Gayle Kelch, Statistician, United States Fire Administration, National Fire Data Center, (301) 447-1154 for additional information. You may contact the Records Management Division for copies of the proposed collection of information at facsimile number (202) 646-3347 or email address: FEMA-Information-Collections-Management@dhs.gov.

SUPPLEMENTARY INFORMATION: Public Law 93-498 provides for the gathering and analyzing of data as deemed useful and applicable for fire departments. The U.S. Fire Administration (USFA) receives many requests from fire service organizations and the general public for information related to fire departments, including total number of departments, number of stations per department, population protected, and number of

firefighters. The USFA also has a need for this information to guide programmatic decisions, and produce mailing lists for USFA publications. Recommendations for the creation of the fire department census database came out of a Blue Ribbon Panel's review of the USFA. The report included a review of the structure, mission, and funding of the USFA, future policies, programmatic needs, course development and delivery, and the role of the USFA to reflect changes in the fire service. As a result of those recommendations, the USFA is working to identify all fire departments in the United States to develop a database that will include information related to demographics, capabilities, and activities of fire departments Nationwide.

In the first year of this effort, information was collected from 16,000 fire departments. Since the first year of the collection, an additional 10,500 departments have registered with the census for a total of 26,500 fire departments. This leaves an estimated 3,500 departments still to respond. Additionally, about 5,300 current census registered departments are contacted by USFA each year and are asked to provide updates to any previously submitted information.
