SUPPLEMENTARY INFORMATION: The Privacy Act of 1974, as amended (5 U.S.C. 552a), requires agencies to publish in the **Federal Register** notice of new or revised systems of records maintained by the agency. A system of records is a group of any records under the control of any agency, from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to an individual.

The Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture (USDA) is proposing to add a new system of records, entitled APHIS Animal Health Surveillance and Monitoring System (AHSM), that will be used to maintain records of activities conducted by the agency pursuant to its mission and responsibilities authorized by the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*); Bovine Johne's Disease Control Program (7 U.S.C. 7629); and the Public Health Security and Bioterrorism Preparedness and Response Act of 2002 (7 U.S.C. 8401).

APHIS' Veterinary Services (VS) program will use the AHSM to collect, manage, and evaluate animal health data for disease control and surveillance programs. The AHSM will assist APHIS in obtaining and analyzing relevant epidemiological information, identifying appropriate response tactics, and effectively responding to an animal disease event in the United States. It will also allow us to identify and notify the owners of animals that have been or may have been exposed in an animal disease event. The AHSM may also be used to document animal health program results to justify expenditures and compile statistical data about animal disease control or surveillance programs.

The AHSM contains modules for the Veterinary Services Laboratory Submissions (VSLS), the National Poultry Improvement Plan (NPIP), and the Mobile Information Management system (MIM).

The AHSM contains personally identifiable information about the individual listed as the contact person for the location where the animals subject to animal disease control or surveillance programs are maintained and the owner of animals involved with animal disease control or surveillance programs. Such information includes name; mailing and physical address, including city, county, State, postal code, and latitude/longitude coordinates; telephone number; email

address; and any animal, sample, or location identification numbers associated with the person. The system also contains information about APHIS employees, cooperators, and contractors who are directly involved in animal disease control or surveillance program activities such as name, home and work address, home and work email addresses, telephone number(s), and any assigned identification numbers.

Routine Uses of Records Maintained in the System, Including Categories of Users and the Purposes of Such Uses

APHIS may routinely share data in the AHSM with certain Federal and State animal health officials or Federal or State wildlife agencies for assistance in conducting, managing, and analyzing animal disease or surveillance programs, and monitoring animal diseases including those related to wildlife, feral animals, or alternative livestock. Data may also be shared with Federal or State agencies involved with public health such as the Departments of Homeland Security and Health and Human Services for the purposes of zoonotic disease surveillance or control activities. APHIS may also share data in the AHSM with the public through a Web site that lists participants in voluntary animal disease certification or quality assurance programs, and lists individuals or entities not in compliance with animal disease regulations. APHIS may also use the Web site to notify individuals who may have acquired exposed or potentially exposed animals when other means of contact are unavailable.

Other routine uses of this information include releases related to investigations pertaining to violations of law or related to litigation. A complete listing of the routine uses for this system is included in the accompanying document that is published along with this notice.

The proposed information collection requests associated with this system have been approved by or submitted for approval by the Office of Management and Budget under the Paperwork Reduction Act.
