POSTAL SERVICE

39 CFR Part 111

New Standards for Domestic Mailing Services

AGENCY: Postal Service™.

ACTION: Proposed rule.

SUMMARY: In October 2011, the Postal Service filed a notice of mailing services price adjustments with the Postal Regulatory Commission (PRC), effective on January 22, 2012. This proposed rule contains the revisions to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM®) that we would adopt to implement the changes coincident with the price adjustments.

DATES: We must receive comments on or before November 23, 2011.

ADDRESSES: Mail or deliver written comments to the manager, Product Classification, U.S. Postal Service®, 475 L'Enfant Plaza, SW., Room 4446, Washington, DC 20260-5015. You may inspect and photocopy all written comments at USPS® Headquarters Library, 475 L'Enfant Plaza, SW., 11th Floor N, Washington, DC by appointment only between the hours of 9 a.m. and 4 p.m., Monday through Friday by calling 1-202-268-2906 in advance. E-mail comments, containing the name and address of the commenter, may be sent to:

MailingStandards@usps.gov, with a subject line of "January 2012 Domestic Mailing Services Proposal." Faxed comments are not accepted.

FOR FURTHER INFORMATION CONTACT: Bill Chatfield, 202-268-7278.

SUPPLEMENTARY INFORMATION: Proposed prices will be available under Docket Number(s) R2012-3 on the Postal Regulatory Commission's Web site at <http://www.prc.gov>.

The Postal Service's proposed rule includes: Several mail classification changes, modifications to mailpiece characteristics, and changes in classification terminology.

Proposed Change for Letters

Commercial First-Class Mail Letters

The pricing structure for presorted and automation First-Class Mail® letters is proposed to change so that the

minimum postage charge would be for a 2-ounce letter instead of the current 1-ounce minimum postage charge.

We also remove standards for Reply Rides Free, because the program ends on December 31, 2011.

Commercial First-Class Mail and Standard Mail Letters

The Postal Service proposes to modify the process of submitting mailpieces to the Pricing and Classification Service Center (PCSC) for testing and to delete the provision that pieces with attached release cards be sent to Engineering.

Standard Mail Nonmachinable Letters

The USPS proposes to clarify that overflow Standard Mail® nonmachinable letters that mailers place into existing trays at another level would require matching documentation.

Proposed Changes for Flats

Automation Flats

The USPS proposes to clarify 301.3.0 to add that automation flats must meet the standards for all flats in 301.1.0 as well as the standards in 301.3.0.

Periodicals Flats

Currently, Periodicals flats are allowed on mixed area distribution center (MADC) pallets only when the flats are sacked. This proposed rule would allow bundles of Periodicals flats to be placed directly on MADC pallets and would assign a specific price for MADC pallets as well.

We propose to revise a price categorization under nonmachinable flats to insert the correct categorization of nonmachinable flats-nonbarcoded.

Detached Address Labels Used With Flats

The Postal Service proposes to add a new term to identify detached address labels (DALs) with advertising. Inclusion of advertising turns DALs into dual purpose pieces—optional addressing vehicles and marketing vehicles. A DAL with advertising on either side would be a type of DAL named as a detached marketing label (DML). Both DALs and DMLs could be used with saturation flats or with Standard Mail Marketing parcels.

Proposed Changes for Parcels

Machinable Parcels

To align the standards for machinable parcels with current mail processing equipment capability, the Postal Service proposes to change the dimensional criteria for all machinable parcels from the current 34 inches x 17 inches x 17 inches to 27 inches x 17 inches x 17

inches. We would additionally change the maximum weight of a machinable parcel from 35 pounds to 25 pounds for all parcels except those mailed as Parcel Select® or Parcel Return Service. We also propose to modify the processes by which parcels that do not fully meet the machinability standards are evaluated for machinability. In addition, the Postal Service proposes to clarify that parcels that meet the lightweight machinable parcel standards are definitively categorized as machinable parcels.

Standard Mail Parcels

Standard Mail regular parcels would be separated into two groups, Marketing parcels and parcels that will become Parcel Select Lightweight™ parcels. Nonprofit Standard Mail parcels would have separate standards for Nonprofit Marketing parcels and other Nonprofit parcels.

