Notice of Intent To Reduce the Frequency of Chemical Use Surveys and All Associated Reports

AGENCY: National Agricultural Statistics Service, USDA.

ACTION: Notice of reduction in data collection and publication.

SUMMARY: This notice announces the intention of the National Agricultural Statistics Service (NASS) to reduce the currently approved information collections for chemical use surveys approved under OMB # 0535-0218. The chemical use surveys included in this docket are: Agricultural Resource

Management Survey Phase II (ARMS II), Vegetable Chemical Use Survey, Fruit Chemical Use Survey, and Post Harvest Chemical Use Survey. The Post Harvest survey was suspended under a previous notice.

The ARMS II Chemical Use Survey is normally conducted every year and it consists of two versions; Production Practices and Costs Report (PPCR), and the Production Practices Report (PPR). The PPCR component is conducted with NASS-only funding to gather field crop chemical use data. The PPCR is co-funded by a cooperative agreement with the USDA Economic Research Service (ERS). The PPCR component efficiently collects costs associated with the various production practices to complete the cost of production estimates for ARMS targeted crop commodities. The ARMS Phase II-PPCR efficiently collects detailed cropping practice and cost data by focusing on field-level and expanding to whole farm, thus greatly reducing respondent burden while maintaining accuracy of reported data.

For the 2011 crop year, NASS is making no changes to the Fruit Chemical Use survey and Field Crops Chemical Use survey. Barley and sorghum are the targeted crops for Field Crops Chemical Use survey. Please note that wheat and soybeans were originally in the 2011 crop year but were moved to 2012 crop year due to current budget cuts.

Background Information

Crop year	NASS commodity	ERS commodity (PPCR)
2011	Fruit	Barley, Sorghum.
2012	Wheat (PPR) and Soybeans	Soybeans.
2013	Vegetable	Rice and Peanuts.
2014	Cotton	Cotton.
2015	Corn and Potatoes (PPR)	To be determined (Corn and Dairy).
2016	Fruit	To be determined (Wheat).
2017	Wheat (PPR) and Soybeans	To be determined (Soybeans).
2018	Corn and Potatoes	To be determined.
2019	Vegetable	To be determined.
2020	Cotton	To be determined.

The crop rotations were determined using the current long range data collection plan. Each of the field crops will be collected three times during the 10 year plan except cotton which will be collected only twice. With the current plan, each commodity would be collected five times. With the proposed crop rotation, fruit and vegetables chemical use would each be collected twice in the 10 year plan while currently the data would be collected five times each.
