SUMMARY:
The U.S. Nuclear Regulatory Commission (NRC) is correcting a notice appearing in the Federal Register on September 1, 2011 (76 FR 54510), that announced the availability of the model application (with model no significant hazards consideration determination) and model safety evaluation (SE) (Agencywide Documents Access and Management System (ADAMS) Accession No. ML111725221) for plant-specific adoption of Technical Specifications Task Force (TSTF) Traveler TSTF–500, Revision 2, “DC Electrical Rewrite—Update to TSTF–360” (ADAMS Accession No. ML092670242). The original Notice of Availability (NOA) published in the Federal Register on September 1, 2011 (76 FR 54510), mistakenly stated that the TSTF–500 was available for adoption under the Consolidated Line Item Improvement Process (CLIP). TSTF–500 is available for adoption, but not under the CLIP. No other information contained in the original NOA has changed.

SUPPLEMENTARY INFORMATION: The U.S. Nuclear Regulatory Commission (NRC or the Commission) has issued renewed Facility Operating License No. R–126, held by the University of Utah (UU, the licensee), which authorizes continued operation of the UU TRIGA Nuclear Reactor (UUTR), located in Salt Lake City, Utah. The UUTR is a pool-type, natural convection, light-water cooled, and shielded TRIGA (Training, Research, Isotope Production, General Atomics) reactor fuel. The UUTR is licensed to operate at a steady-state power level of 100 kilowatts thermal power. The renewed Facility Operating License No. R–126 will expire 20 years from its date of issuance.

The renewed facility operating license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission’s rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission’s regulations in Title 10, Chapter 1, “Nuclear Regulatory Commission,” of the Code of Federal Regulations (10 CFR), and sets forth those findings in the renewed facility operating license. The agency afforded an opportunity for hearing in the Notice of Opportunity for Hearing published in the Federal Register on July 21, 2011 (76 FR 43733–43737). The NRC received no request for a hearing or petition for leave to intervene following the notice. The NRC staff prepared a safety evaluation report for the renewal of Facility Operating License No. R–126 and concluded, based on that evaluation, the licensee can continue to operate the facility without endangering the health and safety of the public. The NRC staff also prepared an Environmental Assessment and Finding of No Significant Impact for the renewal of the facility operating license, noticed in the Federal Register on September 28, 2011 (76 FR 60091–60094), and concluded that renewal of the facility operating license will not have a significant impact on the quality of the human environment.

Dated at Rockville, Maryland, this 31st day of October, 2011.

Acting Chief, Research and Test Reactors Licensing Branch, Division of Policy and Rulemaking, Office of Nuclear Reactor Regulation.
