

(iii) There is no significant increase in individual or cumulative public or occupational radiation exposure;

*Staff analysis:* Since the proposed action involves only a schedule change which is administrative in nature, it does not contribute to any significant increase in occupational or public radiation exposure.

(iv) There is no significant construction impact;

*Staff analysis:* The proposed action involves only a schedule change which is administrative in nature; the application review is underway and no license will be issued prior to receipt of the afore-mentioned March 30, 2012 submittal of the revised FSAR, hence the proposed action does not involve any construction impact.

(v) There is no significant increase in the potential for or consequences from radiological accidents; and

*Staff analysis:* The proposed action involves only a schedule change which is administrative in nature, and does not impact the probability or consequences of accidents, and

(vi) The requirements from which an exemption is sought involve:

(B) Reporting requirements; or  
(G) Scheduling requirements;

*Staff analysis:* The proposed exemption involves requirements in both of these categories because it involves submitting an updated FSAR by UNE and also relates to the schedule for submitting FSAR updates to the NRC

#### 4.0 Conclusion

Accordingly, the NRC has determined that, pursuant to 10 CFR 50.12, the exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Also, special circumstances are present. Therefore, the NRC hereby grants UNE a one-time exemption from the requirements of 10 CFR 50.71(e)(3)(iii) pertaining to the CCNPP3 COL application to allow submittal of the next FSAR update, no later than March 30, 2012.

Pursuant to 10 CFR 51.22, the NRC has determined that the exemption request meets the applicable categorical exclusion criteria set forth in 10 CFR 51.22(c)(25), and the granting of this exemption will not have a significant effect on the quality of the human environment.

This exemption is effective upon issuance.

For the Nuclear Regulatory Commission.

A separate notice of receipt and availability of the application was published in the **Federal Register** on November 17, 2011 (76 FRN 71379). A notice of acceptance for docketing of the application and opportunity for hearing regarding renewal of the facility operating license is also being published in the **Federal Register**. The purpose of this notice is to inform the public that the U.S. Nuclear Regulatory Commission (NRC or the Commission) will be preparing an environmental impact statement (EIS) related to the review of the license renewal application and to provide the public an opportunity to participate in the environmental scoping process, as defined in 10 CFR 51.29.

As outlined in 36 CFR 800.8, "Coordination with the National Environmental Policy Act," the NRC plans to coordinate compliance with Section 106 of the National Historic Preservation Act (NHPA) in meeting the requirements of the National Environmental Policy Act of 1969 (NEPA). Pursuant to 36 CFR 800.8(c), the NRC intends to use its process and documentation for the preparation of

the EIS on the proposed action to comply with Section 106 of the NHPA in lieu of the procedures set forth at 36 CFR 800.3 through 800.6.

In accordance with 10 CFR 51.53(c) and 10 CFR 54.23, Entergy submitted the ER as part of the application.

This notice advises the public that the NRC intends to gather the information necessary to prepare a plant-specific supplement to the NRC's "Generic Environmental Impact Statement (GEIS) for License Renewal of Nuclear Plants" (NUREG-1437), related to the review of the application for renewal of the GGNS operating license for an additional 20 years.

Possible alternatives to the proposed action (license renewal) include no action and reasonable alternative energy sources. The NRC is required by 10 CFR 51.95 to prepare a supplement to the GEIS in connection with the renewal of an operating license. This notice is being published in accordance with NEPA and the NRC's regulations found at 10 CFR Part 51.

The NRC will first conduct a scoping process for the supplement to the GEIS and, as soon as practicable thereafter, will prepare a draft supplement to the GEIS for public comment. Participation in the scoping process by members of the public and local, State, Tribal, and Federal government agencies is encouraged. The scoping process for the supplement to the GEIS will be used to accomplish the following:

- a. Define the proposed action, which is to be the subject of the supplement to the GEIS;
- b. Determine the scope of the supplement to the GEIS and identify the

significant issues to be analyzed in depth;

- c. Identify and eliminate from detailed study those issues that are peripheral or that are not significant;

- d. Identify any environmental assessments and other EISs that are being or will be prepared that are related to, but are not part of, the scope of the supplement to the GEIS being considered;

- e. Identify other environmental review and consultation requirements related to the proposed action;

- f. Indicate the relationship between the timing of the preparation of the environmental analyses and the Commission's tentative planning and decision-making schedule;

- g. Identify any cooperating agencies and, as appropriate, allocate assignments for preparation and schedules for completing the supplement to the GEIS to the NRC and any cooperating agencies; and

- h. Describe how the supplement to the GEIS will be prepared and include any contractor assistance to be used.

