Second, one-on-one interviews will be conducted with approximately 80 key executives from various U.S. ports, port operators, manufacturers, and transportation service providers to identify their specific plans, investment strategies, and perspectives concerning market trends, which are a critical part of the subject of the Study. Finally, MARAD’s on-line Panama Canal Shipper Survey will be conducted to garner information regarding the current decision processes used by “Beneficial Cargo Owners” to determine potential changes to their logistics networks and the contingency plans that have been developed (or will be developed) to address the potential impacts on their costs and routing strategies as a result of the Panama Canal Expansion.
