[Doc. #AMS-CN-11-0026C; CN-11-002]

#### Cotton Board Rules and Regulations: Adjusting Supplemental Assessment on Imports; Corrections

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Correcting amendment.

**SUMMARY:** This document contains corrections to the final rule published on August 31, 2011, regarding the Cotton Board Rules and Regulations and the adjustment to the supplemental assessment collected for use by the Cotton Research and Promotion Program. Corrections are made to section 1205.510 of the final rule to remove expired Harmonized Tariff Schedule (HTS) codes and HTS codes representing ensembles, which are strictly used for statistical reporting. Furthermore, conversion factors and assessment rates for two HTS codes, which were inadvertently excluded from the final rule, are added, and clerical errors associated with three different HTS codes are corrected.

**DATES:** *Effective Date:* November 8, 2011.

**FOR FURTHER INFORMATION CONTACT:** Shethir M. Riva, Chief, Research and Promotion Staff, Cotton and Tobacco Programs, AMS, USDA, Stop 0224, 1400 Independence Ave. SW., Room 2635-S, Washington, DC 20250-0224, telephone (540) 361-2726, facsimile (202) 690-1718, or email at [Shethir.Riva@ams.usda.gov](mailto:Shethir.Riva@ams.usda.gov).

**SUPPLEMENTARY INFORMATION:** The final rule (76 FR 54078) amended the Cotton Board Rules and Regulations in 7 CFR 1205.510 by updating the value assigned to imported cotton for the purpose of

calculating supplemental assessments collected for use by the Cotton Research and Promotion Program. The final rule was required to adjust the supplemental assessment and to ensure that assessments collected on imported raw cotton and the cotton content of imported cotton-containing products are the same as assessments collected on domestically produced cotton. In addition, textile trade conversion factors used to determine the raw fiber equivalents of imported cotton-containing products were updated and the number of HTS codes used to assess all imported cotton and cotton-containing products were expanded.

Following the publication of the final rule and during implementation with the U.S. Customs and Border Protection (CBP), eleven HTS codes were determined to have expired and, therefore, are no longer relevant to the assessment of imports which contain cotton. The eleven expired HTS codes are removed from the "Import Assessment Table." In addition, CBP notified the Agricultural Marketing Service (AMS) that the "Import Assessment Table" contained 129 HTS codes which represent ensembles. Ensemble HTS codes are used identify and report statistics on articles that are marketed as a bundle and are composed of identical fabric. CBP does not use ensemble HTS codes for assessment purposes. Rather each article composing an ensemble is assessed using its own HTS code. Therefore, the 129 ensemble HTS codes are removed from the "Import Assessment Table." Two HTS numbers were inadvertently excluded from the final rule. These HTS numbers (5608901000 and 5602906000) along with their conversion factors (1.0852 and 0.5426, respectively) and assessment rates (1.3744 and 0.6872, respectively) are added to the "Import Assessment Table." Finally, clerical errors associated with three HTS numbers published in the final rule are corrected. HTS numbers 5513390011, 5513390015 and 5513390091 should read 5513390111, 5513390115 and 5513390191, respectively.
