regard to the preferred alternative identified in the EA.

**Determination**

Based on APHIS’ analysis of field and laboratory data submitted by Syngenta, references provided in the petition, peer-reviewed publications, information analyzed in the EA, the plant pest risk assessment, comments provided by the public, and information provided in APHIS’ response to those public comments, APHIS has determined that Syngenta’s cotton event CO67B is unlikely to pose a plant pest risk and therefore is no longer subject to our regulations governing the introduction of certain genetically engineered organisms.

Copies of the signed determination document, as well as copies of the petition, plant pest risk assessment, EA, finding of no significant impact, and response to comments are available as indicated in the **ADDRESSES** and **FOR FURTHER INFORMATION CONTACT** sections of this notice.

**Authority:** 7 U.S.C. 7701–7772 and 7781–7786; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 23rd day of September 2011.

**Kevin Shea,**  
Acting Administrator, Animal and Plant Health Inspection Service.

[Docket No. APHIS–2011–0077]

**Notice of Availability of a Pest Risk Analysis for the Importation of Fresh Tejocote Fruit From Mexico**

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Notice.

**SUMMARY:** We are advising the public that we have prepared a pest risk analysis that evaluates the risks associated with the importation into the continental United States of fresh tejocote fruit from Mexico. Based on this analysis, we believe that the application of one or more designated phytosanitary measures will be sufficient to mitigate the risks of introducing or disseminating plant pests or noxious weeds via the importation of fresh tejocote fruit from Mexico. We are making the pest risk analysis available to the public for review and comment.

**DATES:** We will consider all comments that we receive on or before November 28, 2011.

**ADDRESSES:** You may submit comments by either of the following methods:

- **Federal eRulemaking Portal:** Go to http://www.regulations.gov/  
  #!documentDetail;D=APHIS-2011-0077-0001.
- **Postal Mail/Commercial Delivery:** Send your comment to Docket No. APHIS–2011–0077, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238.

**FOR FURTHER INFORMATION CONTACT:** Mr. David B. Lamb, Import Specialist, RPM, PHP, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737; (301) 734–0627.

**SUPPLEMENTARY INFORMATION:**

**Background**

Under the regulations in “Subpart—Fruits and Vegetables” (7 CFR 319.56–1 through 319.56–51, referred to below as the regulations), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture prohibits or restricts the importation of fruits and vegetables into the United States from certain parts of the world to prevent plant pests from being introduced into and spread within the United States.

Section 319.56–4 contains a performance-based process for approving the importation of commodities that, based on the findings of a pest-risk analysis, can be safely imported subject to one or more of the designated phytosanitary measures listed in paragraph (b) of that section. APHIS received a request from the national plant protection organization (NPPO) of Mexico to allow the importation of fresh tejocote fruit (Crataegus pubescens) from Mexico into the continental United States. Currently, fresh tejocote fruit is not authorized for entry from Mexico. We have completed a pest risk analysis for the purpose of evaluating the pest risks associated with the importation of fresh tejocote fruit into the continental United States. The analysis consists of a pest list identifying pests of quarantine significance that are present in Mexico and could follow the pathway of importation into the United States and a risk management document identifying phytosanitary measures that could be applied to the commodity to mitigate the pest risk.

We have concluded that fresh tejocote fruit can be safely imported into the continental United States from Mexico using one or more of the five designated phytosanitary measures listed in § 319.56–4(b). The measures we selected are:

- Fresh tejocote fruit may be imported into the continental United States in commercial consignments only.
  - Each consignment of fresh tejocote fruit must be accompanied by a phytosanitary certificate issued by the NPPO of Mexico stating that the fresh tejocote fruit in the consignment has been inspected and is free of pests.
  - Each shipment of fresh tejocote fruit is subject to inspection upon arrival at port of entry to the United States.

Therefore, in accordance with § 319.56–4(c), we are announcing the availability of our pest risk analysis for public review and comment. The pest risk analysis may be viewed on the Regulations.gov Web site or in our reading room (see **ADDRESSES** above for a link to Regulations.gov and information on the location and hours of the reading room). You may request paper copies of the pest risk analysis by calling or writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. Please refer to the subject of the pest risk analysis you wish to review when requesting copies.

After reviewing any comments we receive, we will announce our decision regarding the import status of fresh tejocote fruit from Mexico in a subsequent notice. If the overall conclusions of the analysis and the Administrator’s determination of risk remain unchanged following our consideration of the comments, then we will begin issuing permits for the importation of fresh tejocote fruit from Mexico into the continental United States subject to the requirements specified in the risk management document.

