this project. First, any person wishing to obtain legal status by becoming a party to the proceeding for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission’s Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 7 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission’s rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission’s environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission’s environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission’s final order.

The Commission strongly encourages electronic filings of comments, protests, and interventions in lieu of paper using the “eFiling” link at http://

www.ferc.gov. Persons unable to file electronically should submit an original and 7 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at http://www.ferc.gov, using the “eLibrary” link and is available for review in the Commission’s Public Reference Room in Washington, DC. There is an “eSubscription” link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail FERCOnterestSupport@ferc.gov, or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: November 9, 2011.

South Carolina Public Service Authority; Notice of Meeting

The National Marine Fisheries Service (NMFS) has contacted Commission staff regarding a meeting with South Carolina Public Service Authority (SCPSA), licensee for the Santee-Cooper Hydroelectric Project No. 199, and staff to continue discussions of what is needed to complete formal consultation for shortnose sturgeon (Acipenser brevirostrum) under section 7 of the Endangered Species Act. Accordingly, Commission staff will meet with representatives of NMFS and SCPSA, the Commission’s non-federal representative for the Santee-Cooper Project, on Tuesday, November 8, 2011. The meeting will start at 9 a.m. at NMFS’ office at 263 13th Avenue South, St. Petersburg, Florida. All local, state, and federal agencies, and interested parties, are hereby invited to attend and observe this meeting. Questions concerning the meeting should be directed to Dr. Stephanie Bolder of NMFS at (727) 824–5312.

Dated: October 19, 2011.
Kimberly D. Bose,
Secretary.

[Project No. 199–205]

North American Electric Reliability Corporation; Order Approving Interpretation of Reliability Standard; Before Commissioners: Jon Wellinghoff, Chairman; Philip D. Moeller, John R. Norris, and Cheryl A. LaFleur

Issued October 20, 2011.

1. On April 15, 2011, the North American Electric Reliability Corporation (NERC), the Commission-certified Electric Reliability Organization (ERO), submitted a petition for Commission approval of an interpretation of Requirement R10 of Transmission Operations (TOP) Reliability Standard TOP–002–2a (Normal Operations Planning). This Reliability Standard requires, in pertinent part, each balancing authority and transmission operator to maintain plans to evaluate options and establish procedures for the reliable operation of the Bulk-Power System for current day and future operations, as well as coordinate current day and future operations with neighboring balancing authorities and transmission operators. Requirement R10, the subject of NERC’s Petition, addresses the planning required to meet all System Operating Limits and Interconnection Reliability Operating Limits. NERC also requests that the Standard including the interpretation, which would be referred to as Reliability Standard TOP–002–2b, be made effective immediately upon the issuance of an order in this proceeding.

2. In this order, the Commission finds that NERC’s proposed interpretation of Requirement R10 of Reliability Standard TOP–002–2a is just, reasonable, not unduly discriminatory or preferential, and in the public interest. Therefore, the Commission approves the interpretation, referred to as Reliability Standard TOP–002–2b, effective as of the date of this order.

1 Background

3. Section 215 of the Federal Power Act (FPA) requires a Commission-certified ERO to develop mandatory and enforceable Reliability Standards, which are subject to Commission review and approval. Once approved, the Reliability Standards may be enforced by the ERO, subject to Commission oversight, or by the Commission independently. 1
