

Systems (GPS), time, and maintenance activity.

5. The Blue Force Tracker (BFT 1) System is used to denote a GPS enabled system that provides military commanders and forces with location information about military forces. The BFT is a subsystem of the Force XXI Battlefield Command Brigade and Below (FBCB2). The C-27J FBCB2 and BFT is integrated on other Ground and Aviation platforms such as the UH-60H, V-22, E-8, and AH-64D weapon systems. The FBCB2 BFT system consists of four subsystems: Mobile Tracking and Messaging, GPS, Network and Digital Group, and Electronic Data Manager (EDM). The system displays the location of the host vehicle on the computer's terrain-map display, along with the locations of other platforms in their respective locations. It can also be used to send and receive simple text and imagery messages. FBCB2 BFT has a mechanism for reporting the locations of enemy forces and other battlefield conditions.

6. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

Total Estimated Annual Burden Hours: 462

Abstract: Given the considerable scale at which online learning is being used in schools today, it is particularly important that policymakers have research-based guidance available about how best to deploy online learning activities. However, few rigorous studies have been completed that compare K-12 student achievement in online learning to traditional, classroom-based education. Similarly, while many articles provide advice regarding the "best" ways to implement online learning, few report an empirical basis for recommended practices. To fill this critical gap in knowledge, this research will provide rigorous empirical data on the effectiveness of online learning for secondary students. A set of empirical studies will be conducted under this research. This Office of Management and Budget package pertains only to a study of courses offered by North Carolina Virtual Public School (NCVPS), a large-scale, statewide online learning provider. In this study, the impact of online learning for secondary students enrolled in five different courses offered by NCVPS will be compared with peers enrolled in similar courses in face-to-face instruction. The study will use a quasi-experimental design using propensity score matching. State end-of-course exams for each course and the scores on the Advanced Placement U.S. History exam will be used as the primary outcome measures. In addition to the surveys of online teachers and students, a sample of North Carolina teachers teaching similar courses in face-to-face instruction will be administered a survey to collect information on instructional practices in the comparison face-to-face courses.
