U.S. Customs and Border Protection

Notice of Availability of Finding of No Significant Impact for Field Release of Insects for Biological Control of Carrizo Cane

AGENCY: U.S. Customs and Border Protection, DHS.

ACTION: Notice of availability.

SUMMARY: U.S. Customs and Border Protection (CBP) is advising the public of the availability of a Finding of No

Significant Impact (FONSI) for its support of U.S. Department of Agriculture (USDA) research and field release of two insects, the Arundo scale and the Arundo wasp as biological control agents for the non-native and invasive Carrizo cane in the continental United States. To reach this FONSI, CBP examined two Environmental Assessments (EAs) prepared by USDA's Animal and Plant Health Inspection Service (APHIS), performed independent analyses of those EAs, and reached its own findings. The two EAs (APHIS 2009 and 2010) are also being made available through CBP.

DATES: The FONSI is available beginning on November 18, 2011.

ADDRESSES: Copies of the FONSI may be obtained by accessing either of the following Web sites: http://cbp.gov/xp/cgov/border_security/ti/ti_docs/carrizo_fonsi.xml, or http://www.dhs.gov/xabout/laws/editorial_0850.shtm under Environmental Assessments; or by sending a request to Christopher Colacicco of CBP by telephone: (202) 344–1085; by fax: (202) 344–1250; by email:

Christopher.j.colacicco@cbp.dhs.gov; or by writing to: CBP, Attn: Christopher Colacicco, 1300 Pennsylvania Avenue NW., Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: Christopher Colacicco, CBP, Border Patrol Facilities and Tactical Information Program Management Office, telephone (202) 344–1085, email Christopher.j.colacicco@cbp.dhs.gov.

SUPPLEMENTARY INFORMATION:

Background Information

The non-native invasive weed species, Carrizo cane, *Arundo donax* (Poaceae), is prevalent along the southern border of the United States and is an impediment to border security. Among other things, it obscures Border Patrol agents' lines of sight and provides cover to individuals who are attempting to enter the United States illegally. Accordingly, effective control of Carrizo cane is critical in preventing terrorists and terrorist weapons, drugs, and other contraband from entering the United States and in providing a safer work environment for Border Patrol agents. CBP has evaluated various methods of controlling Carrizo cane, including the application of herbicides and mechanical removal; however, CBP remains interested in evaluating other methods of controlling Carrizo cane.
