#### SUPPLEMENTARY INFORMATION:

##### I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) United States Coast Guard (USCG) proposes to update and reissue an existing DHS system of records titled, "DHS/USCG-029 Notice of Arrival and Departure (NOAD) System of Records."

USCG collects information related to NOAD for U.S. vessels in commercial service and all foreign vessels bound for or departing from ports or waterways within the United States. This information is maintained within the Ship Arrival Notification System (SANS), as well as other USCG systems used for screening and vetting of vessels, primarily, but not exclusively, through Marine Information for Safety and Law Enforcement (MISLE), DHS/USCG-013, June 25, 2009, 74 FR 30305 and the Maritime Awareness Global Network (MAGNet) System of Records Notice, DHS/USCG-061, May 15, 2008,

73 FR 28143. Information is retrieved from the SANS by vessel and not by personal identifier; however, USCG uses the information taken from the SANS in other systems to conduct screening and vetting of individuals pursuant to its mission for protecting and securing the maritime sector.

The information that is required to be collected and submitted through Electronic Notice of Arrival and Departure (eNOAD) can be found on routine arrival/departure documents that passengers and crewmembers must provide to DHS when entering or departing the United States. eNOAD information includes complete name, date and place of birth, gender, country of citizenship, travel/mariner document type, number and country of issuance, expiration date, country of residence, status on board the vessel, and U.S. destination address (except for U.S. Citizens, lawful permanent residents, crew and those in transit).

Additionally, vessel carriers and operators must provide the vessel name, vessel country of registry/flag, International Maritime Organization (IMO) number or other official number, voyage number, date of arrival/departure, and foreign port where the passengers and crew members began/terminate their sea transportation to the United States.

USCG will collect vessel particulars that are submitted by the vessel owner, agent, master, operator, or person in charge of a vessel in advance of a vessel's arrival or departure from the U.S. The information will be used to perform counterterrorism, law enforcement, safety and security queries to identify risks to the vessel or to the United States.

The purpose of the information collection is to assess risk to vessels arriving to or departing from a U.S. port and to identify vessels that may pose a safety or security risk to the United States.

The information collection allows USCG to facilitate the effective and efficient entry and departure of vessels into and from the U.S. and assist the USCG with assigning priorities while conducting maritime safety and security missions in accordance with international and U.S. regulations.

NOAD information is maintained for a period of no more than ten years or when no longer needed, whichever is longer, from the date of collection at which time the data is deleted. Should derogatory information be discovered by USCG either through TECS or USCG's own sources, such information would be communicated either through USCG's MAGNet, the Coast Guard
