

public health continues to be protected from the hazards of radionuclides by compliance with health based standards. This information is required for those facilities meeting the definition of each Subpart. EPA's compliance monitoring activities vary widely. EPA could issue a letter requesting information about compliance or could conduct a full scale investigation, including on-site inspections.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 134 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 47.

Frequency of response: Annual.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 134 hours.

Estimated total annual costs: \$1,358,000. This includes an estimated burden cost of \$666,000 and an estimated cost of \$693,000 for capital investment or maintenance and operational costs.

Are there changes in the estimates from the last approval?

There is a decrease of 14 hours per facility in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects a reduction in the number of facilities affected due to limited investment in uranium mining and a moratorium on DOE uranium lease tracts for Subpart B; closure of a conventional uranium mill in Subpart W; with no change in the number of Subpart R and K facilities. Increased costs are due to inflation and estimates

of radium-226 sampling for phosphogypsum stacks that remove material.

What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
