FOR FURTHER INFORMATION CONTACT: For information on regulations for the importation of citrus from Peru, contact Mr. Tony Román, Import Specialist, Regulatory Coordination and Compliance, PPQ, APHIS, 4700 River Road Unit 156, Riverdale, MD 20737; (301) 734-5820. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 851-2908.

SUPPLEMENTARY INFORMATION:

Title: Citrus From Peru.

OMB Number: 0579-0289.

Type of Request: Extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. Regulations authorized by the PPA concerning the importation of fruits and vegetables into the United States from certain parts of the world are contained in "Subpart—Fruits and Vegetables" (7 CFR 319.56-1 through 319.56-54).

Under these regulations, fresh citrus (grapefruit, limes, mandarins or tangerines, sweet oranges, and tangelos) from Peru is subject to certain conditions before entering the United States to prevent the introduction of plant pests into the United States. The regulations require the use of information collection activities, including inspections by national plant protection organization officials from Peru, grower registration and agreement, fruit fly trapping, monitoring, and recordkeeping, and a phytosanitary certificate.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of Burden: The public reporting burden for this collection of information is estimated to average 7.769494 hours per response.

Respondents: National plant protection organization officials of Peru and growers of citrus fruit in Peru.

Estimated Annual Number of Respondents: 444.

Estimated Annual Number of Responses per Respondent: 9.2139639.

Estimated Annual Number of Responses: 4,091.

Estimated Total Annual Burden on Respondents: 31,785 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 12th day of December 2011.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

[Docket No. APHIS-2011-0109]

Notice of Revision and Request for Extension of Approval of an Information Collection; Health Certificates for the Export of Live Crustaceans, Finfish, Mollusks, and Related Products

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to revise an information collection associated with health certificates for the export of live crustaceans, finfish, mollusks, and related products and to request extension of approval of the information collection.

DATES: We will consider all comments that we receive on or before February 14, 2012.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov#!documentDetail;D=APHIS-2011-0109-0001>.

- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS-2011-0109, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2011-0109> or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690-2817 before coming.

FOR FURTHER INFORMATION CONTACT: For information on health certificates for the export of live crustaceans, finfish, mollusks, and related products, contact Dr. Christa Speekmann, Import/Export Specialist-Aquaculture, Technical Trade Services Team, NCIE, VS, APHIS, 4700 River Road Unit 39, Riverdale, MD 20737; (301) 734-8364. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 851-2908.

SUPPLEMENTARY INFORMATION:

Title: Health Certificates for the Export of Live Crustaceans, Finfish, Mollusks, and Related Products.

OMB Number: 0579-0278.

Type of Request: Revision and extension of approval of an information collection.

Abstract: The export of agricultural commodities, including animals and animal products, is a major business in the United States and contributes to a favorable balance of trade. To facilitate the export of U.S. animals and animal products, the Animal and Plant Health

Inspection Service (APHIS) of the U.S. Department of Agriculture maintains information regarding the import health requirements of other countries for animals and animal products exported from the United States.

Many countries that import animals from the United States require a certification that the United States is free of certain diseases. These countries may also require the certification statement to contain additional declarations regarding the U.S. animals or products being exported. U.S. trading partners are increasing import requirements, which must be addressed using one of the three Veterinary Services export health certificates or country specific export health certificates. The current collection includes VS Form 17-141, and we are revising the collection to add VS Form 17-140 and APHIS Form 7001.

The certificates are completed by an accredited veterinarian and must be signed by the accredited veterinarian who inspects the animals prior to their departure from the United States, and endorsed by APHIS.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 1.5 hours per response.

Respondents: Accredited veterinarians who complete the health certificates and producers who provide information for the health certificates to the accredited veterinarians.

Estimated annual number of respondents: 69.

Estimated annual number of responses per respondent: 24.63768116.

Estimated annual number of responses: 1,700.

Estimated total annual burden on respondents: 2,550 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 12th day of December 2011.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 851-2908.

SUPPLEMENTARY INFORMATION:

Title: Emergency Management Response System.

OMB Number: 0579-0071.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS), among other things, administers regulations intended to prevent foreign diseases of livestock or poultry from being introduced into the United States, conducts surveillance for the early detection of such foreign animal diseases, and conducts eradication programs if such foreign diseases are detected.

Through our automated Emergency Management Response System (EMRS), APHIS helps manage and investigate potential incidents of foreign animal diseases in the United States.

When a potential foreign animal disease incident is reported, APHIS dispatches a foreign animal disease veterinary diagnostician to the site to conduct an investigation. The diagnostician obtains vital epidemiologic data by conducting field investigations, including sample collection, and by interviewing the owner or manager of the premises being investigated. These important data, submitted electronically by the diagnostician into EMRS, include such items as the number of sick or dead animals on the premises, the results of necropsy examinations, vaccination information on the animals in the flock or herd, biosecurity practices at the site, whether any animals were recently moved out of the herd or flock, whether any new animals were recently introduced into the herd or flock, and detailed geographic data concerning