**Authority:** 7 U.S.C. 450, 7701–7772, and 7781–7786; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.3.
Notice of Availability of a Pest Risk Analysis for the Importation of Pomegranate From India Into the Continental United States

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice; request for comments.

SUMMARY: We are advising the public that we have prepared a pest risk analysis that evaluates the risks associated with the importation into the continental United States of fresh pomegranate fruit from India. Based on that analysis, we believe that the application of one or more designated phytosanitary measures will be sufficient to mitigate the risks of introducing or disseminating plant pests or noxious weeds via the importation of fresh pomegranate fruit from India. We are making the pest risk analysis available to the public for review and comment.

DATES: We will consider all comments that we receive on or before November 28, 2011.

ADDRESSES: You may submit comments by either of the following methods:
• Postal Mail/Commercial Delivery: Send your comment to Docket No. APHIS–2011–0087, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at http://www.regulations.gov/#!docketDetail;D=APHIS-2011-0087 or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue, SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To ensure that someone is there to help you, please call (202) 690–2817 before coming.

FOR FURTHER INFORMATION CONTACT: Ms. Donna L. West, Senior Import Specialist, RPM, PHP, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737; (301) 734–0627.

SUPPLEMENTARY INFORMATION:

Background

Under the regulations in “Subpart—Fruits and Vegetables” (7 CFR 319.56–1 through 319.56–51, referred to below as the regulations), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture prohibits or restricts the importation of fruits and vegetables into the United States from certain parts of the world to prevent plant pests from being introduced into and spread within the United States.

Section 319.56–4 contains a performance-based process for approving the importation of commodities that, based on the findings of a pest risk analysis, can be safely imported subject to one or more of the designated phytosanitary measures listed in paragraph (b) of that section.

APHIS received a request from the Government of India to allow the importation of fresh pomegranate fruit (Punica granatum L.) from India into the continental United States. Currently, fresh pomegranate fruit is not authorized for entry from India. We have completed a pest risk analysis for the purpose of evaluating the pest risks associated with the importation of fresh pomegranate fruit into the continental United States. The analysis consists of a pest list identifying pests of quarantine significance that are present in India and could follow the pathway of importation into the United States and a risk management document identifying phytosanitary measures that could be applied to the commodity to mitigate the pest risk.

We have concluded that fresh pomegranate fruit can be safely imported into the continental United States from India using one or more of the five designated phytosanitary measures listed in §319.56–4(b). The requirements for shipments of fresh pomegranate fruit from India would be as follows:

• The fresh pomegranate fruit may be irradiated in accordance with 7 CFR part 305 with a minimum absorbed dose of 400 Gy;
• If the irradiation treatment is applied outside the United States, each consignment of fresh pomegranate fruit must be jointly inspected by APHIS and the national plant protection organization (NPPO) of India and accompanied by a phytosanitary certificate attesting that the fruit received the required irradiation treatment and was inspected and found free of the mite Tenuipalpus granati, the false spider mite (Tenuipalpus punicae), and the bacterium Xanthomonas axonopodis pv. Punicae;
• If irradiation is applied upon arrival in the United States, each consignment of fresh pomegranate fruit must be inspected by the NPPO of India prior to departure and accompanied by a phytosanitary certificate with an additional declaration that the fruit was inspected and found free of the mite Tenuipalpus granati, the false spider mite (Tenuipalpus punicae), and the bacterium Xanthomonas axonopodis pv. Punicae; and
• The fresh pomegranate fruit is subject to inspection upon arrival at the U.S. port of entry.

Therefore, in accordance with §319.56–4(c), we are announcing the availability of our pest risk analysis for public review and comment. The pest risk analysis may be viewed on the Regulations.gov Web site or in our reading room (see ADDRESSES above for a link to Regulations.gov and information on the location and hours of the reading room). You may request paper copies of the pest risk analysis by calling or writing to the person listed under FOR FURTHER INFORMATION CONTACT. Please refer to the subject of the pest risk analysis you wish to review when requesting copies.

After reviewing any comments we receive, we will announce our decision regarding the import status of fresh pomegranate fruit from India in a subsequent notice. If the overall conclusions of the analysis and the Administrator’s determination of risk remain unchanged following our consideration of the comments, then we will authorize the importation of fresh pomegranate fruit from India into the continental United States subject to the requirements specified in the risk management document.

Done in Washington, DC, this 23rd day of September 2011.

Kevin Shea,
Acting Administrator, Animal and Plant Health Inspection Service.
