SUPPLEMENTARY INFORMATION: On June 29, 2009, the Bureau of Engraving and Printing, a bureau within the United States Department of the Treasury, published its inventory of Privacy Act systems of records at 74 FR 31090.

Included within that inventory was a system of records entitled "Treasury/BEP .027—Access Control and Alarm Monitoring Systems (ACAMS)." BEP proposes to amend that system of records by adding language under the "categories of records in the system" and "retention and disposal" sections.

Under the existing system of records, the following information is maintained concerning individuals issued "Escort Visitor" badges (including official visitors and contractors who are allowed to move within a BEP facility only with an escort): full name; date of issue; and date, time, and location of each passage through a security control point.

BEP is incorporating scanning technology in its facilities to allow for a visitor's identification (e.g., driver's license or passport) to be scanned, and for the information contained on that piece of identification to be used in generating an Escort Visitor badge. This will speed the process by which a visitor's information is entered into an Escort Visitor badge. It will also allow BEP to maintain a photograph of a visitor that is issued an Escort Visitor badge. This amendment will help BEP make full use of its scanning technology in processing Escort Visitor badges and further ensure the security of BEP facilities by capturing photographs.

BEP is amending the "categories of records in the system" by including in the information maintained for visitors issued Escort Visitor badges all data contained on their personal identification, such as photograph, date