The NRC invites the following entities to participate in scoping:

- a. The applicant, Entergy;
- b. Any Federal agency that has jurisdiction by law or special expertise with respect to any environmental impact involved or that is authorized to develop and enforce relevant environmental standards;

- c. Affected State and local government agencies, including those authorized to develop and enforce relevant environmental standards;

- d. Any affected Indian tribe;
- e. Any person who requests or has requested an opportunity to participate in the scoping process; and

- f. Any person who has petitioned or intends to petition for leave to intervene.

In accordance with 10 CFR 51.26, the scoping process for an EIS may include a public scoping meeting to help identify significant issues related to a proposed activity and to determine the scope of issues to be addressed in an EIS. The NRC has decided to hold public meetings for the GGNS license renewal supplement to the GEIS. The scoping meetings will be held on January 31, 2012, and there will be two sessions to accommodate interested parties. The first session will convene at 2 p.m. and will continue until 3:30 p.m. The second session will convene at 7 p.m. with a repeat of the overview portions of the meeting and will continue until 8:30 p.m., as necessary. Both sessions will be held at the Port Gibson City Hall, 1005 College Street, Port Gibson, Mississippi 39150.

Both meetings will be transcribed and will include: (1) an overview by the NRC staff of the NEPA environmental review process, the proposed scope of the supplement to the GEIS, and the proposed review schedule; and (2) the opportunity for interested government agencies, organizations, and individuals to submit comments or suggestions on the environmental issues or the proposed scope of the supplement to the GEIS. Additionally, the NRC staff will host informal discussions one hour prior to the start of each session at the same location. No formal comments on the proposed scope of the supplement to the GEIS will be accepted during the informal discussions. To be considered, comments must be provided either at the transcribed public meetings or in writing, as discussed in the **ADDRESSES** section of this notice.

Persons may register to attend or present oral comments at the meetings on the scope of the NEPA review by contacting the NRC Project Manager, David Drucker, by telephone at (800) 368-5642, ext. 6223, or by email at [David.Drucker@nrc.gov](mailto:David.Drucker@nrc.gov) no later than January 24, 2012. Members of the public may also register to speak at the meeting within 15 minutes of the start of each session. Individual oral comments may be limited by the time available, depending on the number of persons who register. Members of the public who have not registered may also have an opportunity to speak if time permits. Public comments will be considered in the scoping process for the supplement to the GEIS. David Drucker will need to be contacted no later than January 10, 2012, if special equipment or accommodations are needed to attend or present information at the public meeting so that the NRC staff can determine whether the request can be accommodated.

Participation in the scoping process for the supplement to the GEIS does not entitle participants to become parties to the proceeding to which the supplement to the GEIS relates. Matters related to participation in any hearing are outside the scope of matters to be discussed at this public meeting. The notice of acceptance for docketing of the application and opportunity for hearing that was published in the **Federal Register** describes the hearing process.

### Discussion

The draft NUREG presents a  
 probabilistic risk assessment (PRA)  
 method for quantitatively analyzing fire  
 risk in commercial nuclear power plants  
 during low power operation and  
 shutdown (LPSD) conditions, including  
 the determination of core damage  
 frequency (CDF) and large early release  
 frequency (LERF). Future updates are  
 expected to be made to this document  
 as experience is gained with LPSD  
 quantitative risk analyses of both  
 internal events and fires.

The NRC developed this LPSD fire  
 quantitative risk method so analysts  
 would be able to use a quantitative  
 approach for estimating fire risk during  
 LPSD conditions. While current LPSD  
 safety analyses for fires performed  
 under National Fire Protection  
 Association Standard 805 (NFPA 805)  
 focus on qualitative, defense-in-depth  
 methods, it is envisioned that  
 applications in the future may evolve to  
 a more quantitative method.

Dated at Rockville, Maryland, this 21 day  
 of December, 2011.
