DEPARTMENT OF ENERGY

Notice of Intent To Prepare an Environmental Impact Statement and Notice of Potential Floodplain and Wetlands Involvement for the W.A. Parish Post-Combustion CO₂ Capture and Sequestration Project, Southeastern TX

AGENCY: Department of Energy.

ACTION: Notice of Intent to Prepare an Environmental Impact Statement and Notice of Potential Floodplain and Wetlands Involvement.

SUMMARY: The U.S. Department of Energy (DOE) announces its intent to prepare an environmental impact statement (EIS) pursuant to the National Environmental Policy Act of 1969

(NEPA) (42 U.S.C. 4321 *et seq.*), the Council on Environmental Quality's (CEQ) NEPA regulations (40 CFR parts 1500-1508), and DOE's NEPA implementing procedures (10 CFR part 1021), to assess the potential environmental impacts of providing financial assistance for a project proposed by NRG Energy, Inc (NRG). DOE selected NRG's proposed W.A. Parish Post-Combustion CO₂ Capture and Sequestration Project (Parish PCCS Project) for a financial assistance award through a competitive process under the Clean Coal Power Initiative (CCPI) program. NRG would design, construct and operate a commercial-scale carbon dioxide (CO₂) capture facility at its existing W.A. Parish Generating Station (Parish Plant) in Fort Bend County, Texas; deliver the CO₂ via a new pipeline to the existing West Ranch oil field in Jackson County, Texas for use in enhanced oil recovery (EOR) operations; and demonstrate monitoring techniques to verify the permanence of geologic CO₂ storage.

The project would use an amine-based post-combustion technology to capture 90 percent (approximately 1.6 million tons) of the CO₂ annually from a 250-megawatt equivalent (MWe) flue gas slip stream taken from the 617 megawatt (MW) Unit 8 at the Parish Plant. Captured CO₂ would be dried, compressed, and transported about 80 miles in a new pipeline to an existing oil field where it would be used for EOR. The project would demonstrate an integrated commercial-scale deployment of post-combustion CO₂ capture technology for use in EOR operations and long-term geologic storage. DOE selected this project to receive a financial assistance award through a competitive process under Round 3 (second selection phase) of the CCPI program.

The EIS will further inform DOE's decision on whether to provide financial assistance to NRG for the Parish PCCS Project. DOE proposes to provide NRG with up to \$355 million of the overall project cost, which would constitute approximately 42 percent of the estimated \$845 million total (in 2010 dollars). The project would further a specific objective of Round 3 of the CCPI program by demonstrating advanced coal-based technologies that capture and sequester, or put to beneficial use, CO₂ emissions from coal-fired power plants.

The purposes of this Notice of Intent (NOI) are to: (1) Inform the public about DOE's proposed action and NRG's proposed project; (2) announce the public scoping meetings; (3) solicit comments for DOE's consideration

regarding the scope and content of the EIS; (4) invite those agencies with jurisdiction by law or special expertise to be cooperating agencies in preparation of the EIS; and (5) provide notice that the proposed project may involve potential impacts to floodplains and wetlands.

DOE does not have regulatory jurisdiction over the Parish PCCS Project, and its decisions are limited to whether and under what circumstances it would provide financial assistance to the project. As part of the EIS process, DOE will consult with interested federal, state, regional and local agencies and Native American tribes.

DATES: DOE invites comments on the proposed scope and content of the EIS. Comments must be received within 30 days after publication of this NOI in the **Federal Register** to ensure consideration. In addition to receiving comments in writing and by email [See **ADDRESSES** below], DOE will conduct public scoping meetings to provide government agencies, private-sector organizations and the general public with opportunities to present oral and written comments or suggestions with regard to DOE's proposed action, alternatives, and the potential impacts of NRG's proposed project for DOE consideration during development of the EIS. The public scoping meetings will be held at the Needville High School, 100 Fritzella Road, in Needville, Texas, on Wednesday, November 30, 2011; and at the Jackson County Services Building, 411 North Wells Street, in Edna, Texas, on Thursday, December 1, 2011.

Oral comments will be heard during the formal portion of the scoping meetings beginning at 7 p.m. [See Public Scoping Process.] The public is also invited to informal sessions beginning at 5 p.m. at the same locations to learn more about the project and the proposed action. Representatives from DOE and NRG will be present at the informal sessions to discuss the proposed project, the CCPI program, and the EIS process. Displays and other information about DOE's proposed action and NRG's proposed project will also be available.

ADDRESSES: Written comments on environmental concerns about the project, overall scope of the EIS, or requests to participate in the public scoping meetings should be addressed to Mr. Mark W. Lusk, U.S. Department of Energy, National Energy Technology Laboratory, 3610 Collins Ferry Road, P.O. Box 880, Morgantown, WV 26507-0880. Individuals and organizations who would like to provide oral or electronic comments should contact Mr.
