1. The vessel operator has a letter of authorization issued by the Regional Administrator on board the vessel;  
2. For the duration of the trip, the vessel fishes, except for transiting purposes, exclusively in the NAFO Regulatory Area and does not harvest fish in, or possess fish harvested in, or from, the U.S. EEZ;  
3. When transiting the U.S. EEZ, all gear is properly stowed in accordance with one of the applicable methods specified in § 648.23(b); and  
4. The vessel operator complies with the HSFPCA permit and all NAFO conservation and enforcement measures while fishing in the NAFO Regulatory Area.

NAFO Conservation and Management Measures

Relevant NAFO Conservation and Enforcement Measures include, but are not limited to, maintenance of a fishing logbook with NAFO-designated entries; adherence to NAFO hail system requirements; presence of an on-board observer; deployment of a functioning, autonomous vessel monitoring system; and adherence to all relevant minimum size, gear, bycatch, and other requirements. Further details regarding these requirements are available from the NMFS Northeast Regional Office, and can also be found in the current NAFO Conservation and Enforcement Measures on the Internet (see ADDRESSES).

Chartering Operations Using Canadian Vessels

In the event that no adequate expressions of interest in harvesting NAFO Division 3LNO yellowtail flounder during 2011 are made on behalf of U.S. vessels, expressions of interest will be considered from U.S. processors and other fishing interests intending to make use of a Canadian vessel under a chartering arrangement. Under the bilateral arrangement with Canada, the United States may enter into a chartering (or other) arrangement with a Canadian vessel to harvest the transferred yellowtail flounder. Prior notification to the NAFO Executive Secretary is necessary in this case. Expressions of interest from U.S. processors and other fishing interests intending to make use of a Canadian vessel under chartering arrangements should provide the following information: the name and registration number of the intended vessel; a copy of the charter; a detailed fishing plan, and a written letter of consent from the Department of Fisheries and Oceans, Canada. In addition, expressions of interest using a Canadian vessel under charter should be accompanied by a detailed description of anticipated benefits to the United States. Such benefits might include, but are not limited to, the use of U.S. processing facilities/personnel; the use of U.S. fishing personnel; marketing of the product in the United States; other specific positive effects on U.S. employment; evidence that fishing by the Canadian vessel will actually take place; and any available documentation of the physical characteristics and economics of the fishery for future use by the U.S. fishing industry.

Any Canadian vessel wishing to enter into a chartering arrangement with the United States must be in full current compliance with the requirements outlined in the NAFO Convention and Conservation and Enforcement Measures including, but not limited to, submission of the following reports to the NAFO Executive Secretary: provisional monthly catches within 30 days following the calendar month in which the catches were made; observer reports within 30 days following the completion of a fishing trip; and an annual statement of actions taken in order to comply with the NAFO Convention; and notification to NMFS of the termination of the charter fishing activities. Furthermore, the United States may also consider the vessel’s previous compliance with NAFO bycatch, reporting and other provisions, as outlined in the NAFO Conservation and Enforcement Measures, before entering into a chartering arrangement. More details on NAFO requirements are available from NMFS (see ADDRESSES).

In the event that multiple expressions of interest are made by U.S. fishing vessels, processors, or interests to fish for NAFO Division 3LNO yellowtail in 2011, the information submitted regarding benefits to the United States will be used in making a selection. After reviewing all requests for allocations submitted, NMFS may decide not to grant any allocations if it is determined that no requests meet the criteria described in this notice. Once a decision has been made regarding the disposition of the fishing opportunity, NMFS will immediately take appropriate steps to notify all applicants and will contact Canada and NAFO to take appropriate action. If the 3LNO yellowtail flounder transferred from Canada is awarded to a U.S. vessel or a specified chartering operation during 2011, it may not be transferred without the express, written consent of NMFS.

Additions

If the Committee approves the proposed additions, the entities of the Federal Government identified in this notice will be required to procure the products and service listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. If approved, the action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the products and service to the Government.
2. If approved, the action will result in authorizing small entities to furnish the products and service to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O’Day Act (41 U.S.C. 46–48c) in connection with the products and service proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.
