- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under FOR FURTHER INFORMATION CONTACT.

B. What should I consider as I prepare my comments for EPA?
1. Submitting CBI. Do not submit this information to EPA through www.regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. Tips for preparing your comments.
When submitting comments, remember to:
- Identify the document by docket ID number and other identifying information (subject heading, Federal Register date and page number).
- Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

C. Tips for preparing your comments for EPA.
- Make sure to submit your comments by the comment period deadline identified.

II. What action is the Agency taking?
Under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), at the discretion of the Administrator, a Federal or State agency may be exempted from any provision of FIFRA if the Administrator determines that emergency conditions exist which require the exemption. The Florida Department of Agriculture and Consumer Services (FDACS) has requested the Administrator to issue a specific exemption for the use of streptomycin sulfate on fresh-market grapefruit to control citrus canker. Information in accordance with 40 CFR part 166 was submitted as part of this request.

As part of this request, the applicant asserts that available alternative controls cause phytotoxic effects when used during higher temperatures, and therefore are not adequate to effectively control citrus canker in grapefruit grown for the fresh market. The FDACS claims that significant economic losses are occurring and that this introduced pathogen has become a serious threat to the fresh-market grapefruit industry in the state of Florida.

The Applicant proposes to make no more than two applications per crop of streptomycin sulfate, at a rate of 0.448 lb active ingredient per acre (a.i./A), equivalent to 2 lbs. formulated product per acre. A maximum total of 0.996 lb a.i./Acre (4 lbs product/A) could be applied on up to 54,000 acres of grapefruit in June through September of
2012. Use could potentially occur statewide, but would primarily be in the commercial grapefruit-producing counties of Polk, Hendry, Highlands, De Soto, Hardee, St. Lucie, Indian River, Collier, Manatee and Martin Counties. At maximum rates, applications, and acreage, 48,384 lbs of a.i. (216,000 lbs product) could be used under the proposed program.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 of FIFRA allow for publication of a notice of receipt of an application for a specific exemption if the Administrator determines that publication of a notice is appropriate. The applicant proposes a use of a pesticide containing streptomycin sulfate, which is also used in human and animal treatment as an antibiotic. The notice provides an opportunity for public comment on the application.

The Agency will review and consider all comments received during the comment period in determining whether to issue the specific exemption requested by the Florida Department of Agriculture and Consumer Services.
