mandatory carriage of a video programming vendor’s programming on defendant’s video distribution system, or the establishment of prices, terms, and conditions for the carriage of a video programming vendor’s programming. Such order shall set forth a timetable for compliance, and shall become effective upon release, unless any order of mandatory carriage would require the defendant multichannel video programming distributor to delete existing programming from its system to accommodate carriage of a video programming vendor’s programming. In such instances, if the defendant seeks review of the staff, or administrative law judge decision, the order for carriage of a video programming vendor’s programming will not become effective unless and until the decision of the staff or administrative law judge is upheld by the Commission. If the Commission upholds the remedy ordered by the staff or administrative law judge in its entirety, the defendant will be required to carry the video programming vendor’s programming for an additional period equal to the time elapsed between the staff or administrative law judge decision and the Commission’s ruling, on the terms and conditions approved by the Commission.

(ii) Additional sanctions. The remedies provided in paragraph (i)(1) of this section are in addition to and not in lieu of the sanctions available under title V or any other provision of the Communications Act.

(ii) Petitions for temporary standstill.

(1) A program carriage complainant seeking renewal of an existing programming contract may file a petition along with its complaint requesting a temporary standstill of the price, terms, and other conditions of the existing programming contract pending resolution of the complaint. To allow for sufficient time to consider the petition for temporary standstill prior to the expiration of the existing programming contract, the petition for temporary standstill and complaint shall be filed no later than thirty (30) days prior to the expiration of the existing programming contract. In addition to the requirements of § 76.7, the complainant shall have the burden of proof to demonstrate the following in its petition:

(i) The complainant is likely to prevail on the merits of its complaint;

(ii) The complainant will suffer irreparable harm absent a stay;

(iii) Grant of a stay will not substantially harm other interested parties; and

(iv) The public interest favors grant of a stay.

(2) The defendant multichannel video programming distributor upon which a petition for temporary standstill is served shall answer within ten (10) days of service of the petition, unless otherwise directed by the Commission.

(3) If the Commission grants the temporary standstill, the adjudicator deciding the case on the merits (i.e., either the Chief, Media Bureau or an administrative law judge) will provide for remedies that are applied as of the expiration date of the previous programming contract.