Marketing parcels are defined as containing information and/or product samples whose purposes are to encourage recipients to purchase a product or service, make a contribution, support a cause, form a belief or opinion, take an action, or provide information to recipients. These parcels would be required to bear an alternative addressing format (occupant or exceptional addressing, or simplified addressing when allowed for saturation mail), and would be presented for mailing in carrier route (basic, high-density, or saturation sortation) or presort separations. All Marketing parcels would have a maximum size of 12 inches by 9 inches by 2 inches thick. When DALs are used with Marketing parcels, the weight of the DALs is added to the parcels in determining postage as is currently the case, but there would be no separate charge for the DALs.

Not Flat-Machinables (NFM)

In 2007, the USPS created a temporary NFM price category for Standard Mail items that could not meet revised automation flats standards. In the revised proposed rule **Federal Register** published on February 6, 2009 (74 FR 6250–6257), the Postal Service announced our intention to discontinue the NFM category in May 2010. In the March 25, 2010 *Postal Bulletin* (No. 22281), we announced that the NFM price category would be extended. We now propose to end the NFM category as of January 2012. Pieces that would have been mailed as NFMs should qualify as either Standard Mail Marketing parcels or Parcel Select Lightweight parcels.

Package Services Pieces

The Postal Service proposes to eliminate the provision to provide free local forwarding for Package Services pieces.

The USPS also proposes to discontinue the 3-cent barcode discount for all BPM, Media Mail®, and Library Mail parcels.

Special, Extra, and Other Services

Adult Signature

The Postal Service proposes to permit the use of a hard copy PS Form 3811, *Domestic Return Receipt*, with Adult Signature service when used with Express Mail® or Priority Mail®, including shipments made under the Prevent All Tobacco Cigarettes Trafficking (PACT) Act. A return receipt fee would be charged in addition to regular postage and the Adult Signature fee.

Customers eligible to mail cigarettes and smokeless tobacco under the business/regulatory purposes and consumer testing exceptions of the PACT Act are currently limited to shipping via Express Mail with Hold for Pickup service. This proposed rule will offer additional options: Express Mail with Adult Signature or Priority Mail with Adult Signature.

Confirm

The Postal Service proposes to discontinue Confirm service as a paid subscription service and to replace it with “IMb™ Tracing,” which will provide scan data similar to that provided through Confirm service, but with no paid subscription service required.

Waiver of Annual Mailing Fees for Full-Service Automation Mailings

The Postal Service proposes to revise certain requirements for mailers who present full-service (Intelligent Mail®) automation mailings. When mailers present only full-service automation mailings of First-Class Mail or Standard Mail letters and flats or BPM flats with 90 percent or more pieces qualifying for full-service automation prices, the Postal Service proposes to waive payment of the annual mailing fees for mailings presented under specific permits. As an additional allowance, when mailers present only qualifying full-service automation mailings with permit imprint indicia, those mailings will be able to be presented at any *PostalOne!*® acceptance office without payment of an additional permit imprint application fee or payment of an annual mailing fee at the other office(s).

Post Office Boxes

The Postal Service proposes to add a new 3-month prepaid payment option, only available via recurring automatic payments, for Post Office Box service.

Stamp Fulfillment Services

Currently, the Postal Service charges a standard fee for most Stamp Fulfillment Services orders; however Stamp Fulfillment Services shipping fees are not identified in the DMM nor listed in Notice 123-*Price List*. However, the fees are subject to regulation by the PRC.

The USPS proposes to add new DMM language to explain that there are fees associated with Stamp Fulfillment Services and to refer customers to Notice 123 for the prices. A single standard fee is charged for orders up to \$50, and a higher fee for larger orders.

Stationery

Currently, the USPS does not offer postcard stationery sheets that easily fit on standard computer printers. We propose to offer four perforated postcards on an 8½ inches x 11 inches sheet that would allow customers to feed them readily into computer printers. Once separated, each card will be 4¼ inches x 5½ inches.

Additionally, the USPS does not currently offer personalized stamped postcards. This proposed rule will allow customers to purchase stamped postcards with pre-printed return addresses.

Although we are exempt from the notice and comment requirements of the Administrative Procedure Act [5 U.S.C. of 553(b), (c)] regarding proposed rulemaking by 39 U.S.C. 410(a), we invite public comments on the following proposed revisions to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM), incorporated by reference in the *Code of Federal Regulations*. See 39 CFR 111.1.

