Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of

information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Project: Toolkit Protocol for the Crisis Counseling Assistance and Training Program (CCP)—Revision

The Substance Abuse and Mental Health Services Administration's (SAMHSA) Center for Mental Health Services (CMHS) will create a toolkit to be used for the purposes of collecting data on the Crisis Counseling Assistance and Training Program (CCP). The CCP provides supplemental funding to states and territories for individual and community crisis intervention services during a Federal disaster.

The CCP has provided disaster mental health services to millions of disaster survivors since its inception and, as a result of 30 years of accumulated expertise, it has become an important model for Federal response to a variety of catastrophic events. State CCPs, such as the recent 2009 Project A'apa Atua (for the Tsunami in American Samoa), 2010 Tennessee Recovery Project (following devastating flooding), Healing Joplin and Project Rebound (following the 2011 tornadoes in Joplin, Missouri and Alabama), and most recently the multiple CCPs that resulted from 2011 Hurricane Irene, and flooding throughout the summer of 2011 have primarily addressed the short-term mental health needs of communities through (a) Outreach and public education, (b) individual and group counseling, and (c) referral. Outreach and public education serve primarily to normalize reactions and to engage people who might need further care. Crisis counseling assists survivors to cope with current stress and symptoms in order to return to predisaster functioning. Crisis counseling relies largely on “active listening,” and crisis counselors also provide psycho-education (especially about the nature of responses to trauma) and help clients build coping skills. Crisis counseling typically continues no more than a few times. Because crisis counseling is time-limited, referral is the third important function of CCPs. Counselors are expected to refer clients to formal treatment if the person has developed more serious psychiatric problems.

Data about services delivered and users of services will be collected throughout the program period. The data will be collected via the use of a toolkit that relies on standardized forms. At the program level, the data will be entered quickly and easily into a
