8. The estimated number of annual respondents: 79 (10 NRC licensees and 60 Agreement State licensees).

9. An estimate of the total number of hours needed annually to complete the requirement or request: 32,690.

10. Abstract: Part 36 contains requirements for the issuance of a license authorizing the use of sealed sources containing radioactive materials in irradiators used to irradiate objects or materials for a variety of purposes in research, industry, and other fields. The subparts cover specific requirements for obtaining a license or license exemption, design and performance criteria for irradiators; and radiation safety requirements for operating irradiators, including requirements for operator training, written operating and emergency procedures, personnel monitoring, radiation surveys, inspection, and maintenance. Part 36 also contains the recordkeeping and reporting requirements that are necessary to ensure that the irradiator is being safely operated so that it does not pose any danger to the health and safety of the general public and the irradiator employees.