[Renumber current 3.1 through 3.6 as new 3.2 through 3.7 and add new 3.1 as follows:]

3.1 Processing Categories

USPS categorizes parcels into one of three mail processing categories: machinable, irregular, or outside parcel. These categories are based on the physical dimensions of the piece, regardless of the placement (orientation) of the delivery address on the piece.

[Revise 2.3 to read as follows:]

The nonmachinable prices in 243.1.0 apply to Standard Mail letter-size pieces that have one or more of the nonmachinable characteristics in 2.1. Mailers must prepare all nonmachinable letters as described in 245.5.0.

[Revise the text of 3.4.1 as follows:]

A letter-size mailpiece containing one disc and meeting the general standards in 3.0 and the specific standards in 3.4.3 is considered automation-compatible. A mailpiece with one enclosed disc not meeting these standards must be tested and approved for automation-compatibility. For this purpose, mailers must submit 5 sample mailpieces and a written request to the local postmaster or business mail entry manager for submission to the Pricing and Classification Service Center.

* * * * *

3.12 Flexibility Standards for Automation Letters

3.12.2 USPS Services for Flexibility Testing

[Revise the text of 3.12.2 as follows:]

A mailer requesting flexibility testing for letter-size mailpieces must submit at least 5 mailpieces and a written request to their local postmaster or business mail entry manager for submission to the Pricing and Classification Service Center (PCSC) at least 6 weeks before the mailing date. The request must describe mailpiece contents and construction, number of pieces being produced, and preparation level. The PCSC will evaluate the piece and, if warranted, will instruct the mailer to submit samples to USPS Engineering for testing. The PCSC advises the mailer of its findings. If the mailpiece is approved, the letter includes a unique number identifying the piece and serves as evidence that the piece meets the relevant standards. A copy of the letter must accompany each postage statement submitted for mailings of the approved piece. If requested by the USPS, the

mailer must show that pieces presented for mailing are the same as those approved.

Any fraction of an ounce is considered a whole ounce. For example, if a piece weighs 2.2 ounces, the weight (postage) increment is 3 ounces. For example, overflow pieces for a 5-digit destination may be placed into an existing correct 3-digit tray; if a 3-digit tray that includes the 5-digit destination does not exist, the overflow pieces may

be placed into the correct existing ADC tray. Bundle the overflow pieces separately with the correct presort bundle label or OEL; the pieces will still qualify for the 5-digit price. * * * * *

1.5.4 Exception

[Revise 1.5.4 as follows:]

Mailers of parcels that do not conform to the machinability criteria in 1.5.1 or 1.5.2 may request authorization to mail such parcels as machinable parcels by contacting the manager, Pricing and Classification Service Center (PCSC; see 608.8.1 for address). The manager, PCSC, in conjunction with the manager, Operations Integration and Support, may authorize such parcels as machinable if the parcels are tested on NDC parcel sorters and prove to be machinable. Mailers requesting testing of parcels for machinability must:

a. Submit a written request and two sample parcels to the PCSC. The request must list the mailpiece characteristics for every shape, weight, construction, and size to be considered. If the request describes a mailpiece that falls within the specifications of pieces that were tested previously, the mailpiece may not require testing.

b. State the estimated number of parcels to be mailed in the next 12 months, and the anticipated preparation level (e.g., destination NDC pallets).

c. Upon acknowledgement from the manager, Operations Integration and Support, the mailer may be required to send 100 mailpiece samples to the designated test facility at least 6 weeks prior to the first mailing date. The USPS may recommend changes to physical characteristics of the mailpieces, and additional testing of the redesigned pieces, before authorizing parcels as machinable.

2.0 Additional Physical Standards by Class of Mail

* * * * *

[Revise the title of 2.4 to read as follows:]

2.4 Standard Mail Parcels

2.4.2 Marketing Parcels

Marketing parcels do not meet letters or flats standards and have the following characteristics:

a. Height not more than 9 inches high. Minimum height must be 3½ inches if the parcel is ¼ inch thick or less.

b. Length not more than 12 inches long. Minimum length must be 5 inches if the parcel is ¼ inch thick or less.

c. Thickness at least 0.009 thick, but not more than 2 inches.

