

outage of the bridge for testing purposes. Under the regular operating schedule required by 33 CFR 117.569(b), the bridge opens on signal, except between November 1 and March 31 the draw must open only if at least five hours advance notice is given.

The Route 675 Bridge across Pocomoke River, mile 15.6 at Pocomoke City, MD, has a vertical clearance in the closed position of three feet above mean high water. Under this temporary deviation, the engineering consulting firm has requested to maintain the bridge in the closed position to vessels beginning at 7 a.m. on January 19, 2012 until and including 5 p.m. on January 20, 2012, to allow for an electrical outage of the bridge for testing purposes.

Bridge opening data supplied by SHA and reviewed by the Coast Guard revealed that there were approximately five openings in January 2011.

The Coast Guard has coordinated the restrictions with the local users of the waterway and will inform other users through our Local and Broadcast Notices to Mariners of the closure periods for the bridge so that vessels can arrange their transits to minimize any impact caused by the temporary deviation. There are no alternate routes for vessels transiting this section of the Pocomoke River and the drawbridge will be not able to open in the event of an emergency.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the designated time period.

This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: December 14, 2011.
