

of ROWs for construction, operation, maintenance and termination of a 230-kV transmission line, tensioning sites and related access across lands administered by the BLM. The route for the Selected Alternative would originate at the Echanis Wind Energy Project substation, south of Diamond, Oregon and connect to Harney Electric Cooperative's existing 115-kV transmission line near Crane, Oregon. The Selected Alternative would not cross the Malheur National Wildlife Refuge administered by the U.S. Fish and Wildlife Service. This alternative will enable the construction of the Echanis Wind Energy Project on private land. The effects of the wind project on private land are analyzed in the Final Environmental Impact Statement (EIS) because they are "connected actions" under the National Environmental Policy Act of 1969.

This BLM-preferred Alternative was evaluated in the Final EIS. The Notice of Availability of the Final EIS for the North Steens 230kV Transmission Line Project was published in the **Federal Register** on October 21, 2011 (76 FR 65509).

Because this decision is approved by the Secretary of the Interior, it is not subject to administrative appeal (43 CFR 4.410(a)(3)).

Authority: 40 CFR 1506.6.

Mike Pool,

Deputy Director, Bureau of Land Management.

Notice of Lodging of Proposed Natural Resource Damages Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act

Notice is hereby given that on December 29, 2011, a proposed Consent Decree in *United States and State of New Mexico v. Freeport-McMoRan Corp. et al.* ("Freeport-McMoRan Consent Decree"), Civil Action No. 1:11-cv-1140 (D. N.M.), was lodged with the United States District Court for the District of New Mexico.

The Complaint in this case was filed against Freeport-McMoRan Corporation, Freeport-McMoRan Chino Mines Company, Freeport-McMoRan Tyrone Inc., Freeport-McMoRan Tyrone Mining LLC, and Freeport-McMoRan Cobre Mining Company (collectively "Freeport-McMoRan") on December 29, 2011. The cause of action is based on Section 107(a) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended ("CERCLA"), 42 U.S.C. 9607(a). The Complaint alleges that Freeport-McMoRan is civilly liable for payment of damages for injuries to natural resources belonging to, managed by, or controlled by the United States and the State of New Mexico that resulted from hazardous substance releases at and from Freeport-McMoRan's Chino Mine, Tyrone Mine, and Cobre Mine in southwestern New Mexico. The Complaint further alleges that surface waters, ground water, terrestrial habitat and wildlife, and migratory birds have been injured, destroyed, or lost as a result of releases of hazardous substances at and from the mine sites.

Under the settlement, Freeport-McMoRan will pay \$5.5 million to the United States Department of the Interior's Natural Resource Damage Assessment and Restoration Fund, which can be used to restore, rehabilitate, replace, or acquire the equivalent of wildlife and wildlife habitat injured, destroyed, or lost as a result of releases at the mine sites.
