The AOAC Use-dilution method (UDM), is currently accepted by EPA for regulatory purposes to measure the efficacy of liquid hospital disinfectants against *Staphylococcus aureus*, *Pseudomonas aeruginosa* and *Salmonella enterica* on hard non-porous surfaces. In addition to using the method for registration purposes, the method is currently in use as part of the post market Antimicrobials Testing Program. The workshop is being held to discuss current and proposed revisions mainly associated with the *S. aureus* and *P. aeruginosa* methodologies, which are designed to further optimize and standardize the UDM, and to discuss the data associated with these revisions. At the workshop, the UDM method will be discussed along with the status and implementation of a new test method, the OECD Quantitative Method for Evaluating Bactericidal Activity of Microbicides Used on Hard, Non-Porous

Surfaces (OECD method), will be discussed. The OECD Method recently underwent a multi-laboratory ring trial and the EPA is interested in adopting the OECD method for regulatory purposes. The method is based on test guidelines from the (OECD), an intergovernmental organization consisting of 30 industrialized countries in Europe, North America, Asia and the Pacific. Through its Environment Program, OECD works to help countries manage the risks of chemicals as efficiently and effectively as possible.

This is a technical meeting for individuals with laboratory expertise in conducting the UDM and OECD procedures or who plan to conduct these methods in the future. The detailed agenda for the workshop is available in the docket.
