Title: EPA Strategic Plan Information on Source Water Protection (Renewal).
ICR numbers: EPA ICR No. 1816.05, OMB Control No. 2040-0197.

ICR status: This ICR is currently scheduled to expire on December 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA is collecting, on a voluntary basis, data from the States on their progress toward substantial implementation of prevention strategies for all community water systems

(CWSs). The information to be collected will help states and EPA understand the progress toward the Agency's goal of increasing the number of CWSs (and the populations they serve) with minimized risk to public health through development and implementation of source water protection strategies for source water areas. The Safe Drinking Water Act, while authorizing the generation of this data, does not require the implementation of source water protection programs by States. Section 1452 of the Safe Drinking Water Act allows the use of Drinking Water State Revolving Fund monies for support efforts in the information collection.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 27.6 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: State environmental and health agencies.

Estimated Number of Respondents: 51.

Frequency of Response: Annual.

Estimated Total Annual Hour Burden: 1,408.

Estimated Total Annual Cost: \$58,325; all of this cost is associated with labor; there are no capital investment or maintenance and operational costs associated with this ICR.

Changes in the Estimates: There is a decrease of 308 hours in the total estimated annual respondent burden compared with that identified in the ICR currently approved by OMB. This decrease results from reduced labor burden associated with automated reporting of progress toward developing and implementing prevention strategies for all community water systems via the Safe Drinking Water Information System (SDWIS). EPA estimates that at least 11 states will incur reduced burden by using the capabilities of SDWIS to

report to EPA on the status of contamination prevention efforts in their states.

Dated: December 16, 2011.

John Moses,

Director, Collection Strategies Division.

Title: National Water Quality Inventory Reports (Renewal).

ICR numbers: EPA ICR No. 1560.10, OMB Control No. 2040-0071.

ICR Status: This ICR is scheduled to expire on December 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. Abstract: Section 303(d) of the Clean Water Act requires States to identify and rank waters which cannot meet water quality standards (WQS) following the implementation of technology-based controls. Under Section 303(d), States are also required to establish total maximum daily loads (TMDLs) for listed waters not meeting standards as a result of pollutant discharges. In developing the Section 303(d) lists, States are required to consider various sources of water-quality related data and information, including the Section 305(b) State water quality reports. The State Section 305(b) reports contain information on the extent of water quality degradation, the pollutants and sources affecting water quality, and State progress in controlling water pollution.

EPA's Assessment and Watershed Protection Division (AWPD) works with its Regional counterparts to review and approve or disapprove State Section 303(d) lists and TMDLs from 56 respondents (the 50 States, the District of Columbia, and the five Territories). Section 303(d) specifically requires States to develop lists and TMDLs "from time to time" and EPA to review and approve or disapprove the lists and the TMDLs. EPA also collects State 305(b) reports from 59 respondents (the 50 States, the District of Columbia, five Territories, and 3 River Basin commissions).

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 66,590 hours per year per respondent for the 56 respondents with both 305(b) and 303(d) responsibilities and TMDL development activities. The average reporting burden for the 3 respondents with only 305(b) responsibilities is estimated at 3,659 hours per year. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.
