14 CFR Part 71

Proposed Modification of Class E Airspace; Douglas, AZ

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify Class E airspace at Bisbee Douglas International Airport, Douglas, AZ. Decommissioning of the Cochise Very High Frequency Omni-Directional Radio Range Tactical Air Navigational Aid (VORTAC) has made this action necessary for the safety and management of aircraft operations at the airport. This action would also adjust the geographic coordinates of the airport.

DATES: Comments must be received on or before January 30, 2012.

FOR FURTHER INFORMATION CONTACT: Eldon Taylor, Federal Aviation Administration, Operations Support Group, Western Service Center, 1601 Lind Avenue SW., Renton, WA 98057; telephone (425) 203–4537.

Persons interested in being placed on a mailing list for future NPRMs should contact the FAA’s Office of Rulemaking, (202) 267–9677, for a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) Part 71 by modifying Class E surface airspace and Class E airspace extending upward from 700 feet above the surface at Douglas, AZ. Additional controlled airspace is necessary to accommodate aircraft using VHF Omni-Directional Radio Range/Distance Measuring Equipment VOR/DME Global Positioning System (GPS) standard instrument approach procedures at the Bisbee Douglas International Airport, Douglas, AZ. Decommissioning of the Cochise VORTAC has made this action necessary and would enhance the safety and management of aircraft operations at airport. The geographic coordinates of the airport would also be updated to coincide with the FAA’s aeronautical database.

Class E airspace designations are published in paragraph 6002 and 6005, respectively, of FAA Order 7400.9V, dated August 9, 2011, and effective September 15, 2011, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in this Order.

The FAA has determined this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant a regulatory evaluation as the anticipated impact is so minimal. Since this is a
route matter that will only affect air traffic procedures and air navigation, it is certified this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106, describes the authority for the FAA Administrator, Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify controlled airspace at Bisbee Douglas International Airport, Douglas, AZ.
