National Highway Traffic Safety Administration

[Docket No. NHTSA-2010-0106; Notice 2]

CFMOTO Powersports, Inc., Denial of Petition for Decision of Inconsequential Noncompliance

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Denial of petition for inconsequential noncompliance.

SUMMARY: CFMOTO Powersports, Inc. (CFMOTO),¹ agent for the Chunfeng Holding Group Hangshou Motorcycles Manufacturing Co., LTD. (formerly known as Zhejiang CFMOTO Power Co., Ltd. (CHG)) has determined that certain model year 2005-2009 CHG Model

CF250T-3(V3) and CF250T-5(V5) motorcycles that CFMOTO imported did not fully comply with paragraph S5.2.1 of 49 CFR 571.123 Federal Motor Vehicle Safety Standard (FMVSS) No. 123, *Motorcycle Controls and Displays*. CFMOTO filed an appropriate report, dated January 13, 2010, pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports*. Specifically, CFMOTO estimated that approximately 6,405 model year 2005-2009 CHG model CF250T-3(V3) and CF250T-5(V5) motorcycles, produced January 1, 2005, through December 31, 2009 are affected (hereafter referred to as "noncompliant vehicles").

Pursuant to 49 U.S.C. 30118(d) and 30120(h), and 49 CFR Part 556, CFMOTO has petitioned for an exemption from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act as amended and rectified, 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential to motor vehicle safety. Notice of receipt of CFMOTO's petition was published, with a 30-day public comment period, on August 10, 2010, in the **Federal Register** (75 FR 49020). No comments were received.

FOR FURTHER INFORMATION CONTACT: For further information on CFMOTO's petition or this decision, contact Mr. Stuart Seigel, Office of Vehicle Safety Compliance, the National Highway Traffic Safety Administration (NHTSA), telephone (202) 366-5287, facsimile (202) 366-7002.

SUPPLEMENTARY INFORMATION: In October 2009, OVSC tested a model year (MY) 2009 V3 CF250T to the performance requirements of FMVSS No. 122 *Motorcycle Brakes* at Transportation Research Center (VRTC) in East Liberty, Ohio. At the conclusion of the testing,² it was noted that the vehicle appeared to not comply with S5.2.1 Control Location and Operation requirements of FMVSS No. 123. Specifically, according to Table 1 row 11 within that standard, the control for the rear wheel brake must be a right foot control unless the vehicle is a motor-driven cycle or a scooter with an automatic clutch in which case the left handlebar actuator is to be used. As the vehicle was equipped with only a left handlebar lever for rear brake actuation, but did not meet the definition of a scooter, and with an advertised 14 horsepower motor, did not meet the definition of a motor-

driven cycle,³ a non-compliance appeared to be present. NHTSA notified CFMOTO of the apparent noncompliance in a letter dated December 4, 2009.

CFMOTO's Analysis of Noncompliance

CFMOTO provided the following arguments to support its contention that the subject noncompliance, (i.e., that the rear wheel brake control is located on the left handlebar instead of a right foot control as required by paragraph S5.2.1 FMVSS No. 123), is inconsequential to motor vehicle safety:

The subject vehicles were manufactured and certified as scooters by CHG. CHG believed that the vehicles met all of the requirements for a scooter under FMVSS No. 123. As a result of the scooter certification the rear wheel brake was placed on the left handlebar.

The placement of the rear brake on the left handlebar should be deemed by the NHTSA as an inconsequential noncompliance, based on the history and safety records of the vehicles. No consumer complaints and no warranty claims or incident reports have been received by CFMOTO or CHG that relate to the lack of a right foot actuated rear wheel brake.

One of the main reasons consumers have been attracted to the subject vehicles is that they have the appearance of a motorcycle and the operation or function of a scooter. Aside from a lack of pass-through leg area, the vehicles are scooters in all technical respects. It is the scooter functionality that has been the driving force behind consumer demand for the vehicles.

Individuals with disabilities prefer the left hand rear brake controls to those of a foot operated actuator. Similarly, many consumers want to upgrade from a scooter to a "motorcycle look" without the complexities of operating a motorcycle and therefore choose the subject vehicles.

In summation, CFMOTO believes that the described noncompliance is inconsequential to motor vehicle safety. Therefore, CFMOTO requests that its petition, to exempt it from providing recall notification of noncompliance as required by 49 U.S.C. 30118 and remedying the recall noncompliance as required by 49 U.S.C. 30120 should be granted.

CFMOTO also stated that CHG has corrected the problem that caused these errors so that they will not be repeated in future production.
