BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2210-207]

Appalachian Power Company; Notice of Designation of Certain Commission Personnel as Non-Decisional

Commission staff members Jon Cofrancesco (Office of Energy Projects (202) 502-8951; jon.cofrancesco@ferc.gov) and Elizabeth Molloy (Office of the General Counsel; (202) 502-8771; elizabeth.molloy@ferc.gov) are assigned to help resolve issues associated with development of a settlement agreement for the Smith Mountain 2011 updated Shoreline Management Plan.

As “non-decisional” staff, Mr. Cofrancesco and Ms. Molloy will not participate in an advisory capacity in the Commission’s review of any offer of settlement or settlement agreement, or deliberations concerning the disposition of the 2011 updated Shoreline Management Plan.

Different Commission “advisory staff” will be assigned to review any offer of settlement or settlement agreement, and to process the 2011 updated Shoreline Management Plan, including providing advice to the Commission with respect to the agreement and the plan. Non-decisional staff and advisory staff are prohibited from communicating with one another concerning the settlement and the 2011 updated Shoreline Management Plan.

Dated: December 9, 2011.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP12-18-000]

Questar Pipeline Company; Notice of Intent To Prepare an Environmental Assessment for the Proposed Mainline 103 Extension Project and Request for Comments on Environmental Issues

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Mainline 103 Extension Project involving construction and operation of facilities by Questar Pipeline Company (Questar) in Uintah County, Utah. The Commission will use this EA in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies on the project. Your input will help the Commission staff determine what issues they need to evaluate in the EA. Details on how to submit comments are in the Public Participation section of this notice. Please note that the scoping period will close on January 18, 2012.

This notice is being sent to the Commission’s current environmental mailing list for this project. State and local government representatives should notify their constituents of this proposed project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable agreement. However, if the Commission approves the project, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings where compensation would be determined in accordance with State law.

Questar provided landowners with a fact sheet prepared by the FERC entitled “An Interstate Natural Gas Facility On My Land? What Do I Need To Know?” This fact sheet addresses a number of typically-asked questions, including the use of eminent domain and how to participate in the Commission’s proceedings. It is also available for

viewing on the FERC Web site (www.ferc.gov).

Summary of the Proposed Project

Questar seeks authorization to abandon about 8.3 miles of its 14-inch-diameter Mainline 68 and replace it with about 8.5 miles of 20-inch-diameter Mainline 103 in Uintah County, Utah. Questar is replacing this portion of Mainline 68 because it has been undermined and exposed by flash flooding. Questar would extend Mainline 103 away from flood areas in Weaver Canyon, which would result in the replacement being 0.2 mile longer than Mainline 68. Mainline 68 would remain in operation throughout Questar’s extension of Mainline 103. Questar would abandon its Mainline 68 in place, with the exception of areas that are currently exposed, which would be removed. Questar would also construct a pig launcher/receiver¹ facility at its new Mainline 103/68 junction.

The general location of the project facilities is shown in appendix 1.²

Land Requirements for Construction

Construction of the proposed facilities would disturb about 120 acres of land for the pipeline and aboveground facilities. Following construction, Questar would maintain about 52 acres for permanent operation of the project’s facilities; the remaining acreage would be restored and revert to former uses. The proposed pipeline route generally parallels existing pipeline, utility, or road rights-of-way.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us³ to discover and address concerns the public may have about proposals. This process is referred to as “scoping.” The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this

¹ A pipeline “pig” is a device used to clean or inspect the pipeline. A pig launcher/receiver is an aboveground facility where pigs are inserted or retrieved from the pipeline.

² The appendices referenced in this notice will not appear in the **Federal Register**. Copies of appendices were sent to all those receiving this notice in the mail and are available at <http://www.ferc.gov> using the link called “eLibrary” or from the Commission’s Public Reference Room, 888 First Street NE., Washington, DC 20426, or call (202) 502-8371. For instructions on connecting to eLibrary, refer to the last page of this notice.

³ “We,” “us,” and “our” refer to the environmental staff of the Commission’s Office of Energy Projects.

notice, the Commission requests public comments on the scope of the issues to address in the EA. We will consider all filed comments during the preparation of the EA.

In the EA we will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- Geology and soils;
- Vegetation and wildlife;
- Water resources, fisheries, and wetlands;
- Endangered and threatened species;
- Cultural resources;
- Land use;
- Air quality and noise; and
- Public safety.

We will also evaluate reasonable alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

The EA will present our independent analysis of the issues. The EA will be available in the public record through eLibrary. Depending on the comments received during the scoping process, we may also publish and distribute the EA to the public for an allotted comment period. We will consider all comments on the EA before making our recommendations to the Commission. To ensure we have the opportunity to consider and address your comments, please carefully follow the instructions in the Public Participation section beginning on page 5.

With this notice, we are asking agencies with jurisdiction by law and/or special expertise with respect to the environmental issues of this project to formally cooperate with us in the preparation of the EA.⁴ Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the Public Participation section of this notice. Currently, the U.S. Fish and Wildlife Service and the Bureau of Indian Affairs have expressed their intention to participate as a cooperating agency in the preparation of the EA to satisfy their NEPA responsibilities related to this project.

Consultations Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation's implementing regulations for section 106 of the National Historic

Preservation Act, we are using this notice to initiate consultation with applicable State Historic Preservation Office (SHPO), and to solicit their views and those of other government agencies, interested Indian tribes, and the public on the project's potential effects on historic properties.⁵ We will define the project-specific Area of Potential Effects (APE) in consultation with the SHPO as the project develops. On natural gas facility projects, the APE at a minimum encompasses all areas subject to ground disturbance (examples include construction right-of-way, contractor/pipe storage yards, compressor stations, and access roads). Our EA for this project will document our findings on the impacts on historic properties and summarize the status of consultations under section 106.

