I. Background on the Montana Program

Section 503(a) of the Act permits a State to assume primacy for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders by demonstrating that its State program includes, among other things, “a State law which provides for the regulation of surface coal mining and reclamation operations in accordance with the requirements of this Act * * *; and rules and regulations consistent with regulations issued by the Secretary pursuant to this Act.” See 30 U.S.C. 1253(a)(1) and (7). On the basis of these criteria, the Secretary of the Interior conditionally approved the Montana program on April 1, 1980. You can find background information on the Montana program, including the Secretary’s findings, the disposition of comments, and conditions of approval of the Montana program in the April 1, 1980, Federal Register (45 FR 21560). You can also find later actions concerning Montana’s program and program amendments at 30 CFR 926.15 and 926.30.

II. Description of the Proposed Amendment

By letter dated June 7, 2011, Montana sent us a proposed amendment to its program (Administrative Record Docket ID No. OSM–2011–0011) under SMCRA (30 U.S.C. 1201 et seq.). Montana submitted the amendment to include changes made to the MSUMRA as a result of the Montana Legislature’s 2011 passage of a Senate Bill relating to coal beneficiation. Under the Senate Bill, a “coal beneficiation plant” means a commercial facility where coal is subject to coal preparation that is not operated, owned, or controlled by the mine operator providing the coal.

Specifically, Montana proposes to amend the MSUMRA to (1) differentiate a coal beneficiation plant from a coal preparation plant by way of ownership, control, or operation by someone other than the mine operator of the mine providing the coal; and (2) clarify that a “coal preparation plant” means a facility “in connection with a strip-mine or underground coal mine” and the term does not mean “a facility where coal is prepared and then converted into another energy form or to a gaseous or liquid hydrocarbon; or a coal beneficiation plant.” As a result of these changes, the Department of Environmental Quality would no longer have regulatory authority through MSUMRA over facilities that meet the definition of a “coal beneficiation plant.” The full text of the program amendment is available for you to read at the locations listed above under ADDRESSES.

III. Public Comment Procedures

Under the provisions of 30 CFR 732.17(h), we are seeking your comments on whether the amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If we approve the amendment, it will become part of the Montana program.

I. Background on the Montana Program

Section 503(a) of the Act permits a State to assume primacy for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders by demonstrating that its State program includes, among other things, "a State law which provides for the regulation of surface coal mining and reclamation operations in accordance with the requirements of this Act * * *; and rules and regulations consistent with regulations issued by the Secretary pursuant to this Act." See 30 U.S.C. 1253(a)(1) and (7). On the basis of these criteria, the Secretary of the Interior conditionally approved the Montana program on April 1, 1980. You can find background information on the Montana program, including the Secretary’s findings, the disposition of comments, and conditions of approval of the Montana program in the April 1, 1980, Federal Register (45 FR 21560). II. Description of the Proposed Amendment

By letter dated July 20, 2011, Montana sent us a proposed amendment to its program (Administrative Record Docket ID No. OSM–2011–0012) under SMCRA (30 U.S.C. 1201 et seq.). Montana submitted the amendment to include changes made to the MSUMRA as a result of the 2011 Montana Legislature passage of Senate Bill 286 relating to coal prospecting.

Specifically, Montana proposes to amend the MSUMRA to modify the coal prospecting procedures to allow for a new type of coal prospecting permit (shortened prospecting permitting process) with expedited timeframes when prospecting is conducted to determine the location, quantity, and quality of coal that is (1) outside an area
