

research fishery activities by demonstrating 2 subsequent years of compliance with observer regulations at § 635.7.

Selection Process

The HMS Management Division will review all submitted applications that are deemed complete and develop a list of qualified applicants. A qualified applicant is an applicant that has submitted a complete application and has met the selection criteria. Qualified applicants are eligible to be selected to participate in the shark research fishery for 2012. The HMS Management Division will provide the list of qualified applicants without identification information to the SEFSC. The SEFSC will then evaluate the list of qualified applicants and, based on the temporal and spatial needs of the research objectives, the availability of qualified applicants, and the available quota for a given year, will randomly select approximately 10 qualified applicants to conduct the prescribed research. Where there are multiple qualified applicants that meet the criteria, permittees will be randomly selected through a lottery system. If a public meeting is deemed necessary, NMFS will announce details of a public selection meeting in a subsequent **Federal Register** notice.

Once the selection process is complete, NMFS will notify the selected applicants and issue the shark research fishery permits. If needed, NMFS will communicate with the shark research fishery permit holders to arrange a captain's meeting to discuss the research objectives and protocols. The shark research fishery permit holders must contact the NMFS observer coordinator to arrange the placement of a NMFS-approved observer for each shark research trip.

A shark research fishery permit will only be valid for the vessel and owner(s) and terms and conditions listed on the permit, and, thus, cannot be transferred to another vessel or owner(s). Issuance of a shark research permit does not guarantee that the permit holder will be assigned a NMFS-approved observer on any particular trip. Rather, issuance indicates that a vessel may be issued a NMFS-approved observer for a particular trip, and on such trips, may be allowed to harvest Atlantic sharks, including sandbar sharks, in excess of the retention limits described in § 635.24(a). These retention limits will be based on available quota, number of vessels participating in the 2012 shark research fishery, the research objectives set forth by the shark board, and may vary by vessel and/or location. When

not operating under the auspices of the shark research fishery, the vessel would still be able to land non-sandbar, SCS, and pelagic sharks subject to existing retention limits on trips without a NMFS-approved observer. The shark research permit may be revoked or modified at any time and does not confer the right to engage in activities beyond those listed on the shark research fishery permit.

Commercial shark permit holders (directed and incidental) are invited to submit an application to participate in the shark research fishery on an annual basis. Permit applications can be found on the HMS Management Division's Web site at <http://www.nmfs.noaa.gov/sfa/hms/index.htm> or by calling (301) 427-8503. Final decisions on the issuance of a shark research fishery permit will depend on the submission of all required information, and NMFS' review of applicant information as outlined above. The 2012 shark research fishery will start after the opening of the shark fishery and under available quotas as published in a separate **Federal Register** final rule.

RIN 0648-XA774

Marine Mammals; File No. 13927

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of permit.

SUMMARY: Notice is hereby given that a permit has been issued to Dr. James H.W. Hain, Associated Scientists at Woods Hole, Box 721, Woods Hole, MA 02543 to conduct research on North Atlantic right whales (*Eubalaena glacialis*) and humpback whales (*Megaptera novaengliae*).

ADDRESSES: The permit and related documents are available for review upon written request or by appointment in the following offices:

Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376; and

Southeast Region, NMFS, 263 13th Avenue South, Saint Petersburg, FL 33701; phone (727) 824-5312; fax (727) 824-5309.

FOR FURTHER INFORMATION CONTACT: Carrie Hubard or Amy Hapeman, (301) 427-8401.

SUPPLEMENTARY INFORMATION: On December 10, 2008, notice was published in the **Federal Register** (73 FR 75084) that a request for a permit to conduct research on 23 cetacean species had been submitted by the above-named applicant. An additional two species of pinnipeds and four species of sea turtles were listed as animals that could be incidentally harassed as a result of the research. A permit that authorizes some of the activities requested by the applicant has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

Permit No. 13927 authorizes aerial and vessel surveys to study North Atlantic right and humpback whales, Bottlenose (*Tursiops truncatus*) and Atlantic spotted dolphins (*Stenella frontalis*) may be incidentally harassed during research activities. Research may occur annually, December through April off the U.S. southeast coast. The permit is valid through October 31, 2016. Several aspects of the application request have been denied, including: (1) Research off the coast of the northeast United States; (2) takes of pinnipeds, sea turtles, and cetacean species other than those listed above; (3) the use of non-motorized vessels, such as kayaks; (4) research associated with Project II (studies of sightability and survey methodology as relates to Early Warning Systems and mitigation of human impacts, including development and evaluation of new and/or improved research methods); and (5) research associated with Project III.b (feeding behavior of baleen whales).

An environmental assessment (EA) was prepared analyzing the effects of the permitted activities on the human environment in compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*). Based on the analyses in the EA, NMFS determined that issuance of the permit would not significantly impact the quality of the human environment and that preparation of an environmental

impact statement was not required. That determination is documented in a Finding of No Significant Impact (FONSI), signed on October 17, 2011.

As required by the ESA, issuance of this permit was based on a finding that such permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: October 25, 2011.

Acting Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.
