

expressed some concerns with the details of the SRO Proposals, including whether only the Level III circuit breaker should halt trading after 3:25 p.m. and whether the market-wide circuit breakers should be triggered if a significant number of volatility moderators for individual securities are triggered.

The Commission shares the desire of the exchanges and FINRA to appropriately update the market-wide circuit breakers in light of the current market structure and the lessons learned from the events of May 6, 2010. Because of the importance of both the market-wide and individual security volatility moderators to the maintenance of fair and orderly markets and the protection of investors, however, the Commission believes the SRO Proposals should be considered together with the proposed Limit Up-Limit Down Plan, to help assure these mechanisms interact appropriately with one another, and that details of the market-wide circuit breakers are fully evaluated.

Accordingly, in light of the pending proposal to establish the Limit Up-Limit Down Plan, and the concerns raised by commenters, the Commission believes that questions remain as to whether the SRO Proposals are consistent with the requirements of Sections 6(b)(5) and 15A(b)(6) of the Act, including whether the proposed market-wide circuit breakers would remove impediments to and perfect the mechanism of a national market system, or protect investors and the public interest.

VI. Solicitation of Comments

The Commission requests that interested persons provide written submissions of their views, data and arguments with respect to the concerns identified above, as well as any others they may have with the SRO Proposals. In particular, the Commission invites the written views of interested persons concerning whether the SRO Proposals are inconsistent with Section 6(b)(5), Section 15A(b)(6), or any other provision of the Act, or the rules and regulation thereunder. Although there do not appear to be any issues relevant to approval or disapproval which would be facilitated by an oral presentation of views, data, and arguments, the Commission will consider, pursuant to Rule 19b-4, any request for an opportunity to make an oral presentation.²⁵

²⁵ Section 19(b)(2) of the Act, as amended by the Securities Act Amendments of 1975, Public Law 94-29 (June 4, 1975), grants the Commission flexibility to determine what type of proceeding—either oral or notice and opportunity for written comments—is appropriate for consideration of a

Interested persons are invited to submit written data, views and arguments regarding whether the SRO Proposals should be disapproved by January 25, 2012. Any person who wishes to file a rebuttal to any other person's submission must file that rebuttal by February 8, 2012.

SUPPLEMENTARY INFORMATION:

Title: Compendium of State Performance Management Practices and Methodologies for Setting a National Safety Performance Target.

Type of request: New information collection requirement.

Background: This information collection effort is part of a larger project to document the methodologies currently used by the States to develop highway safety performance measures and targets. The research project includes a literature review of current guidance and practices, a technical report on performance management and target setting in comparable non-highway safety environments, a peer exchange to explore methodologies and establish promising practices and finally, alternative methodologies for setting a national highway safety performance target.

This information collection will specifically support a compendium and evaluation of how baseline information is used in individual States, the District of Columbia, Metropolitan Planning Organizations (MPOs), local and tribal agencies to select, set and evaluate performance based highway safety measures and how they affect the overall State's highway safety programs. FHWA proposes to conduct a Web-based survey to evaluate the methodologies used by State Departments of Transportation, State Governor's Highway Safety Offices, select Metropolitan Planning Organizations and local departments of transportation to identify methodologies for selecting highway safety performance measures and methodologies for setting performance targets based on those measures. Sample size will be approximately 150 to 160 persons, representing each of the State Departments of Transportation; each of the Governor's Highway Safety Offices, the District of Columbia, and select MPOs and local departments of transportation. Interview length will be approximately 30 minutes.

The surveys will be conducted by emailing a URL link to the appropriate representative within each organization. A standardized questionnaire will be