Currently Identified Environmental Issues

We have already identified several issues that we think deserve attention based on a preliminary review of the proposed facilities and the environmental information provided by Questar. This preliminary list of issues may be changed based on your comments and our analysis.

- Geotechnical issues with crossing the White River;
- Effects on the Colorado pikeminnow, White River beardtongue, and Graham's penstemon; and
- Crossing public, tribal, and private lands.

Public Participation

You can make a difference by providing us with your specific comments or concerns about the project. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. To ensure that your comments are timely and properly recorded, please send your comments so that the Commission receives them in Washington, DC on or before January 18, 2012.

For your convenience, there are three methods which you can use to submit your comments to the Commission. In all instances please reference the project docket number (CP12-18-000) with your submission. The Commission encourages electronic filing of

comments and has expert staff available to assist you at (202) 502-8258 or efiling@ferc.gov.

(1) You can file your comments electronically using the eComment feature on the Commission's Web site (www.ferc.gov) under the link to Documents and Filings. This is an easy method for interested persons to submit brief, text-only comments on a project;

(2) You can file your comments electronically using the eFiling feature on the Commission's Web site (www.ferc.gov) under the link to Documents and Filings. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on "eRegister." You must select the type of filing you are making. If you are filing a comment on a particular project, please select "Comment on a Filing"; or

(3) You can file a paper copy of your comments by mailing them to the following address: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Room 1A, Washington, DC 20426.

Environmental Mailing List

The environmental mailing list includes: Federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, and anyone who submits comments on the project. We will update the environmental mailing list as the analysis proceeds to ensure that we send the information related to this environmental review to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed project.

If we publish and distribute the EA, copies will be sent to the environmental mailing list for public review and comment. If you would prefer to receive a paper copy of the document instead of the CD version or would like to remove your name from the mailing list, please return the attached Information Request (appendix 2).

Becoming an Intervenor

In addition to involvement in the EA scoping process, you may want to become an "intervenor" which is an official party to the Commission's

⁴ The Council on Environmental Quality regulations addressing cooperating agency responsibilities are at Title 40, Code of Federal Regulations, § 1501.6.

⁵ The Advisory Council on Historic Preservation's regulations are at Title 36, Code of Federal Regulations, Part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places.

proceeding. Intervenor play a more formal role in the process and are able to file briefs, appear at hearings, and be heard by the courts if they choose to appeal the Commission's final ruling. An intervenor formally participates in the proceeding by filing a request to intervene. Instructions for becoming an intervenor are in the User's Guide under the "e-filing" link on the Commission's Web site.

Additional Information

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208-FERC, or on the FERC Web site at <http://www.ferc.gov> using the

"eLibrary" link. Click on the eLibrary link, click on "General Search" and enter the docket number, excluding the last three digits in the Docket Number field (i.e., CP12-18). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or toll free at (866) 208-3676, or for TTY, contact (202) 502-8659. The eLibrary link also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission now offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in

specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to <http://www.ferc.gov/esubscribenow.htm>.

Finally, public meetings or site visits will be posted on the Commission's calendar located at www.ferc.gov/EventCalendar/EventsList.aspx along with other related information.

Dated: December 13, 2011.

Kimberly D. Bose,
Secretary

BILLING CODE 6717-01-C

DEPARTMENT OF ENERGY

**Federal Energy Regulatory
Commission**

[Docket No. CP11-481-000]

**Southern Star Central Gas Pipeline,
Inc.; Supplemental Notice of Intent To
Prepare an Environmental Assessment
for the Proposed Alden Gas Storage
Field Expansion Project and Request
for Comments On Environmental
Issues**

As previously noticed on July 8, 2011, and supplemented herein, the staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Alden Gas Storage Field Expansion Project, involving the expansion of the certificated boundary and buffer zone of the existing Alden Gas Storage Field by Southern Star Central Gas Pipeline, Inc. (Southern Star) in Rice County, Kansas. This EA will be used by the Commission in its decision-making process to determine

whether the project is in the public convenience and necessity.

This Supplemental Notice of Intent announces the opening of a limited scoping period the Commission will use to gather input from the public and interested agencies on the project. Your input will help the Commission staff determine what issues need to be evaluated in the EA. Details on how to submit written comments are provided in the Public Participation section of this notice. Please note that the limited scoping period will close on January 13, 2012.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives are asked to notify their constituents of this project and encourage them to comment on their areas of concern.

If you are a landowner or owner of mineral rights receiving this notice, you may be contacted by a storage company representative about the acquisition of mineral rights and an easement to convert, operate, and maintain the proposed facilities. The company would seek to negotiate a mutually acceptable agreement. However, if the project is approved by the Commission, that approval conveys with it the right of eminent domain. Therefore, if

negotiations to obtain an easement or mineral rights fail to produce an agreement, the company could initiate condemnation proceedings where compensation would be determined in accordance with state or federal law.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" was attached to the project notice Southern Star provided to landowners and owners of mineral rights. This fact sheet addresses a number of typically-asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is also available for viewing on the FERC Web site (www.ferc.gov).

Summary of the Proposed Project

Southern Star requests authorization to expand its existing certificated boundary and buffer zone of its existing Alden Gas Storage Field located in Rice County, Kansas to ensure the field's integrity and protection. The certified storage boundary/buffer currently encompasses 3,540 acres and operates with a maximum storage capacity of 14.7 billion cubic feet (Bcf) with a working capacity of 4.2 Bcf. Southern Star states it will attempt to acquire all mineral rights from the base of the
