AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final action.

SUMMARY: This notice is to announce that on October 27, 2011, the EPA issued a final Outer Continental Shelf (OCS) air permit for Eni US Operating Inc. (Eni). This permit became effective on November 28, 2011. In addition, the EPA issued a final Prevention of Significant Deterioration (PSD) air permit for Port Dolphin Energy, LLC (Port Dolphin), which was issued and became effective on December 1, 2011. The Eni permit regulates air pollutant emissions from the Transocean Pathfinder drillship and support vessels, which Eni intends to operate within lease block Lloyd Ridge 411 on the OCS in the Gulf of Mexico, approximately 154 miles southeast of the mouth of the Mississippi River and 189 miles south of the nearest Florida coast. The operation will last up to two years, and based on applicable permitting regulations, is a “temporary source” for permitting purposes. The Port Dolphin permit will regulate air pollutant emissions from the operation of a liquefied natural gas deepwater port located in federal waters of the Gulf of Mexico, approximately 28 miles off the west coast of Florida, and 42 miles southwest of the pipeline landing at Port Manatee, Florida.

ADDRESSES: The final permits, the EPA’s response to the public comments for the Eni permit, and additional supporting information are available at http://www.epa.gov/region4/air/permits/index.htm. expressed general support for drilling. The EPA carefully reviewed each of the comments submitted, and after consideration of the expressed view of all interested persons, the pertinent federal statutes and regulations, the application and additional material relevant to the application and contained in the administrative record, the EPA made a decision in accordance with 40 CFR part 52.21, 40 CFR part 71 and 40 CFR part 55 to issue a final OCS permit.
