DEPARTMENT OF ENERGY

Notice of Intent To Prepare an Environmental Impact Statement for the Acquisition of a Natural Gas Pipeline and Natural Gas Utility Service at the Hanford Site, Richland, WA, and Notice of Floodplains and Wetlands Involvement (DOE/EIS-0467)

AGENCY: Department of Energy.

ACTION: Notice of Intent to Prepare an Environmental Impact Statement (EIS) and Notice of Floodplains and Wetlands Involvement.

SUMMARY: The Department of Energy (DOE) announces its intent to prepare an *Environmental Impact Statement for the Acquisition of a Natural Gas Pipeline and Natural Gas Utility Service at the Hanford Site, Richland, Washington* (Natural Gas Pipeline or NGP EIS), and initiate a 30-day public scoping period. DOE will prepare the NGP EIS in accordance with the National Environmental Policy Act (NEPA), the Council on Environmental Quality (CEQ) regulations that implement NEPA and DOE implementing procedures. DOE is inviting public comment on the proposed scope of the NGP EIS, including the alternatives and environmental issues to be evaluated.

DOE proposes to make natural gas available to facilities located on the Central Plateau of its Hanford Site near Richland, Washington, to help meet its objectives to reduce fuel costs, greenhouse gas (GHG) emissions, and dependence on foreign fuel sources. Because natural gas is not currently available on the Central Plateau of the Site, this action would involve entering into a contract with a licensed natural gas utility supplier to construct, operate, and maintain a natural gas pipeline and deliver natural gas utility service to DOE.

The proposed pipeline would begin from a new interconnect tap on the existing Williams Northwest Pipe transmission line in Franklin County, north of the Pasco, Washington, airport, and then run westerly across non-DOE lands and under the Columbia River onto the Hanford Site 300 Area, before turning northwest and paralleling Route 4S. The pipeline would terminate at facilities in the 200 East Area of the