* * * * *

1.2 Delivery and Return Address

[Revise 1.2 by reorganizing the text and adding a new last sentence to read as follows:]

The delivery address specifies the location to which the USPS is to deliver a mailpiece (see 602 for more information). Except for pieces prepared with detached address labels under 602.4.0, each mailpiece must have a visible and legible delivery address only on the side of the piece bearing postage. A return address is required in specific circumstances (see 3.2 and 602.1.5). Standard Mail Marketing parcels (see 443) must use an alternative addressing format under 602.3.0.

First-Class Package Service parcels and Standard Mail irregular parcels bearing POSTNET barcodes representing only the postal routing barcode (destination ZIP Code) are eligible to be mailed using eVS under 705.2.9. POSTNET barcodes may not be used on eVS parcels bearing concatenated GS1–128 barcodes.

4.3.1 General Placement of POSTNET Barcodes

[Revise text of 4.3.1 by deleting references to Not Flat-Machinable piece under 6 ounces and revising other text to read as follows:]

On a First-Class Package Service parcel or Standard Mail irregular parcel, the POSTNET barcode may be anywhere on the address side at least ⅛ inch from any edge of the piece. Print POSTNET barcodes according to 708.4.0. Address block barcodes are subject to 4.3.2.

4.2 Minimum Per Piece Prices

The minimum per piece prices (i.e., the minimum postage that must be paid for each piece) apply as follows:

* * * * *

[Revise text of item 4.2c as follows:]

c. Individual Prices. There are separate minimum per piece prices for each product and, within each product, for the presort and destination entry levels within each mailing. 14.0 Confirm Service and IMb Tracing

[Delete the current text of 14.1 through 14.4 and replace with the following:]

14.1 Basic Information

14.1.1 General Information

IMb Tracing is a replacement for Confirm service. Participation in Confirm service is limited to those customers who have already paid for a current subscription until the subscription expires. After the expiration of a Confirm subscription, IMb Tracing provides the same basic information as Confirm, but is available at no charge without a subscription.

Requirements for participation in IMb Tracing are the use of the Intelligent Mail barcode, the use of a Mailer Identifier that has been registered (via the Business Customer Gateway, accessible on usps.com) to receive scan data, and verification by the Postal Service that the Intelligent Mail barcode (IMb) as printed meets all applicable postal standards.

14.1.2 Description of Service

IMb Tracing (and Confirm) provides a mailer with data electronically collected from the scanning of barcoded mailpieces as they pass through automated mail processing operations. Scanned data can include the postal facility where such pieces are processed, the postal operation used to process the pieces, the date and time when the pieces are processed, and the numeric equivalent of a barcode(s) that help to identify the specific pieces. Any piece intended to generate scanned data must meet the physical characteristics and standards in 14.0, although not every piece is guaranteed such data or complete data. This service does not provide proof of delivery. Existing users must convert to the use of an IMb to receive data once existing subscriptions expire.

14.1.3 Availability

IMb Tracing is available to mailers for obtaining scan data for automation-compatible letter-size and automation-compatible flat-size mail.

14.2 Barcodes

14.2.1 General Barcode Requirements

Each piece in a mailing that is intended to generate IMb Tracing information must bear an Intelligent Mail barcode under 14.2.2. Until the time when their current Confirm subscription expires, mailers may use PLANET Code barcodes and POSTNET barcodes under the provisions in Publication 197, Confirm Service Featuring OneCode Confirm, accessible online at http://ribbs.usps.gov. Otherwise, mailers must apply Intelligent Mail barcodes under 708.4.0 and the following standards:

- a. Reply pieces must meet the following standards:
1. For Business Reply Mail, the piece must bear a barcode that corresponds to the subscriber's Business Reply Mail ZIP+4 codes assigned by the USPS under 507.9.0.
2. For other reply mail, the piece must bear a barcode that correctly corresponds to the delivery address.
b. Outgoing pieces must bear an Intelligent Mail barcode that correctly corresponds to the delivery address.

14.2.2 Intelligent Mail Barcode Requirements

To obtain IMb Tracing, mailers apply Intelligent Mail barcodes on letter-size pieces or on flat-size pieces meeting automation-compatibility standards in 201.3.0 (letters) or 301.3.0 (flats). No other barcode use is acceptable on these pieces. Only one Intelligent Mail barcode may appear on each piece, according to these standards:

- a. Intelligent Mail barcodes must meet the barcode and format standards in 708.4.0 and in Specification USPS-B-3200 at http://ribbs.usps.gov/.
b. Place barcodes on letters according to 202.5.0, and on flats according to 302.5.0.
