SUPPLEMENTARY INFORMATION: Effective July 1, 2007, the Federal Highway Administration (FHWA) assigned, and the California Department of Transportation (Caltrans) assumed, environmental responsibilities for this project pursuant to 23 U.S.C. 327. Caltrans as the delegated National Environmental Policy Act (NEPA) agency has prepared a Final EIS on a proposal for 6th Street Viaduct Seismic Improvement project in Los Angeles County, California.

The City of Los Angeles (City) and the California Department of Transportation (Caltrans) propose to undertake the seismic improvement of the 6th Street Viaduct over the Los Angeles River (Bridge No. 53C-1880) and the 6th Street Overcrossing, which spans the US 101 Hollywood Freeway (Bridge No. 53-0595). These two bridges comprise a single structure—the 6th Street Viaduct. The project limits would extend along 6th Street from west of southbound (SB) Interstate 5 (I-5) on the east side of the Los Angeles River to Mill Street on the west side of the river.

The project alternatives consist of two Build Alternatives (Alternative 2, Viaduct Retrofit; Alternative 3, Viaduct Replacement) and one No Action Alternative (Alternative 1). Alternative 3, Viaduct Replacement, has been selected as the Preferred Alternative. Under the replacement alternative, the proposed project would correct geometric design and structural detailing deficiencies of the existing viaduct by constructing the replacement to current standards set forth by American Association of State Highway and Transportation officials (AASHTO) and the City of Los Angeles Department of Transportation (LADOT).
