**SUPPLEMENTARY INFORMATION:**

*Title:* Importation of Peppers From Certain Central American Countries.  
*OMB Number:* 0579–0274.

*Type of Request:* Extension of approval of an information collection.

*Abstract:* The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. Regulations authorized by the PPA concerning the importation of fruits and vegetables into the United States from certain parts of the world are contained in “Subpart–Fruits and Vegetables” (7 CFR 319.56–1 through 319.56–54).

Under these regulations, peppers from Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama are subject to certain conditions before entering the United States to prevent the introduction of plant pests into the United States. The regulations require the use of information collection activities, including inspections by Central American national plant protection organization officials; fruit fly trapping, monitoring, and recordkeeping; box labeling; and a phytosanitary certificate.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

*Estimate of burden:* The public reporting burden for this collection of information is estimated to average 0.0037936 hours per response.

*Respondents:* National plant protection organization officials and growers and shippers of peppers in Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama.

*Estimated annual number of respondents:* 245.

*Estimated annual number of responses per respondent:* 3,226.653061.

*Estimated annual number of responses:* 790,530.

*Estimated total annual burden on respondents:* 2,999 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 12th day of December 2011.

[Docket No. APHIS–2010–0023]

**Notice of Decision To Authorize the Importation of Fresh Cape Gooseberry Fruit With Husks From Chile****AGENCY:** Animal and Plant Health Inspection Service, USDA.**ACTION:** Notice.

**SUMMARY:** We are advising the public of our decision to authorize the importation into the continental United States of fresh Cape gooseberry fruit (*Physalis peruviana* L.) with husks from Chile. Based on the findings of a pest risk analysis, which we made available to the public for review and comment through a previous notice, we concluded that the application of one or more designated phytosanitary measures will be sufficient to mitigate the risks of introducing or disseminating plant pests or noxious weeds via the importation of fresh Cape gooseberry fruit from Chile.

**DATES:** *Effective Date:* December 16, 2011.
