

acid, 0.5 percent maximum aniline, and 0.25 percent maximum alkali insoluble materials. Sodium salt of sulfanilic acid (sodium sulfanilate) is a granular or crystalline material containing 75 percent minimum sulfanilic acid, 0.5 percent maximum aniline, and 0.25 percent maximum alkali insoluble materials based on the equivalent sulfanilic acid content.<sup>1</sup>

The merchandise is currently classifiable under Harmonized Tariff Schedule of the United States ("HTSUS") subheadings 2921.42.22 and 2921.42.24.90. Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of the orders is dispositive.

#### Continuation of the Orders

As a result of these determinations by the Department and the ITC that revocation of the AD and CVD orders on sulfanilic acid would likely lead to a continuation or recurrence of dumping or a countervailable subsidy, and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act, the Department hereby orders the continuation of the AD orders on sulfanilic acid from the PRC and India and the CVD order on sulfanilic acid from India. U.S. Customs and Border Protection will continue to collect cash deposits at the rates in effect at the time of entry for all imports of subject merchandise. The effective date of the continuation of the orders will be the date of publication in the **Federal Register** of this notice of continuation. Pursuant to section 751(c)(2) of the Act, the Department intends to initiate the next five-year review of the orders not later than 30 days prior to the fifth anniversary of the effective date of continuation.

These five-year (sunset) reviews and this notice are in accordance with section 751(c) of the Act and published pursuant to section 777(i)(1) of the Act.

Dated: October 20, 2011.

**Ronald K. Lorentzen,**

*Deputy Assistant Secretary for Import Administration.*

<sup>1</sup> In response to a request from 3V Corporation, on May 5, 1999, the Department clarified that sodium sulfanilate processed in Italy from sulfanilic acid produced in India is within the scope of the AD and CVD orders on sulfanilic acid from India. See *Notice of Scope Rulings*, 65 FR 41957 (July 7, 2000).

### National Institute of Standards and Technology

[Docket No. 110908574-1561-01]

#### NIST Framework and Roadmap for Smart Grid Interoperability Standards, Release 2.0 (Draft); Request for Comments

**AGENCY:** National Institute of Standards and Technology, Department of Commerce.

**ACTION:** Notice; request for comments.

**SUMMARY:** The National Institute of Standards and Technology (NIST) seeks comments on the draft NIST Framework and Roadmap for Smart Grid Interoperability Standards, Release 2.0. Comments must be received on or before 5 p.m. Eastern time on November 25, 2011. The entire draft version of the NIST Framework and Roadmap for Smart Grid Interoperability Standards, Release 2.0 (Draft), is available online at: <http://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/IKBFramework>.

**DATES:** Comments must be received on or before 5 p.m. Eastern Time on November 25, 2011.

**ADDRESSES:** Written comments may be sent to Office of the National Coordinator for Smart Grid Interoperability, National Institute of Standards and Technology, 100 Bureau Drive, Mail Stop 8100, Gaithersburg, MD 20899-8100 or by e-mail at [nistsgfwcmts@nist.gov](mailto:nistsgfwcmts@nist.gov).

#### FOR FURTHER INFORMATION CONTACT:

Dr. George W. Arnold, National Coordinator for Smart Grid Interoperability, National Institute of Standards and Technology, 100 Bureau Drive, Mail Stop 8100, Gaithersburg, MD 20899-8100; telephone 301-975-2232, fax 301-975-4091; or via e-mail at [nistsgfwcmts@nist.gov](mailto:nistsgfwcmts@nist.gov).

**SUPPLEMENTARY INFORMATION:** Section 1305 of the Energy Independence and Security Act (EISA) of 2007 (Pub. L. 110-140, 121 Stat. 1492) requires the Director of NIST "to coordinate the development of a framework that includes protocols and model standards for information management to achieve interoperability of smart grid devices and systems."

In January, 2010, NIST published the NIST Framework and Roadmap for Smart Grid Interoperability Standards, Release 1.0 (Release 1.0). Release 1.0 described a high-level conceptual reference model for the Smart Grid, identified 75 existing standards that are applicable (or likely to be applicable) to the ongoing development of the Smart

Grid, specified 15 high-priority gaps and harmonization issues for which new or revised standards and requirements are needed, documented action plans with aggressive timelines by which designated standards-setting organizations (SSOs) will address these gaps, and described the strategy to establish requirements and standards to help ensure Smart Grid cybersecurity.

NIST announces the publication of the NIST Framework and Roadmap for Smart Grid Interoperability Standards, Release 2.0 (Release 2.0) (Draft) for public review and comment. The entire draft version of Release 2.0 (Draft) is available online at: <http://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/IKBFramework>. Release 2.0 builds upon the work in Release 1.0 with an update on the progress in closing the previously identified high-priority gaps and additional standards issues that are now being addressed, a description of the recently-formed Smart Grid Interoperability Panel (SGIP), an expanded cybersecurity chapter, and a new testing and certification chapter.

**Request for Comments:** NIST seeks comments on the draft framework and roadmap report. In particular, the agency requests that: Comments be categorized as (1) Technical; (2) editorial; or (3) general. If a comment is not a general comment, please identify the relevant page, line number, and section the comment addresses. Also include a proposal on how to address the comment. Comments should be submitted in accordance with instructions in the **ADDRESSES** section of this notice.

Dated: October 13, 2011.

**Willie E. May,**

*Associate Director for Laboratory Programs.*
