

demonstration that isotopic ratios in tissue samples from a given species are correlated with those of the prey items included in the diet. As stable isotope composition does not change over time, the isotope signature of seals collected by the historic explorers early in the 20th century will reflect the diet of Weddell seals at that time. These data will be compared to the isotopic signature of Weddell seals in the Ross Sea today. Such data may provide evidence of a potential shift in the diet of this apex predator that might be indicative of ecosystem change.

Draft License Renewal Interim Staff Guidance LR-ISG-2011-05: Ongoing Review of Operating Experience

AGENCY: Nuclear Regulatory Commission.

ACTION: Revision of draft interim staff guidance; request for public comment.

SUMMARY: On August 24, 2011, in the *Federal Register* (76 FR 52995), the U.S. Nuclear Regulatory Commission (NRC) requested public comments on Draft License Renewal Interim Staff Guidance (LR-ISG), LR-ISG-2011-05, "Ongoing Review of Operating Experience." This LR-ISG provides guidance and clarification concerning ongoing review of plant-specific and industry-wide operating experience as an attribute of aging management programs used at nuclear power plants. As noticed on September 20, 2011 (76 FR 58311), the public comment period was extended and, as of October 23, 2011, is now closed. However, since issuing the draft LR-ISG for public comment, the NRC has identified the need to incorporate additional guidance. As such, the NRC is re-issuing draft LR-ISG-2011-05 to request public comments on the changes.
